

Tornado Safety While on the Road

- ### Your safety options
1. Don't get in this situation! When severe weather is expected stay home or stay away from areas with warnings.
 2. If you must drive pay attention to the weather. If A tornado is approaching find a road going at a right angle to it's path . Do not attempt to outrun the tornado!
 3. Find a sturdy building and get inside immediately
 4. If you have no other choice pull off the road. Get away from your car and lay on your stomach in a low area. Protect your head and neck, you will get hit by falling debris. Watch for flooding in ditches!

- ### Danger!
- X Stay far away! Do not try to pass or drive near the tornado. They change direction, speed and size very quickly!
 - X Do not attempt to outrun the tornado. They can travel faster than you can drive away.
 - X Stay away from overpasses. They are not safe shelters!
 - X Stay away from culverts and drains. They will fill with flood water.
