## Hazardous Waste Compliance Self-Assessment

**Small Quantity Generators** 

Use this self-assessment to help your organization follow hazardous waste requirements. Consider doing a self-assessment once a month. Self-assessments are recommended, but not required.

A self-assessment is a great starting point to maintain compliance. Your inspector may assess additional aspects during a routine inspection depending on your organization's situation, license type, waste types, etc. according to <a href="Minnesota Rules Chapter 7045">Minnesota Rules Chapter 7045</a> and the <a href="Ramsey County Hazardous Waste Management">Ramsey County Hazardous Waste Management</a> Ordinance.

Some items below may not pertain to your organization. Contact your inspector or call 651-266-1199 with questions.

| Person filling out assessment:   | Today's Date:      |      |  |  |  |  |
|--|--------------------|------|--|--|--|--|
|  |                    |      |  |  |  |  |
| General  | Corrective actions |      |  |  |  |  |
| Did the name, location, or ownership of the business change? If yes, contact Ramsey County to update your license.   | □ Yes              | □ No |  |  |  |  |
| Is your hazardous waste generator license posted onsite in a public area?  | ☐ Yes              | □ No |  |  |  |  |
| Hazardous waste storage  | Corrective actions |      |  |  |  |  |
| Are all hazardous waste containers closed?   | ☐ Yes              | □ No |  |  |  |  |
| Are all hazardous waste containers properly labeled with the words "Hazardous Waste", a description of the waste, and an accumulation start date? Accumulation start dates are not required for satellite containers.  | □ Yes              | □ No |  |  |  |  |
| Are all hazardous waste containers in good condition, compatible with the waste, and not leaking?  | □ Yes              | □ No |  |  |  |  |
| Do you conduct weekly container inspections* and keep records for at least three years?  Hazardous waste containers must be inspected weekly for leaks, deterioration, labeling and closure. Keep records of inspections, including issues found, for at least three years. *Weekly container inspections are not required for satellite containers. | ☐ Yes              | □ No |  |  |  |  |
| Are all satellite containers in the immediate working area and under direct visual and physical control? If not, move them to an appropriate location OR manage them as permanent (i.e., regular hazardous waste) storage.   | □ Yes              | □ No |  |  |  |  |
| Do you have 6600 pounds (3000 kg) or less of <u>non-acute</u> hazardous waste onsite? <i>You may accumulate up to this amount for up to 180 days from the accumulation start date.</i>   | □ Yes              | □ No |  |  |  |  |
| (Outdoor storage) Are liquids on a curbed impermeable surface that can contain leaks?  | ☐ Yes              | □ No |  |  |  |  |
| (Outdoor storage) Are ignitable wastes shaded?   | ☐ Yes              | □ No |  |  |  |  |
| (Outdoor storage) Are containers protected from moisture, unauthorized entry and damage?   | ☐ Yes              | □ No |  |  |  |  |

| Hazardous waste disposal documentation   | Corrective actions |     |      |                    |
|--|--------------------|-----|------|--------------------|
| Do you keep manifests (paper or electronic) onsite for at least three years?   |                    | Yes | □ No |                    |
| Do you make sure manifests are properly completed? (i.e., correct hazardous waste ID,  |                    | Yes | □ No |                    |
| description of wastes, hazardous waste codes, generator contact information, etc.)   |                    | res | ⊔ мо |                    |
| Do you make sure you have the Designated Facility to Generator ("three signature") copy of   |                    |     |      |                    |
| each manifest onsite? You should receive a three-signature copy within 40 days of your waste   |                    | Yes | □ No |                    |
| arriving at the designated facility. If not, you are responsible for contacting the facility.  |                    |     |      |                    |
| Used oil and related waste   | Corrective actions |     |      |                    |
| Are containers and tanks of used oil and related wastes in good condition and closed?  |                    | Yes | □ No |                    |
| Are containers and tanks labeled with the words "Used Oil", "Used Oil Filters", or "Used oil sorbents"?                              |                    | Yes | □ No |                    |
| Do you keep disposal documentation (paper or electronic) for used oil and related waste onsite                                       |                    | Yes | □ No |                    |
| for at least three years?  If you burn used oil for heat, do you keep track of how much you burn?                                    |                    | νος | □ No |                    |
| in you built used on for heat, do you keep track of how much you built:  |                    | 163 |      |                    |
| New wastes   | Corrective actions |     |      |                    |
| Have you evaluated newly generated wastes to determine if they are hazardous or non-   |                    |     |      |                    |
| hazardous? If no, assume the new waste is hazardous, and treat it as such. You have 60 days  |                    | Yes | □ No |                    |
| after generating a new waste to evaluate it. Keep evaluation records and/or test results.  |                    |     |      |                    |
| Universal wastes: <u>Types listed here</u>   | Corrective actions |     |      |                    |
| Are all universal waste containers closed?   |                    | Yes | □ No |                    |
| Are all universal waste containers properly labeled? Acceptable labels:  1) Universal Waste: [type] 2) Waste: [type] 3) Used: [type] |                    | Yes | □ No |                    |
| Do you keep disposal documentation (paper or electronic) for universal waste onsite for at least three years?                        |                    | Yes | □ No |                    |
| Emergency preparedness   |                    |     |      | Corrective actions |
| Is there adequate aisle space near hazardous waste containers? This means a container can be   |                    | Yes | □ No |                    |
| accessed with appropriate emergency equipment without moving other items.  |                    | 103 |      |                    |
| Do you have a way to notify onsite staff of a hazardous waste emergency? Examples include  | □ Yes              | Yes | □ No |                    |
| intercom, public address (PA) system, fire alarm or human voice.   |                    |     |      |                    |
| Do onsite staff have a way to request help during a hazardous waste emergency? Examples  |                    |     | □ No |                    |
| include handheld radio, cell phone, alarm call buttons, buddy system or human voice.   |                    |     |      |                    |
| Do staff have access to phones to contact local emergency response agencies?   |                    | Yes | □ No |                    |
| Do you have fire protection equipment appropriate to your wastes available onsite?   |                    | Yes | □ No |                    |

| Do you have spill control equipment (PPE, sorbents, etc.) appropriate to your wastes available onsite?   |  | Yes |  | No                 |  |
|--|--|-----|--|--------------------|--|
| Do you have decontamination equipment (eye wash stations, showers, sinks, etc.) appropriate to your wastes available onsite?   |  | Yes |  | No                 |  |
| Do you maintain and test all emergency equipment?  |  | Yes |  | No                 |  |
| Requirements for Small Quantity Generators   |  |     |  | Corrective actions |  |
| Do you always have a designated emergency coordinator available? The emergency coordinator is responsible for coordinating all emergency response measures and must be available onsite or able to reach the premises quickly.   |  | Yes |  | No                 |  |
| Do you have a telephone posting? Post next to the phone: (1) name and phone number of emergency coordinator(s), (2) location of fire extinguishers, fire alarms and spill control material, and (3) phone numbers for the fire department (unless there is a direct alarm) and Minnesota Duty Officer. |  | Yes |  | No                 |  |
| Do you document and maintain up-to-date personnel training? <i>Train employees within six months of starting hazardous waste responsibilities. Keep documentation. One-time training is required. Refreshers are recommended, but not required.</i>  |  | Yes |  | No                 |  |
| Have you notified local authorities (police, fire, hospital, etc.) about hazardous waste types, volumes, locations, and risks at your site? <i>Document attempts to notify them.</i>   |  | Yes |  | No                 |  |
| Notes  |  |     |  |                    |  |
|  |  |     |  |                    |  |
