Telephone (include after hours) _____

RE: Resource Conservation and Recovery Act

To whom it may concern:

The U.S. Environmental Protection Agency has enacted regulations as required by the Hazardous and Solid Waste Amendments of the Resource Conservation and Recovery Act, which govern the handling and disposal of hazardous wastes.

As part of these regulations, generators of hazardous waste are required to notify all emergency response personnel that may be called upon to provide services. The notification is intended to establish cooperation in minimizing the hazards to human health or the environment from any unplanned release of hazardous wastes, and request services, if needed, in case an emergency situation arises involving wastes from our facility.

The role of your authority in an emergency involving hazardous materials/hazardous waste at this location would be in treating emergency conditions or victims of an emergency. In light of this, we would like to identify the following materials/wastes, which are generated at our location and a description (where available) by DOT Shipping Name, DOT Hazard Class, and a UN/NA ID Number:

<u>Waste/material name</u>	<u>DOT shipping name</u>	<u>DOT hazard class</u>	<u>UN/NA ID #</u>
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

In order to facilitate emergency response, we have included the following plot plan and /or description of facility entrances and the location of the production areas:

We appreciate your assistance in this matter and look forward to any comments you may have regarding this emergency notification plan. Please contact me at _____ if I can provide further information.

Sincerely,

Name (printed)
