

GENERAL NOTES:
The final design will be mindful of community needs, security and safety, noise management, and visibility to the lake edges.

- Sustainable and ecological improvements throughout park
- Safety and crime improvements
- Trails will potentially be widened but will follow old trail footprint unless noted
- Welcoming wayfinding and educational plaques around the park in multiple languages
- Vegetation management to improve park space, wetlands and water quality
- Cultural open space and fishing improvements
- Approximate layout design and final location of amenities may change dependent on further design
- Landscape plantings and trees added for park beautification
- Conceptual design, layout and final designs may change

Wetland Trail Entrance

- Pedestrian connection
- Boardwalk path
- Overhead lighting for safety
- Manage vegetation for more trail space and better visibility
- Bus stop access

Natural Water Access Node

- Fishing
- Boulders as seating
- Manage vegetation for sight lines and lake ecology
- Add lighting features for safety

Trail

- Widen the existing trail
- Add lighting features for safety
- Add benches
- Manage vegetation for sight lines and lake ecology

Natural Water Access Node

- Fishing
- Boulders as seating
- Manage vegetation for sight lines and lake ecology

Multicultural Open Space

- Leave open
- Picnic tables and benches scattered along path
- More sight lines to the lake
- Mixture of overhead and ballard lighting for safety

Playground

- Three sections- toddler, 6-12 year old play with a water feature and a natural play space
- A mixture of traditional play equipment- slides, swings, and climbing structure
- Mulch or safety surfacing ground cover
- Mixture of overhead and ballard lighting for safety
- Bench seating on edge
- Located near bathrooms and water fountains

Beaver Lake Common Space

- Permeable pavements
- Creates an access space for all amenities
- Picnic tables and benches

Preferred parking configuration

- Parking lot - one way with new exit
- 56 slot parking lot this would allow for a new walkway into the park on north side of lot
- More lighting for safety
- Permeable asphalt
- Partial retaining wall may be added for grade change
- Pedestrian connection/sidewalk access added on entrance and exit

Tuj Lub Court

Sustainable garden

- Pollinator and rain garden with rock border
- Bench seating on edge
- Paths will go though the garden with educational signs
- Overhead and ballard lighting for safety
- Public art program that highlights local artists and their work along the trail system
- Cultural symbols integrated into the garden

Reservable Shelter

- 75 person shelter with picnic tables and BBQ's
- Sightline to the lake
- Extended shelter gathering area with partial retaining wall

Bathroom facilities

- Men's/women's and/or gender neutral bathrooms
- Storage room for park

Sustainable garden

- Pollinator and rain garden
- Bench seating on edge
- Paths will go though the garden with educational signs
- Overhead lighting for safety
- Public art program that highlights local artists and their work along the trail system

Kayak and Canoe Storage Facility

- Easy access to the water via a gravel pad
- Sightline to the lake

Kayak and canoe launch/water access

- trail connection will be ADA compliant
- Winter recreational access to the lake dependent on ice conditions

Extended dock configuration

- A floating dock that extends south of the existing dock.
- Fishing access
- ADA compliant
- The vegetation will be minimal along the lakes edge for safety and visibility

Natural Water Access Node

- Fishing
- Boulders as seating
- Manage vegetation for sight lines and lake ecology

Right Of Way

Trash Receptor

Existing Tree

New Tree

25 50 75 150 feet

BEAVER LAKE COUNTY PARK MASTER PLAN

GENERAL NOTES:

The final design will be mindful of community needs, security and safety, noise management, and visibility to the lake edges.

- Conceptual design, layout and final designs may change
- Sustainable and ecological improvements throughout park
- Safety and crime improvements
- Trails will potentially be widened but will follow old trail footprint unless noted
- Welcoming wayfinding and educational plaques around the park in multiple languages
- Vegetation management to improve park space, wetlands and water quality
- Cultural open space and fishing improvements
- Approximate layout design and final location of amenities may change dependent on further design
- Landscape plantings and trees added for park beautification
- Fishing node locations can be found on detailed park plan
