# BRUCE VENTO REGIONAL TRAIL PHASE 2 PRELIMINARY DESIGN

# **RAMSEY COUNTY, MN**

OCTOBER 6, 2022

This page intentionally left blank

# ACKNOWLEDGMENTS

The Ramsey County Parks & Recreation Department gratefully acknowledges the team who contributed to this report. Reviewing agencies included the City of White Bear Lake, White Bear Township, ISD 624, Rice Creek Watershed District, Vadnais Lake Area Water Management Organization, and staff from Ramsey County Parks & Recreation and Public Works Departments.

### **RAMSEY COUNTY**

Scott Yonke, Ramsey County Parks & Recreation Nicklaus Fischer, Ramsey County Public Works Daniel Baar, Ramsey County Public Works Andrew Gitzlaff, Ramsey County Public Works\* Scott Mareck, Ramsey County Public Works Nikki Wee-Moretto, Ramsey County\* John Mazzitello, Ramsey County Public Works

## **INTRODUCTION**

#### **Project Goal**

Provide Design Development Documents for the integration of a regional trail extension within an urban corridor of varied road types utilizing the preferred trail route from Whitaker Street to County Road J to remove significant barriers for northern communities in Ramsey County in addition to completing a major gap in the National US Bike Route 41 (USBR 41).

#### **Project Objectives**

Basis for final design and construction documents and future grant requests.

- To facilitate public involvement with meaningful engagement to obtain feedback representative of the population living within the project corridor for regional trail improvements.
- Provide high-quality community spaces that promote an enriched culture for all people, of all ages, and of all abilities.
- To provide a regional trail facility, amenities, and site components that complement the natural resource base and incorporate sustainability and green infrastructure for long-term resiliency.
- Provide trail connections to Rush Line Bus Rapid Transit (BRT) and downtown White Bear Lake.

#### **Project Precedent and Background**

The Bruce Vento Regional Trail is 13.3 miles in length and extends from the east side of downtown Saint Paul northwestward to the north County line in White Bear Township. The trail is located on the former right of way of the Burlington Northern Santa Fe (BNSF) Railroad. The trail passes through the cities of Saint Paul, Maplewood, Vadnais Heights, Gem Lake, White Bear Lake, and White Bear Township. Although the designated trail corridor extends the entire length of the BNSF Railroad right of way, only the southern 7 miles have been developed for public use between the east side of downtown Saint Paul to Buerkle Road in White Bear Lake.

A major planning effort was initiated in 2014 to determine an alternative three-mile trail alignment out of the railway right-of-way from Buerkle Road to Highway 96 in White Bear Lake for reducing the remaining gap for the Bruce Vento Regional Trail. In efforts to extend the regional trail from Buerkle Road to County Road J, the Parks department initiated three regional trail projects in 2018:

### Buerkle Road to Intersection of Hoffman Road/Highway 61 Trail Extension

This project will complete the final construction plans for the Phase 1 section between Buerkle Road to the intersection of Hoffman Boulevard. A 2020 regional solicitation application was submitted in 2020 for federal funds; however, the Parks department was not successful in receiving funds. Another regional solicitation application was submitted in 2022 for future federal funds.

#### Highway 96 to County Road J Trail Feasibility Study

This project assessed the downtown of White Bear Lake and portions of White Bear Townships for an alternate regional trail corridor alignment. The evaluation analyzed design intent, usability, and effectualness for both bikers and walkers, impacts, connections to downtown, and trail user experience. At the completion of the feasibility study the finding/outcomes of the study were incorporated in to the Bruce Vento Regional Trail Master Plan Amendment.

### Bruce Vento Regional Trail Master Plan amendment – Larpenteur Avenue to County Road J

The master plan amendment includes the regional trail corridor from Larpenteur Avenue to County Road J. This document addresses several changes and projects planned throughout the corridor including amenity improvements, trailhead development, and enhanced access to the Rush Line Bus Rapid Transit (BRT) improvements. This master plan amendment was approved in 2021.

# Preferred Route for Phase 2 of the Bruce Vento Regional Trail

The preferred route shown in Figure 1 became the starting point for this study which initiates preliminary engineering to better define the trail design, impacts, right-of-way needs, and costs.

The evaluation of multiple alternatives for the location of the trail within the preferred corridor identified in the original Feasibility Study and Master plan amendment will provide the County with more detailed information on the cost and impacts of trail construction in the preferred corridor. The Preliminary Design study is also helpful in efforts to secure State and Federal grants for further design and construction.

Additional trail design will affirm the location of the trail and associated infrastructure and will better define

approximate grading limits, vegetation impacts and needs for any additional right-of-way. The study also provides more detailed cost estimates for the trail and associated infrastructure implementation. Please refer to Appendix L for a general project timeline and additional information regarding the Feasibility Study and Master Plan Amendment.

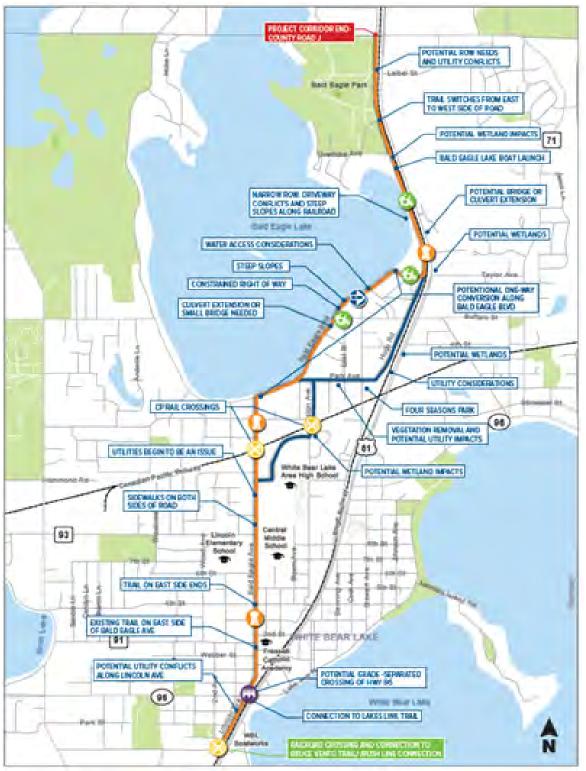

FIGURE 1: Bruce Vento Trail Phase 2 Corridor

# **TRAFFIC STUDY**

A traffic evaluation of the area was completed to determine the traffic impacts of constructing an extension of the Bruce Vento Trail on the preferred alignment including Bald Eagle Avenue, Bald Eagle Boulevard, Taylor Avenue, and Hugo Road in White Bear Township along the southeast shore of Bald Eagle Lake. The high-level traffic study was conducted to evaluate the impacts of the various trail designs on daily traffic volumes and services to the surrounding neighborhood. The report also considers information from the White Bear Lake High School traffic study in developing these evaluations. Multiple roadway designs for Bald Eagle Boulevard were considered for adding the bike trail extension. The designs include:

- Keeping both lanes of vehicle traffic on Bald Eagle Boulevard and using right-of-way to add a trail on either the east or west side of the roadways.
- Closing the northbound/eastbound vehicle lane of Bald Eagle Boulevard and adding the trail on either the east or west side of the roadways.
- Closing the southbound/westbound vehicle lane of Bald Eagle Boulevard and adding a bike lane on either the east or west side of the roadways.

FIGURE 2: Existing Traffic Conditions - Two-way traffic on Bald Eagle Boulevard, Taylor Avenue, and Hugo Road (numbers indicate Average Daily Automobile Traffic)

Year 2016 and 2019 daily traffic volumes were provided by the Minnesota Department of Transportation (MnDOT) for roadways within the study area and are shown in Figure 2. Various impacts on driver behavior, civil services, and/or private properties are associated with each design.

Partially or wholly converting Bald Eagle Boulevard and Taylor Avenue to one-way will have a limited impact on traffic in the area. The forecasted impacts on the vehicle traffic in a one-way northbound scenario are shown in Figure 3. As shown, the bulk of the traffic is expected to divert to Park Avenue and Hugo Road. It is not expected that there will be any significant traffic operational impacts from the lane closure as daily volumes are expected to be well below the daily thresholds for two-lane roadways.

Recommend that one-way vehicular traffic in a north/east direction along Bald Eagle Boulevard and Taylor Avenue be considered as this configuration would lessen the need to relocate mailboxes and trash pickup along Bald Eagle Boulevard and Taylor Avenue to comply with the postal and waste service vehicles.

The full Traffic Memorandum is included in Appendix A.

FIGURE 3: Proposed Traffic Conditions - One-way traffic north/east-bound on Bald Eagle Boulevard east of Park Avenue and Taylor Avenue and Two-way traffic on Hugo Road and Bald Eagle Avenue west of Park Avenue. (numbers indicate Average Daily Automobile Traffic)

# **BALD EAGLE BOULEVARD CROSS SECTION ANALYSIS**

The design team looked at a variety of combinations of cross-section design scenarios along Bald Eagle Boulevard to determine the preferred roadway and trail section for further development of plan alignment and profile. The team considered several factors in developing the Bald Eagle Boulevard sections including the following:

- Hold lake-side curb and adjust house-side curb
- · Hold house-side curb and adjust lake-side curb
- One-way roadway
- Two-way roadway
- Minimum roadway/trail section meeting minimum State Aid Standards
- Ideal roadway/trail section matching previous Bruce Vento Trail segment designs

Combining these factors, the team developed eight representative sections to evaluate further.

These cross-section design scenarios along Bald Eagle Boulevard include the following:

- Two-way ideal, trail right/house side, hold lake edge of pavement
- Two-way ideal, trail left lake side, hold house edge of pavement
- Two-way minimum, trail right/house side, hold lake edge of pavement
- Two-way minimum, trail left/house side, hold house edge of pavement
- One-way ideal, trail right/house side, hold lake edge of pavement
- One-way ideal, trail left/lake side, hold house edge of pavement
- One-way minimum, trail right/house side, hold lake edge of pavement
- One-way minimum, trail left/lake side, hold house edge of pavement

Representative sections and design alternatives are shown in Figures 4, 5 and 6 and Table 1 (next page).

FIGURE 4: One-way roadway with trail on right.

FIGURE 5: Two-way roadway with trail on right.

FIGURE 6: One-way roadway with trail on left.

The cross-section evaluation looked at factors such as grading and constructibility, right-of-way impacts, need for retaining walls, and need for permanent or temporary easements. It also looked at the number of driveway, road, and walk crossings. A summary of this evaluation is shown in Figure 7. The full evaluation matrix is included in Appendix B.

Conclusions derived from the analysis suggest the following:

- Bald Eagle Boulevard between Bald Eagle Avenue and Park Avenue has the most flexibility for alternative typical sections.
- Bald Eagle Boulevard north of Park Avenue is not necessarily limited to a one-way roadway configuration and works best with the trail on the lake side.
- Two-way alternative for Bald Eagle Boulevard north of Park Avenue would have a significant impact on adjacent properties including potential for additional grading, tree removal, additional retaining walls and property acquisitions.
- Small retaining walls, within the road right of way, along Bald Eagle Boulevard may be needed in a one-way configuration to minimize grading.
- For the one-way alternatives temporary grading/

#### TABLE 1: Representative Road/Trail Sections

construction easements may be needed on the lake side to accommodate lake access. However, most grading should occur within the road right of way.

From the public engagement process, the team noted that avoiding permanent easements and additional right-ofway acquisition could likely be achieved with a one-way alternative on Bald Eagle Boulevard North of Park Avenue.

Further input from the public suggested an interest in Taylor Avenue also being a one-way configuration from Bald Eagle Boulevard to Hugo Road.

The suggested design scenario for Bald Eagle Boulevard was identified as a two-way roadway to Park Avenue and then one-way to the north and along Taylor Avenue to Hugo Road.

The study also looked at the potential for a two-way alternative for Bald Eagle Boulevard east of Park Avenue. This alternative resulted in significant impacts to vegetation, existing retaining walls and driveways/other points of property access. In addition there is an existing bridge that would need to be replaced to accommodate the trail and likely need for substantial property acquisitions.

Other sections of the proposed trail corridor (Lincoln Avenue, Bald Eagle Avenue and Hugo Road) required less detailed evaluation and analysis to determine the preferred trail location. These segments are described in the following paragraphs.

TWO-WAY IDEAL	TWO-WAY MINIMUM
6-foot berm	6-foot berm
B618 curb (face at existing pavement edge)	B618 curb (face at existing pavement edge)

TS2	Eliminates													uc																					
TS3	Only a slig																																		

TS4 A slight improvement from TS2, easements still required, benefits don't outweight loss of grassy boulevard

- Better fit in ROW than TS1, temporary easements still required, implements one way and jurisdictional transfer
- TS5 TS6 No improvement from TS5, tempoorary easements still required, no benefits for loss of grassy boulevard Some improvement from TS1 and TS3 but same issues largely remain, only limited temporary easements required TS7

FIGURE 7: Bald Eagle Boulevard Alternatives Analysis

For the segment along Lincoln Avenue (Figure 8), the trail is proposed to be constructed along the east side of the road between the roadway and the adjacent railroad right of way. This will require reconstruction of Lincoln Avenue to narrow/shift the roadway east and is touched on in the Highway 96 crossing discussion in the next chapter. Further evaluation is also needed for the proposed cul-desac at the north end of Lincoln Avenue to avoid property impacts and ensure adequate public safety access.

Along most of Bald Eagle Avenue (Figure 9), there is an existing trail/sidewalk on the east side of the roadway. This facility will be upgraded to provide a consistent trail experience. At the north end of Bald Eagle Avenue where there is not an existing sidewalk/trail. The trail will continue

to be located on the east side of the roadway. The east shoulder of the roadway will be removed, and a new curb placed at the edge of the existing travel lane to provide more space within the existing right of way for the trail and to avoid trees and landscaping impacts.

Based on community input and a challenging right-of-way situation both one-way and two-way alternatives were evaluated. Bald Eagle Boulevard (Bald Eagle Avenue to Park Avenue) maintains two-way with the trail on the lake side. From Park Avenue to Taylor Avenue, the scenario is a one-way with the trail on the lake side. Taylor Avenue is one-way with trail on north side. Hugo Road in both design scenarios has the trail located on the east side between Hugo Road and the railroad tracks.

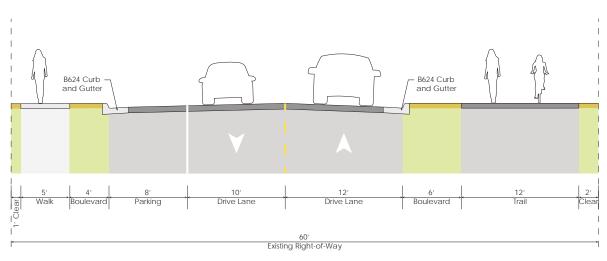

FIGURE 8: Lincoln Avenue Proposed Section.

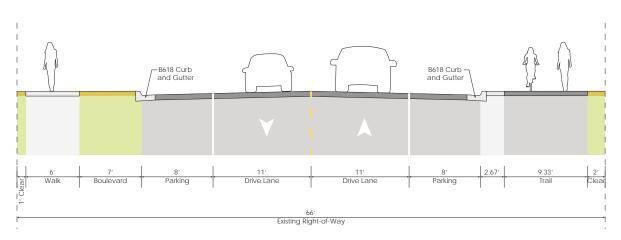

FIGURE 9: Bald Eagle Avenue, Highway 96 to White Bear Lake High School Proposed Section.

# **HIGHWAY 96 CROSSING ALTERNATIVES**

Most of the roadway crossings in the corridor are minor (low volume, low speed, and two lanes). However, the crossing of Highway 96 is a bit more challenging due to high speed, high volume, and multiple lanes. For this reason, additional evaluation of this crossing was provided. The team looked at three alternatives:

- Underpass
- Pedestrian Bridge
- At-grade Crossing

The underpass alternative is challenged by a high-water table and the proximity of the BNSF Railroad corridor and was quickly dismissed.

Several alternatives were developed for a pedestrian bridge over Highway 96.

Another alternative was looked at for an at-grade crossing of Highway 96 at the intersection with Highway 61.

The pedestrian bridges do provide a safe alternative for crossing Highway 96. However, they also are very expensive and have the following specific constraints:

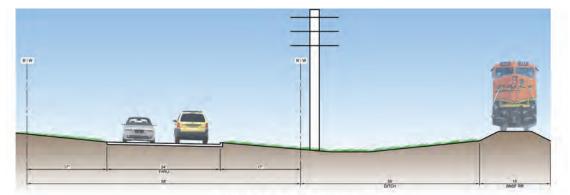

- Creates circuitous route for access to the bridge from existing trails and sidewalks along Highway 96
- Conflict with existing overhead utilities (see Figure 10)
- Would require the acquisition of business property on the south side of Highway 96

Layouts of the pedestrian bridge alternatives are included in Appendix C.

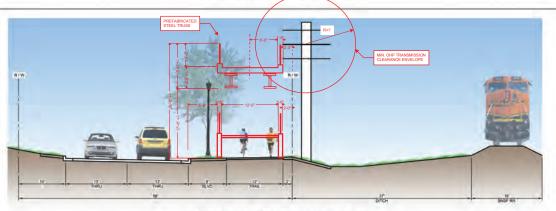

An at-grade crossing can be made relatively safe and is generally much less expensive that a pedestrian bridge. The specific crossing here presents the following opportunities.

- Makes use of an existing traffic signal
- MnDOT initiating intersection improvements
- Minimal conflicts with utilities

For these reasons, it was determined to go forward with an at-grade crossing approach until trail use warrants the construction of a pedestrian bridge. While the at-grade alternative is proposed at this time, additional evaluation is needed to minimize impacts to adjacent properties and facilitate adequate public safety access (see Figures 11 and 12 next page).

LINCOLN AVE - EXISTING CONDITION

LINCOLN AVE - POTENTIAL IMPROVEMENTS

FIGURE 10: Representative Utility Conflicts with Pedestrian Bridge at Lincoln Avenue

FIGURE 11: Concept Trail and Roadway Configuration at Lincoln Avenue from Master Plan Amendment

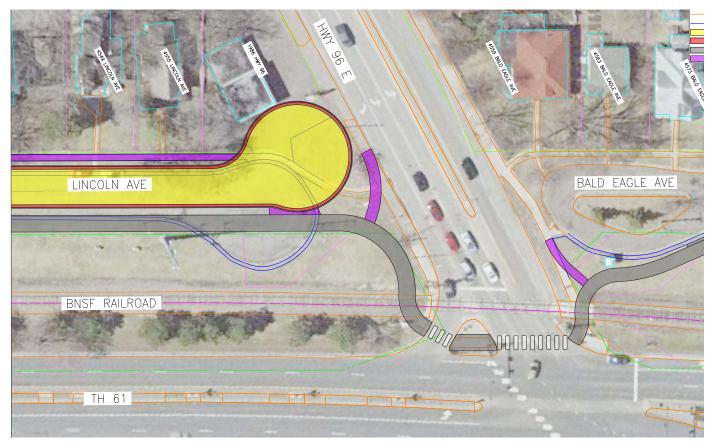

FIGURE 12: Proposed Highway 96 At-Grade Crossing

### **DRAINAGE STUDY**

The Bruce Vento Regional Trail Phase 2 project is located in two watershed organizations (Rice Creek Watershed District and Vadnais Lake Area Watershed Management Organization). This makes addressing stormwater requirements somewhat challenging as requirements between jurisdictions often differ.

The design team looked at the requirements of all jurisdictions to determine the most restrictive requirements.

To address Permitting requirements of various agencies the study looked at the following and identified potential locations for mitigation facilities:

- Rate Control
- Volume Control
- Water Quality
- Groundwater
- Floodplain impacts
- Wetland impacts

In the VLAMO jurisdiction the plan identifies the following potential locations:

- Basin South of Lincoln Avenue
- Basin just north of Highway 96
- Basin near White Bear Lake High School
- Basin near Canadian Pacific Railroad Tracks

The locations are indicated in red circles in Figure 13.

In the RCWD jurisdiction the plan identifies the following potential locations:

- Basin near White Bear Lake High School
- Basin near Canadian Pacific Railroad Tracks
- No BMPs proposed along Bald Eagle Blvd segment
- Potential for structural pretreatment at existing discharge points
- Two options for basins at Bald Eagle Boat Launch

These locations are indicated by the circles and squares in Figure 14.

The full drainage study is attached as Appendix D.

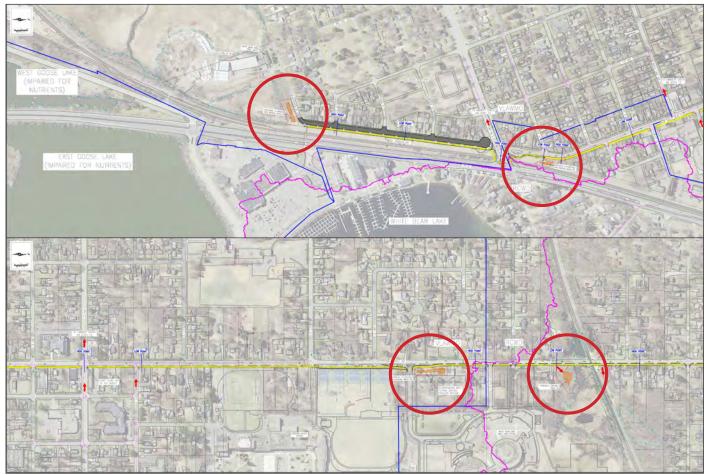

FIGURE 13: Suggested Best Management Plan (BMP) locations in the Vadnais Lake Area Water Management Organization (VLAWMO

FIGURE 14: Suggested Best Management Practices (BMP) Locations in the Rice Creek Watershed District.

# PLANS AND SECTIONS

Based on the information and analysis presented previously, the design team developed several alternate layouts. All the designs are the same for each alternate until they reach Hugo Road and include:

- Trail on the east side of Lincoln Avenue and Bald Eagle Avenue.
- Two-way roadway and trail along the lake side of Bald Eagle Boulevard to Park Avenue.
- One-way roadway and trail along the lake side of Bald Eagle Boulevard from Park Avenue to Taylor Avenue.
- One-way roadway and trail along the north side of Taylor Avenue from Bald Eagle Boulevard to Hugo Road.

In addition, a two-way roadway along the entire segment was also analyzed, but would have greatly impacted the corridor. The alternates differ in their approach to Hugo Road.

Alternate A – Two-way roadway for Hugo Road; Sidewalk on the east side; No parking.

Alternate B – Two-way roadway for Hugo Road; Trail on the east side; No parking.

Alternate C – One-way roadway for Hugo Road; Trail on the east side; Parking bay.

Alternate D – Two-way roadway for Hugo Road; Trail on the east side, No parking; railroad impacts.

Plans and cross-sections were prepared for Alternates C and D which suggest a one-way and two-way section at the pinch point along Hugo Road.

In addition, the study also looked at the potential costs and impact of a two-way trail from Park Avenue to Hugo Road.

Plan sheets are included in the following pages. Crosssections are included in Appendix E.

### Preferred Alignment with One-Way Roadway on Hugo Road at Pinch Point

The following 35 pages include concept plans for trail concept with a one-way roadway on Hugo Road and a one-way roadway on Bald Eagle Boulevard from Park Avenue to Taylor Avenue. Figure 15 shows a conceptual section of the proposed trail placement along Hugo Road at the pinch point location.

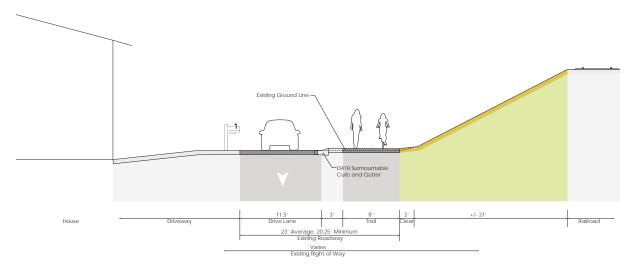

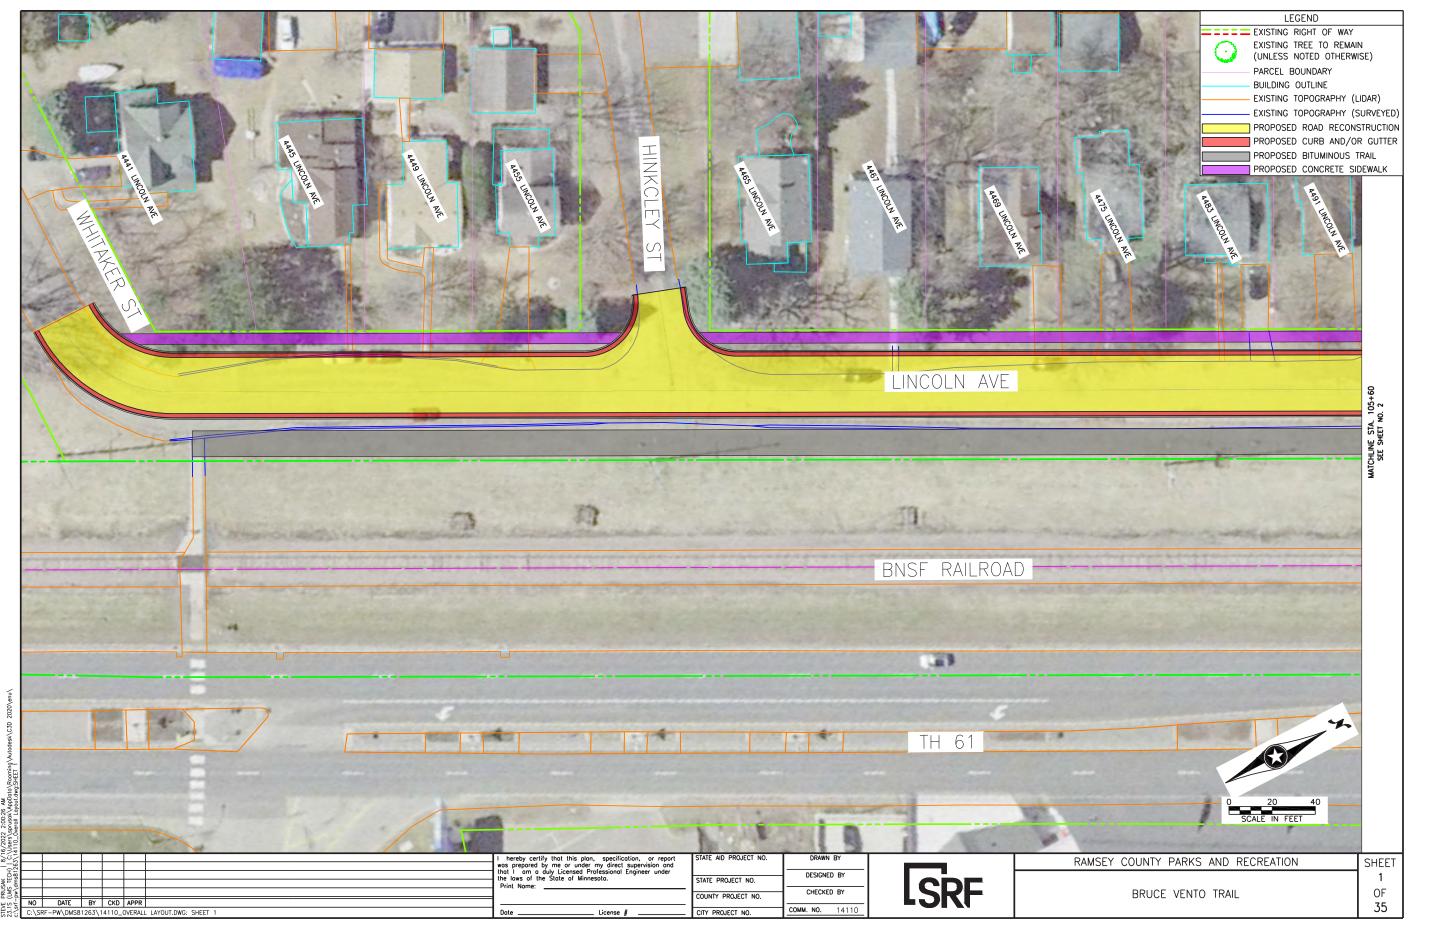

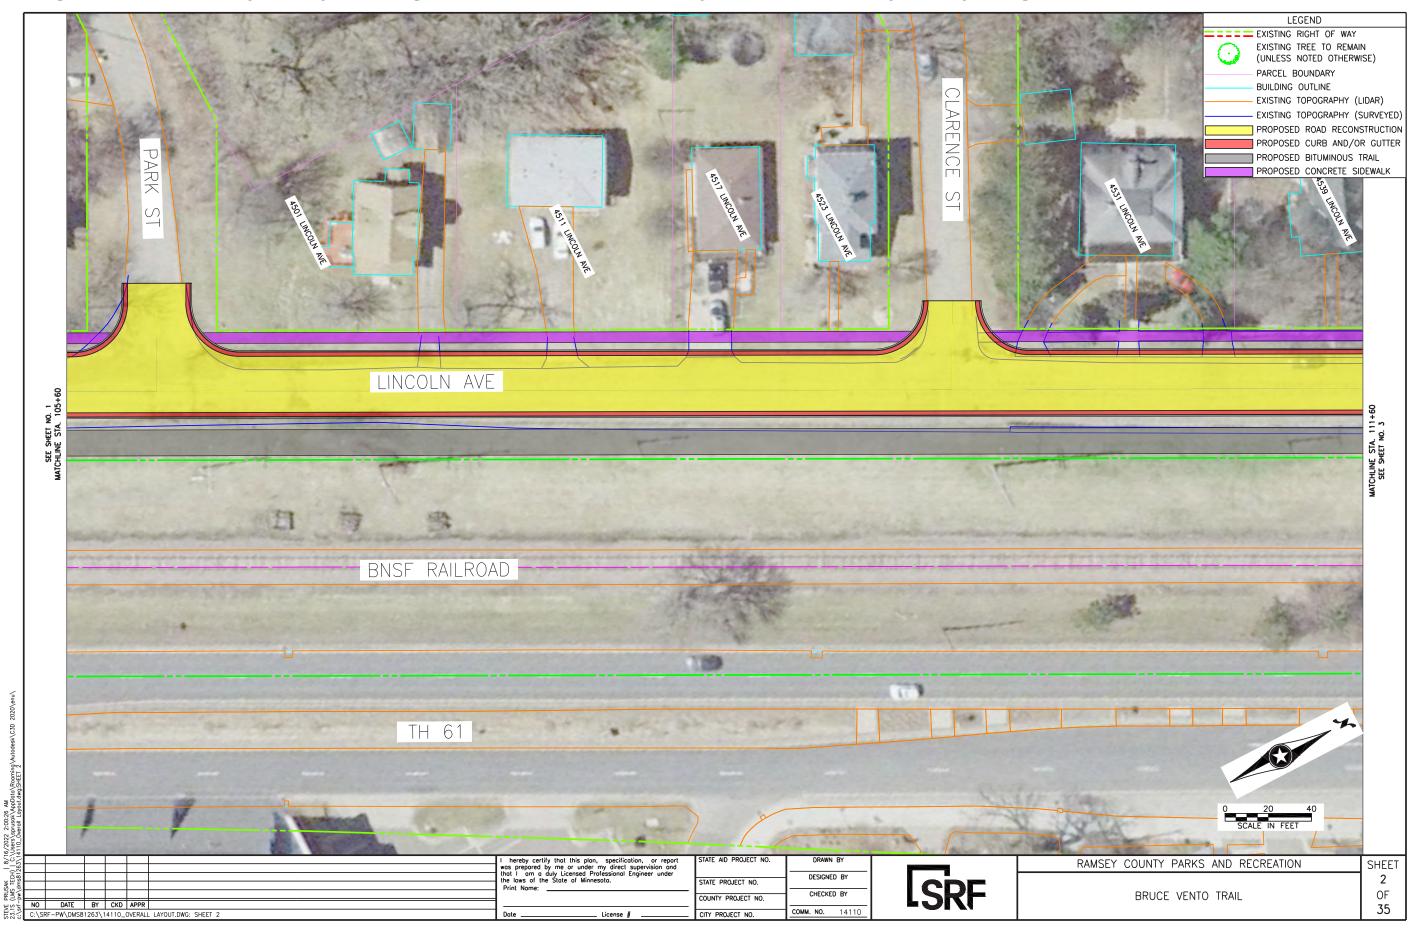

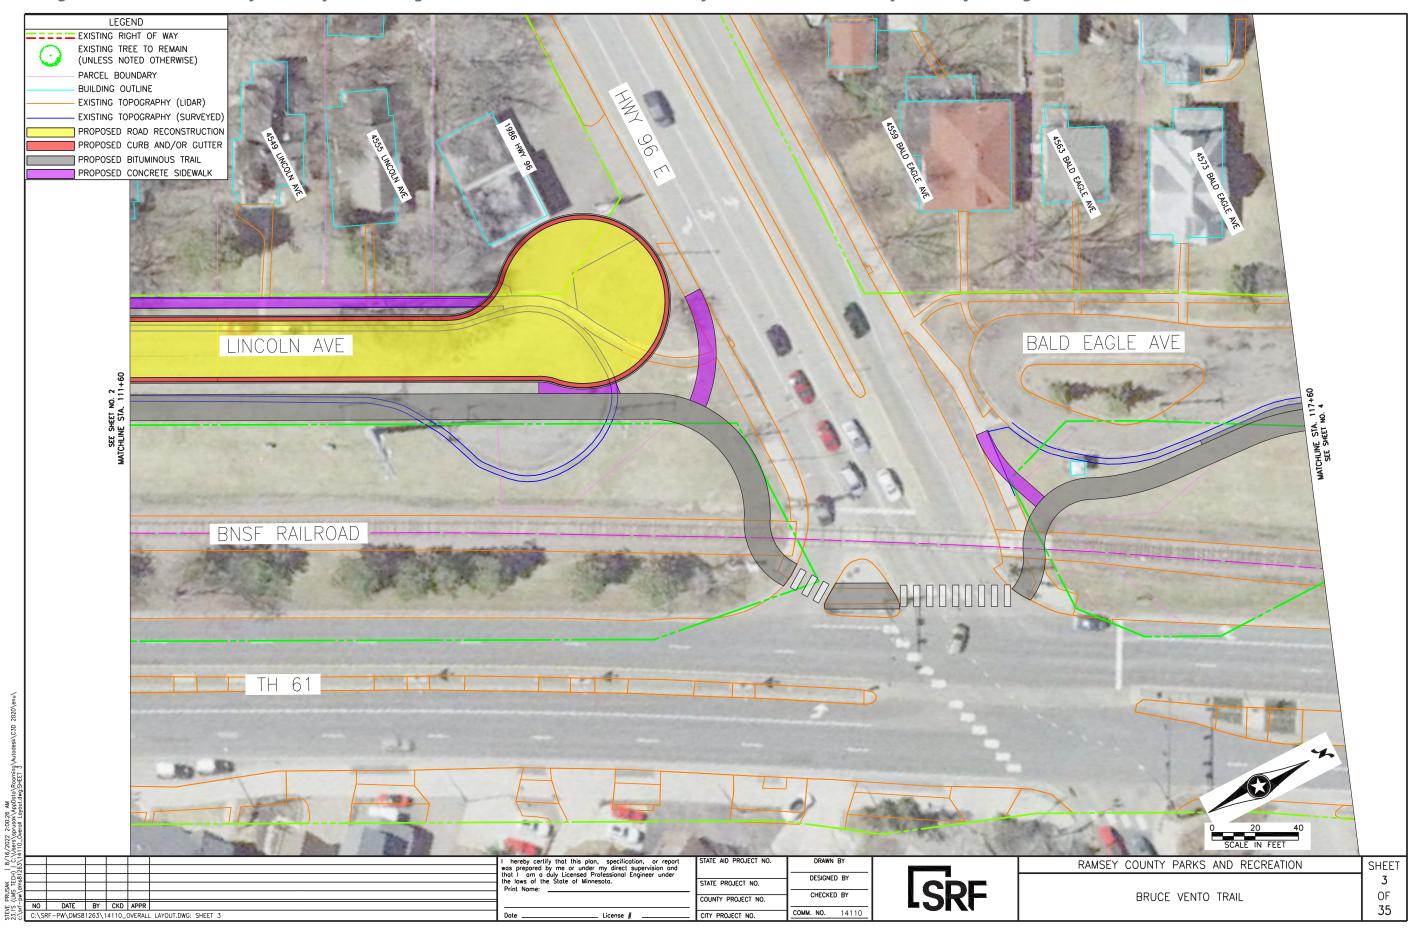

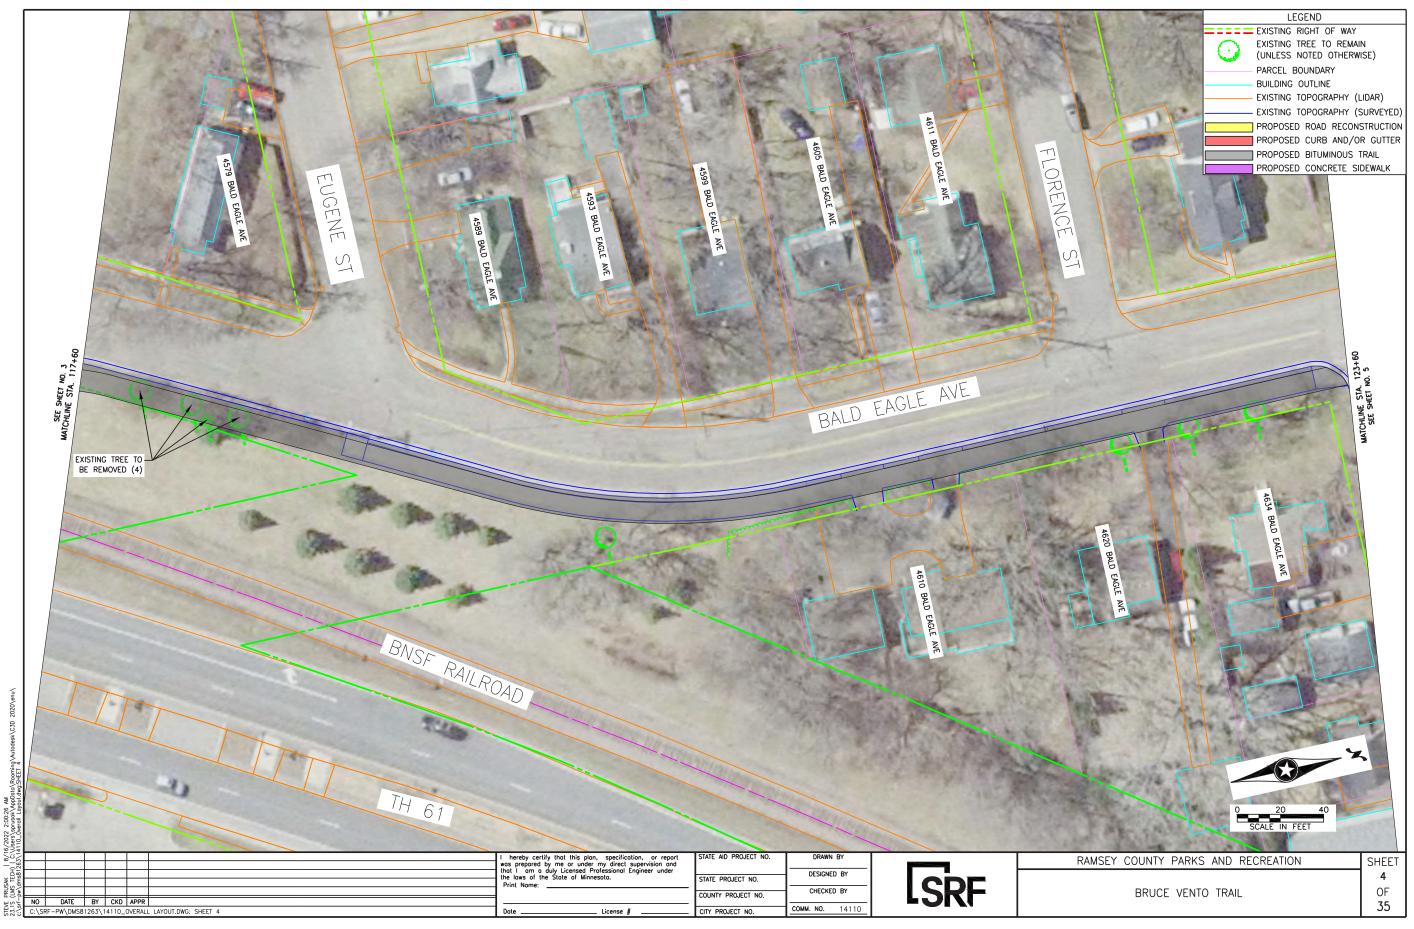

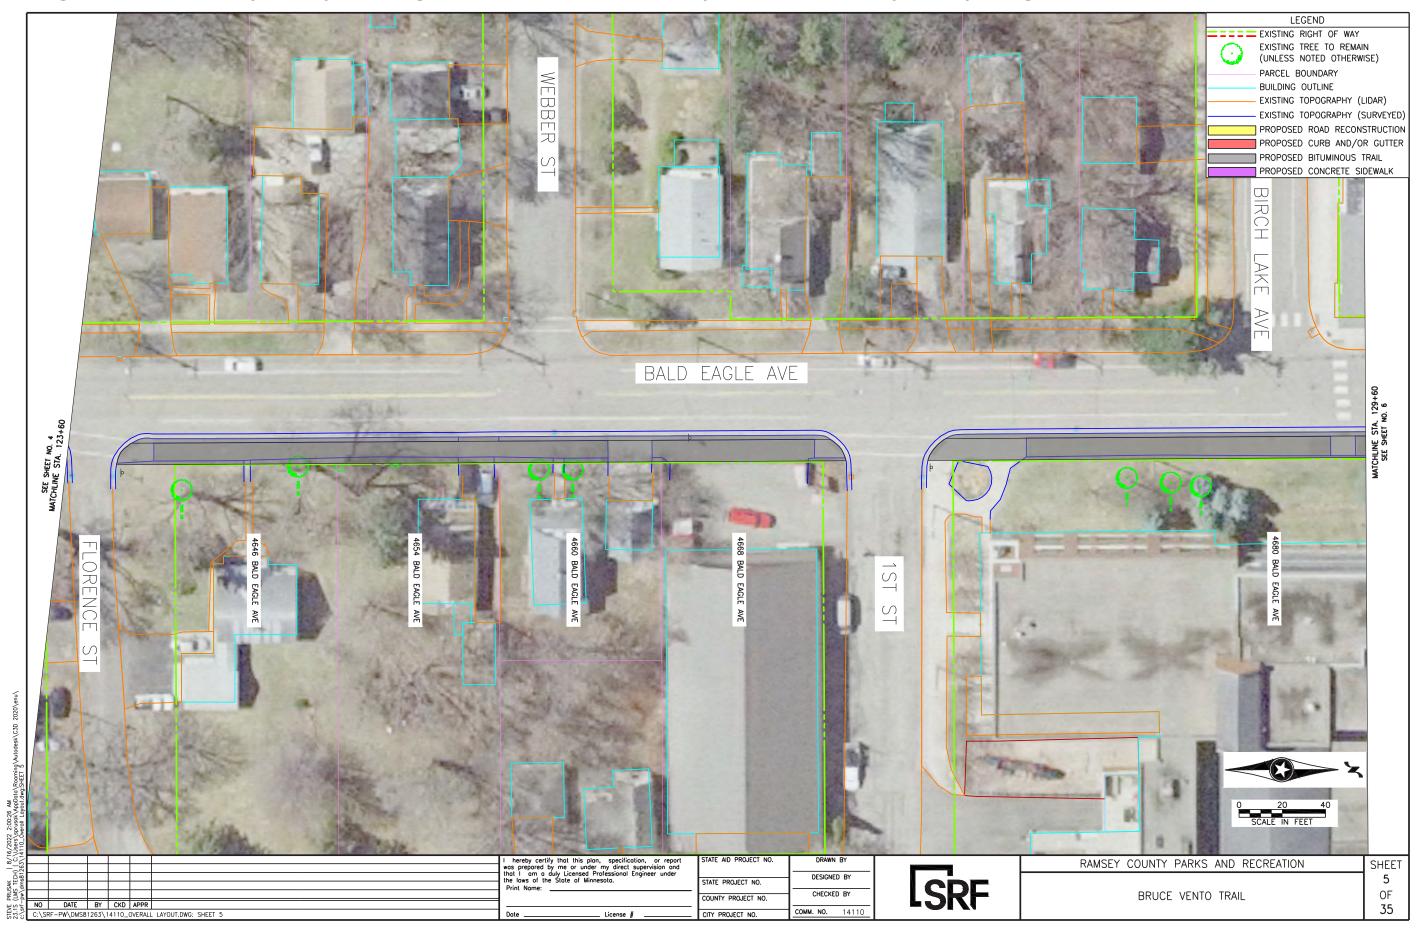

FIGURE 15: One-Way Roadway on Hugo Road at Pinch Point Section.

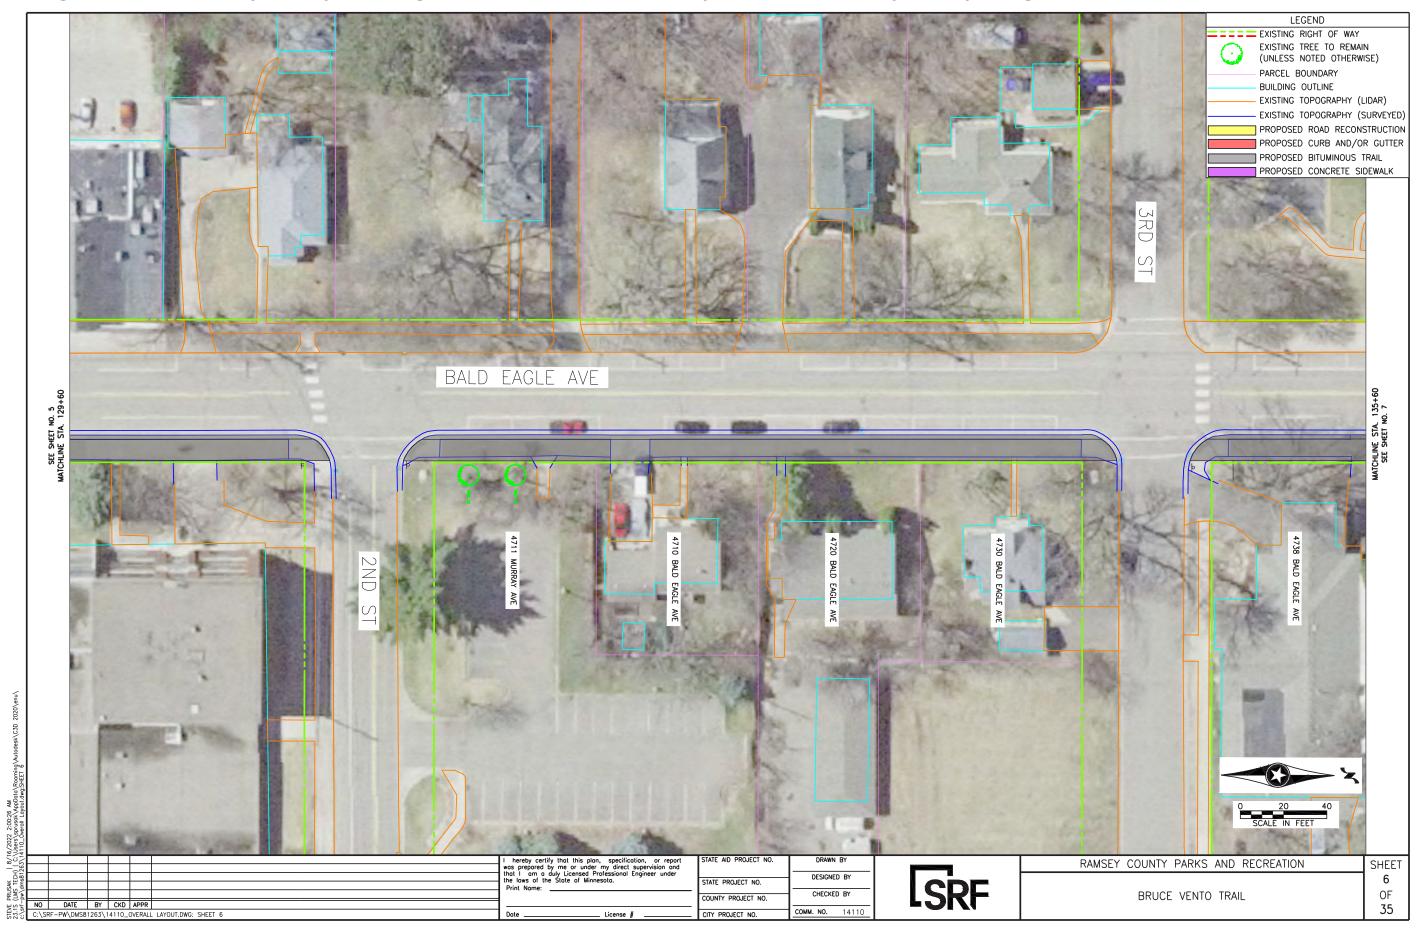

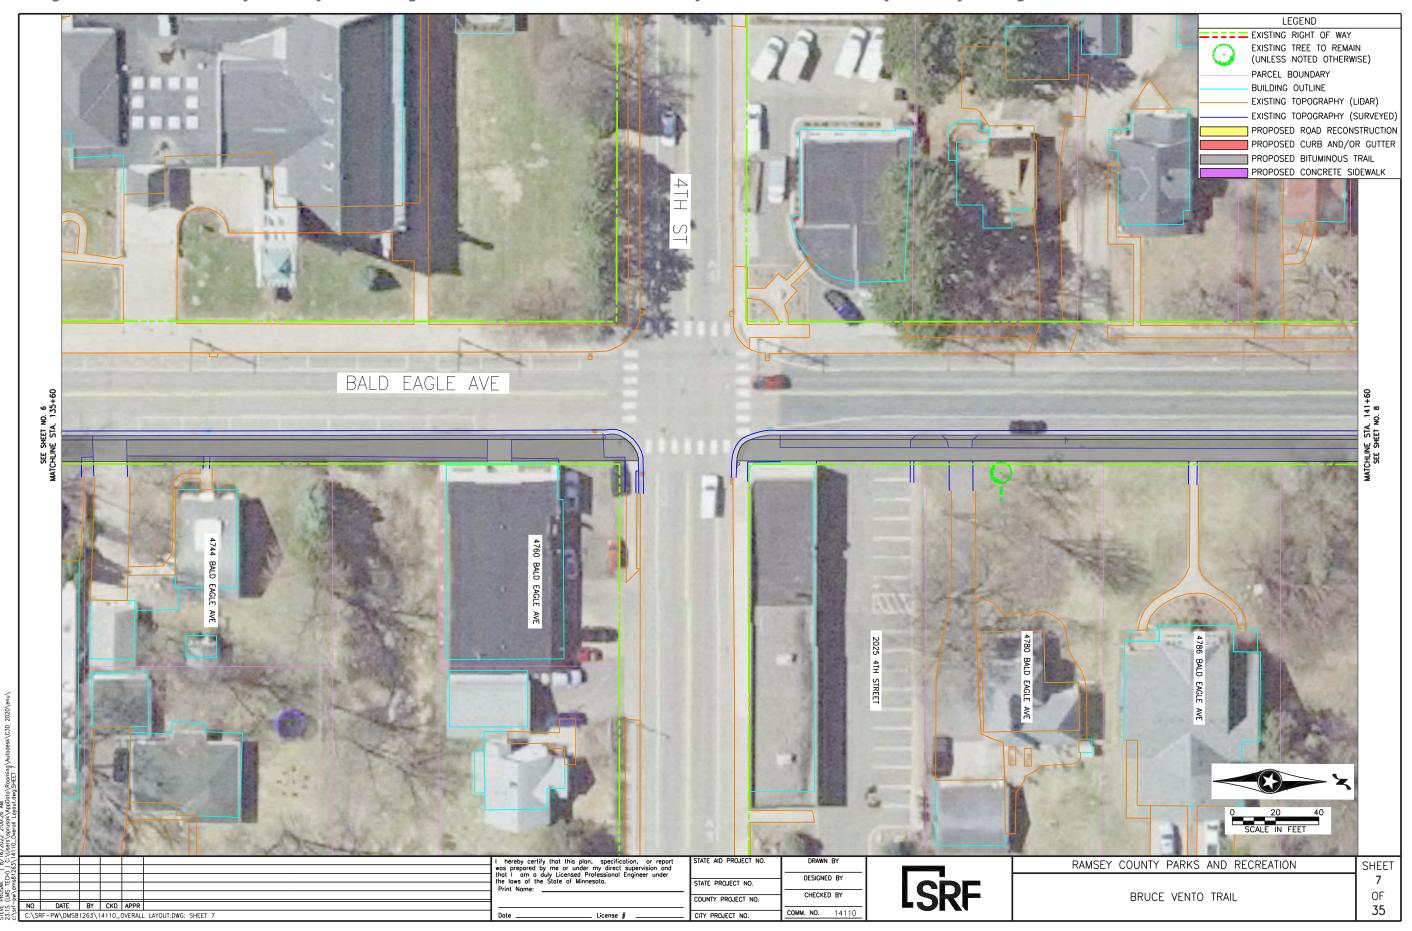

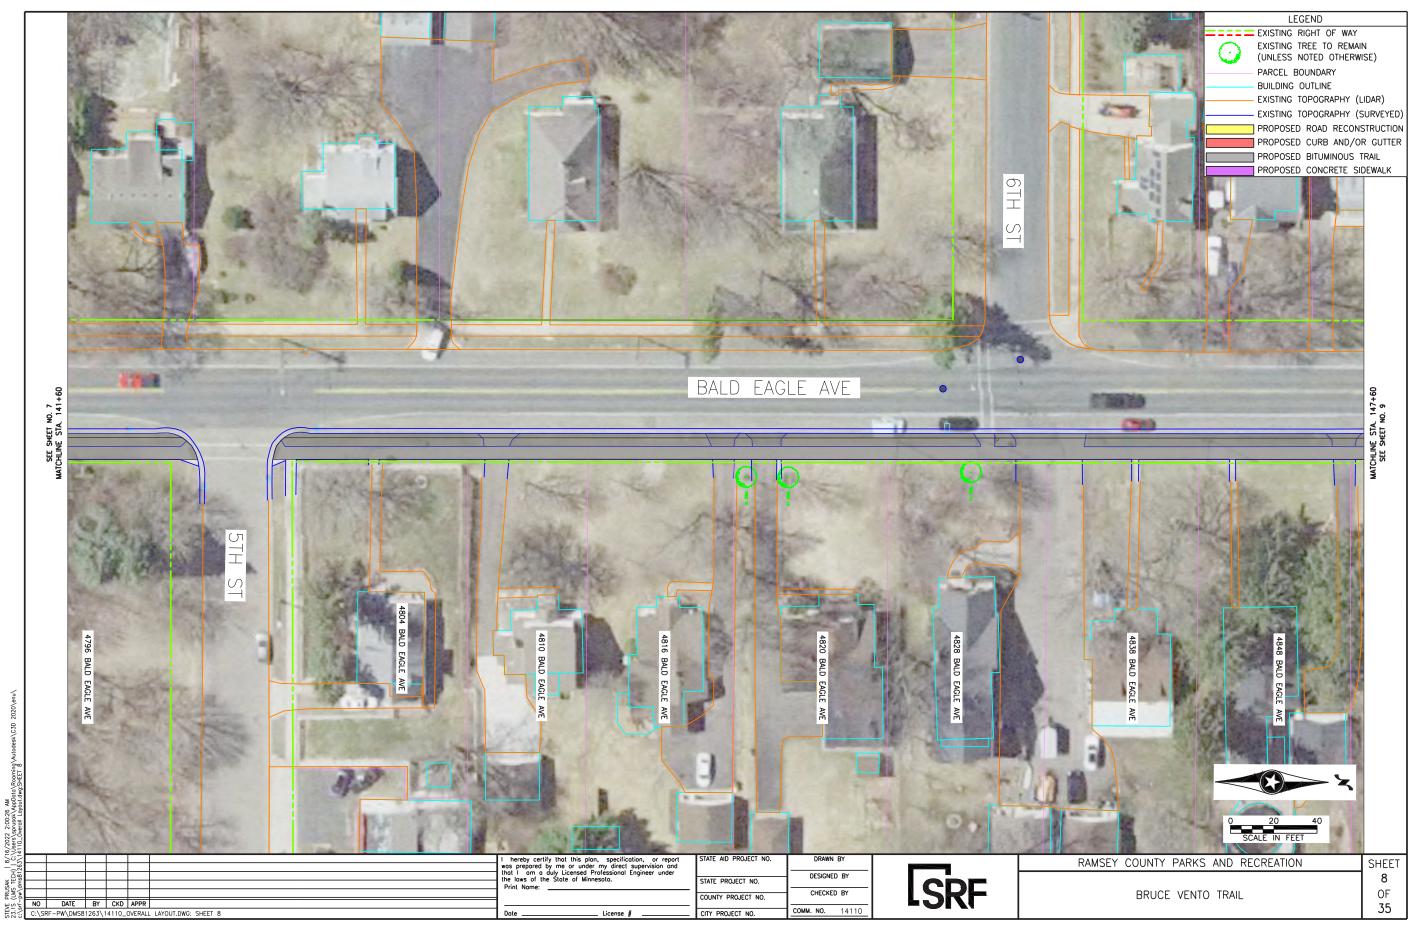

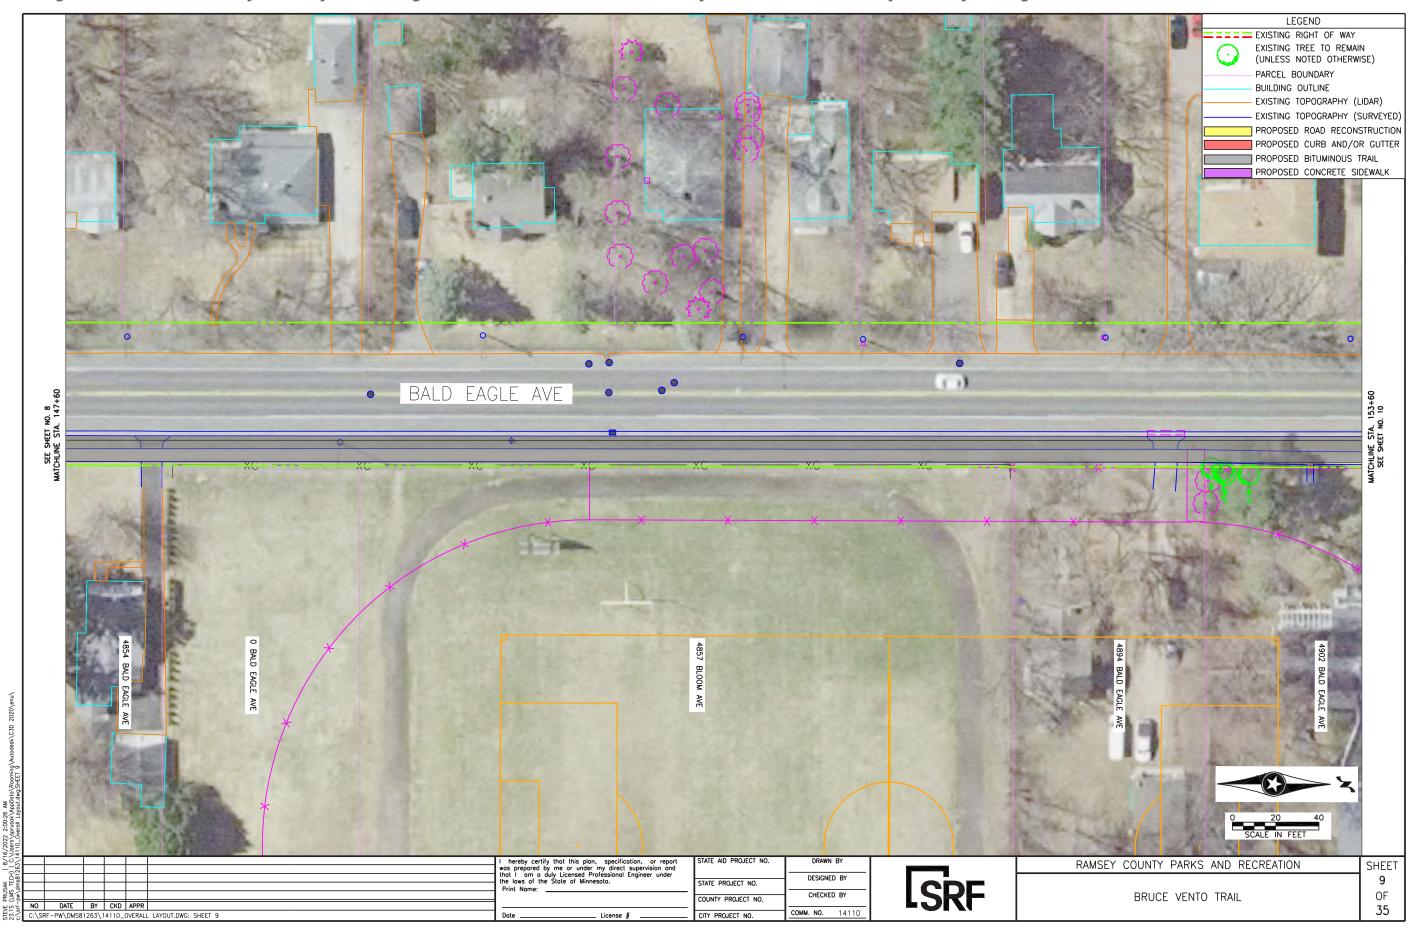

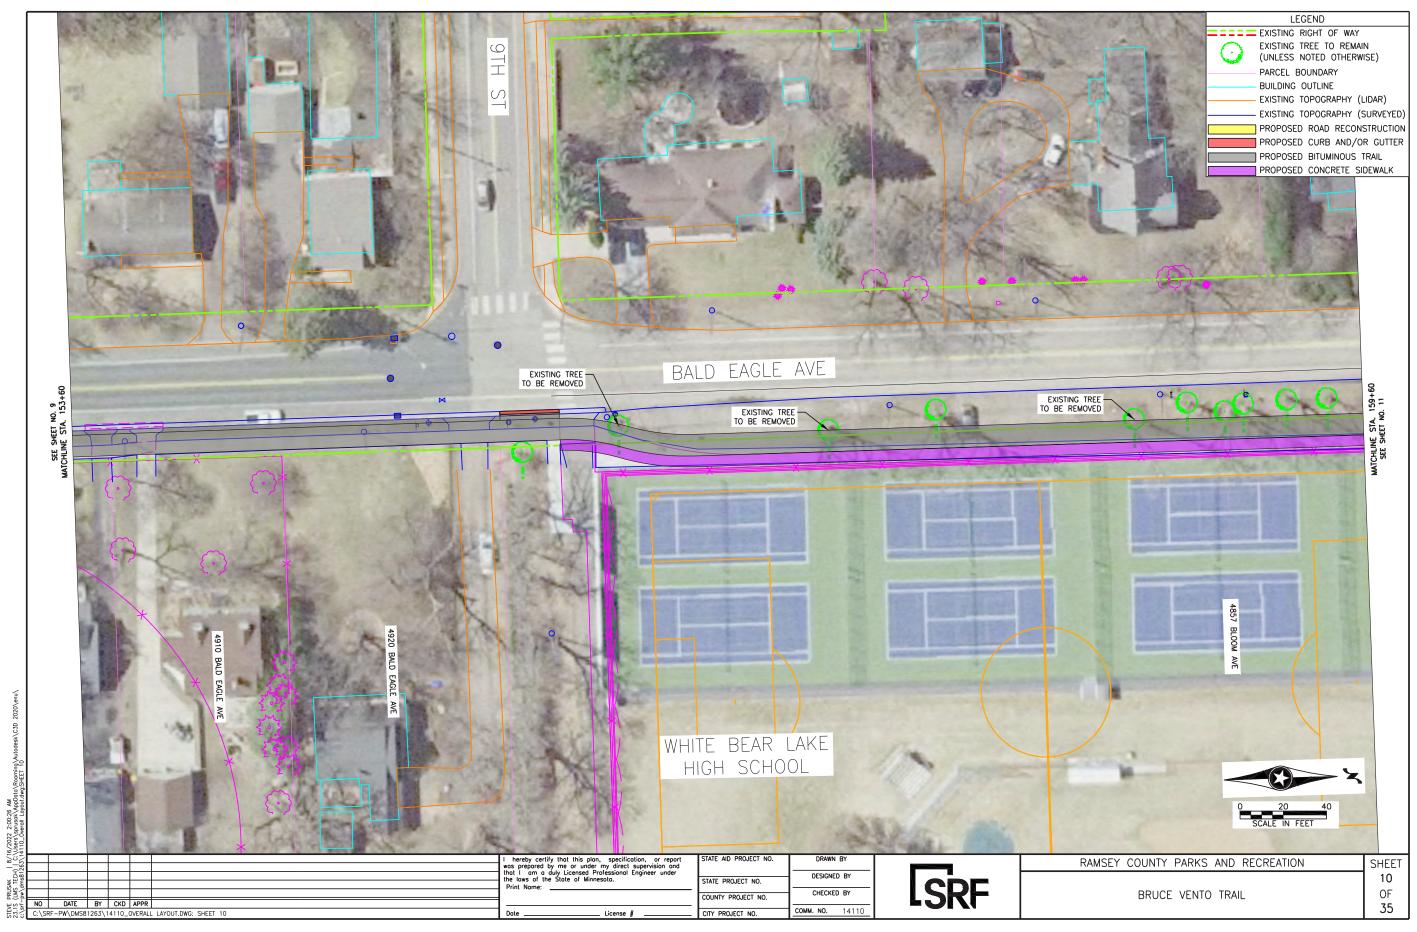

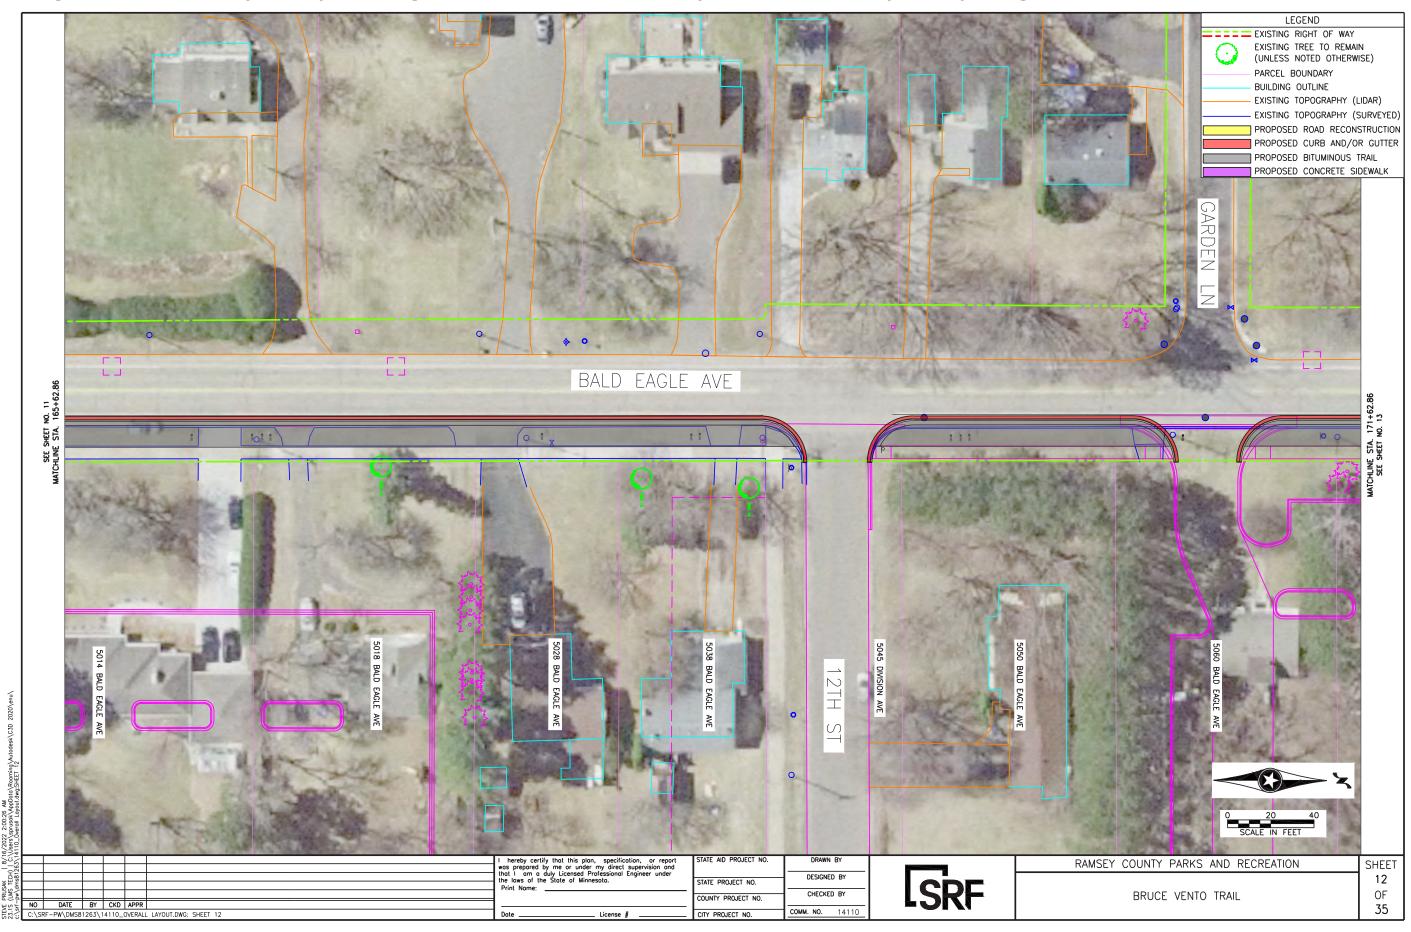

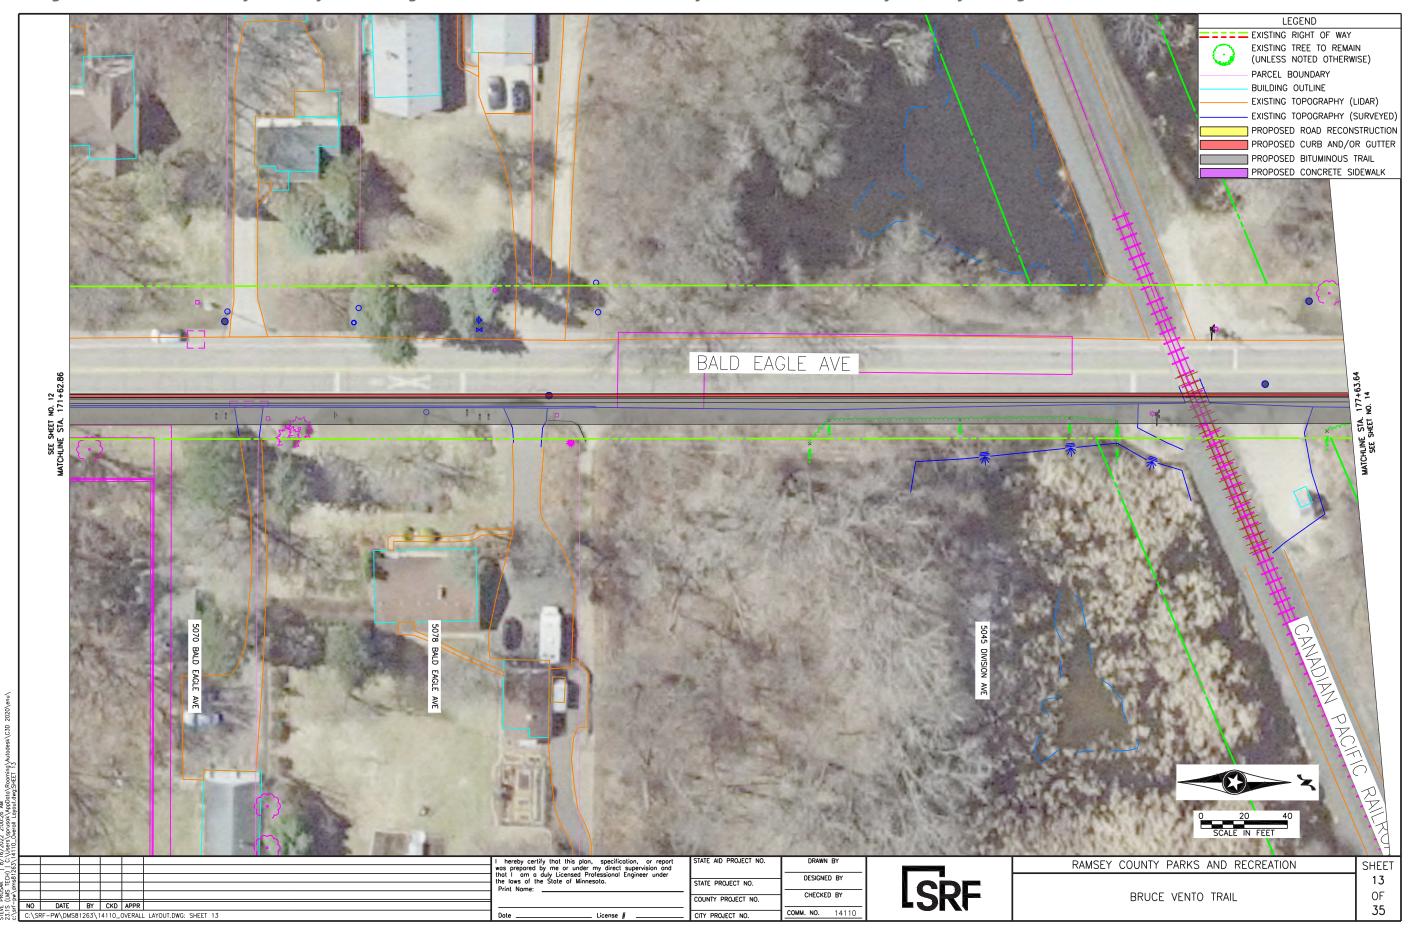

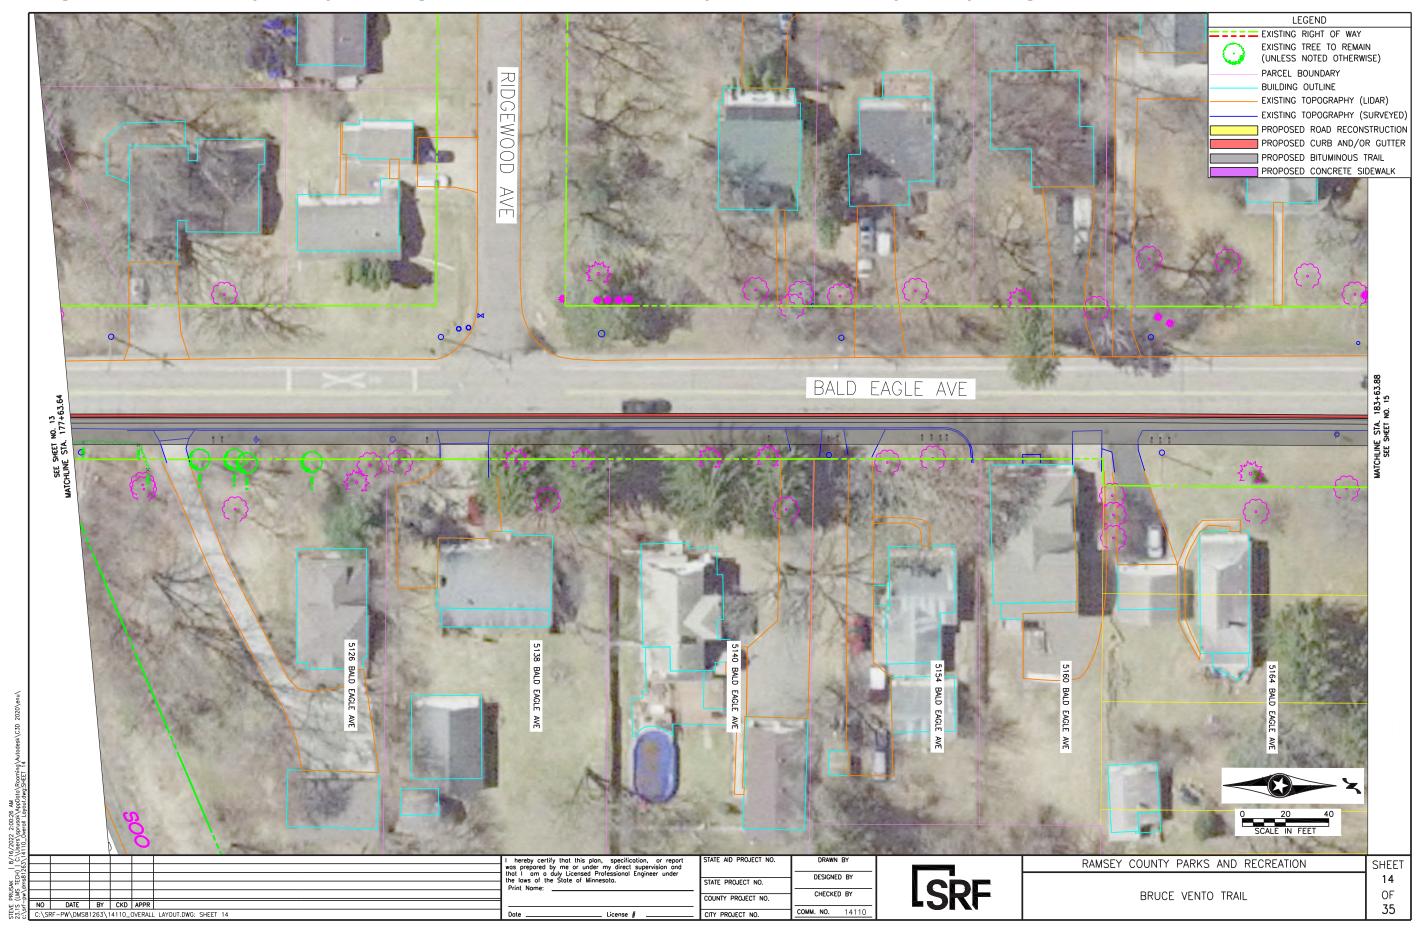

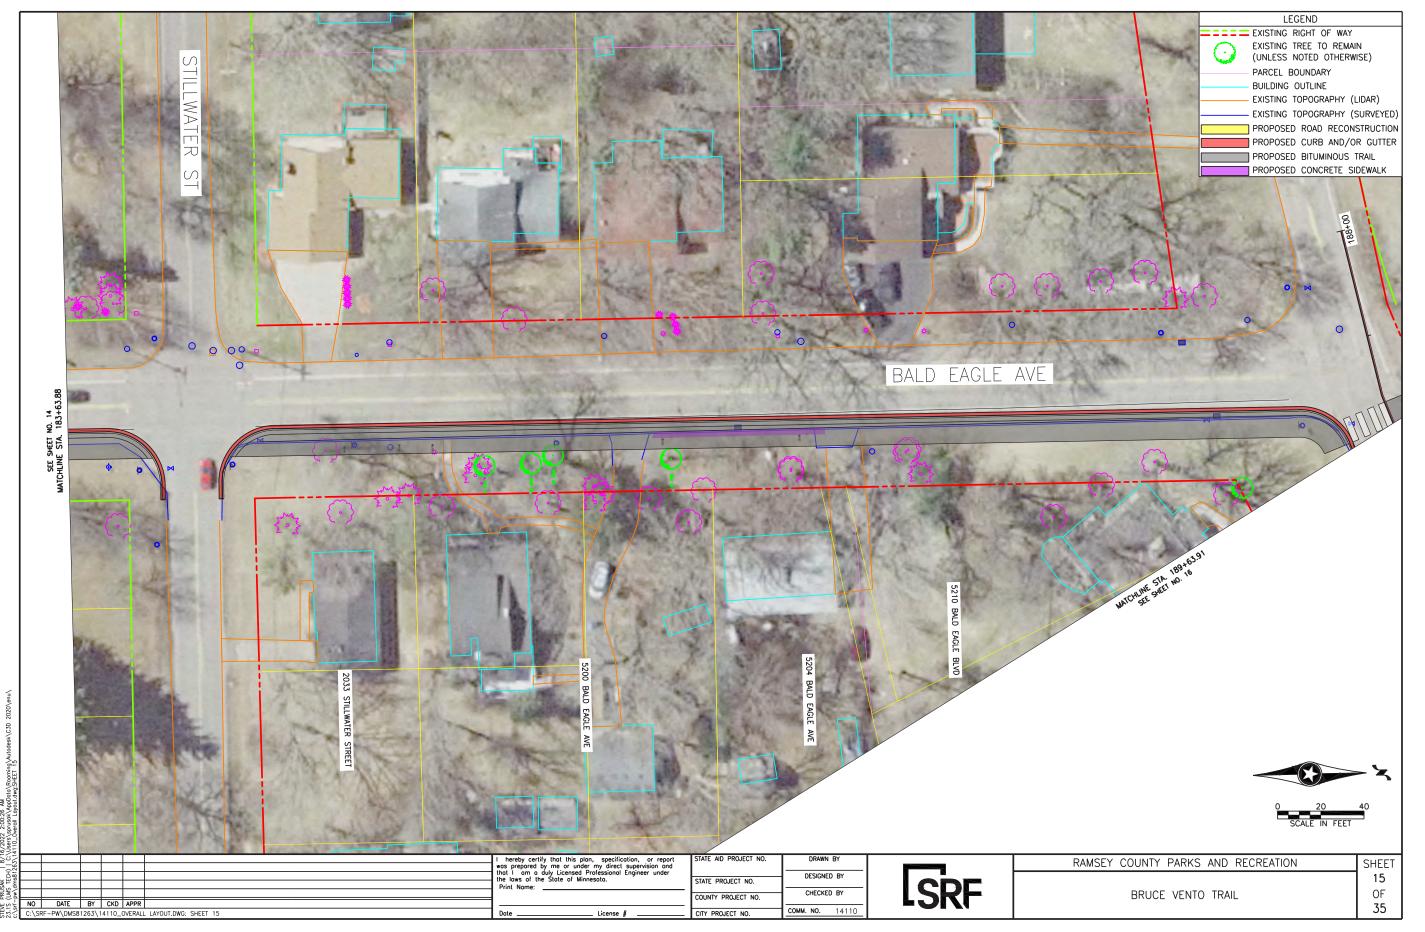

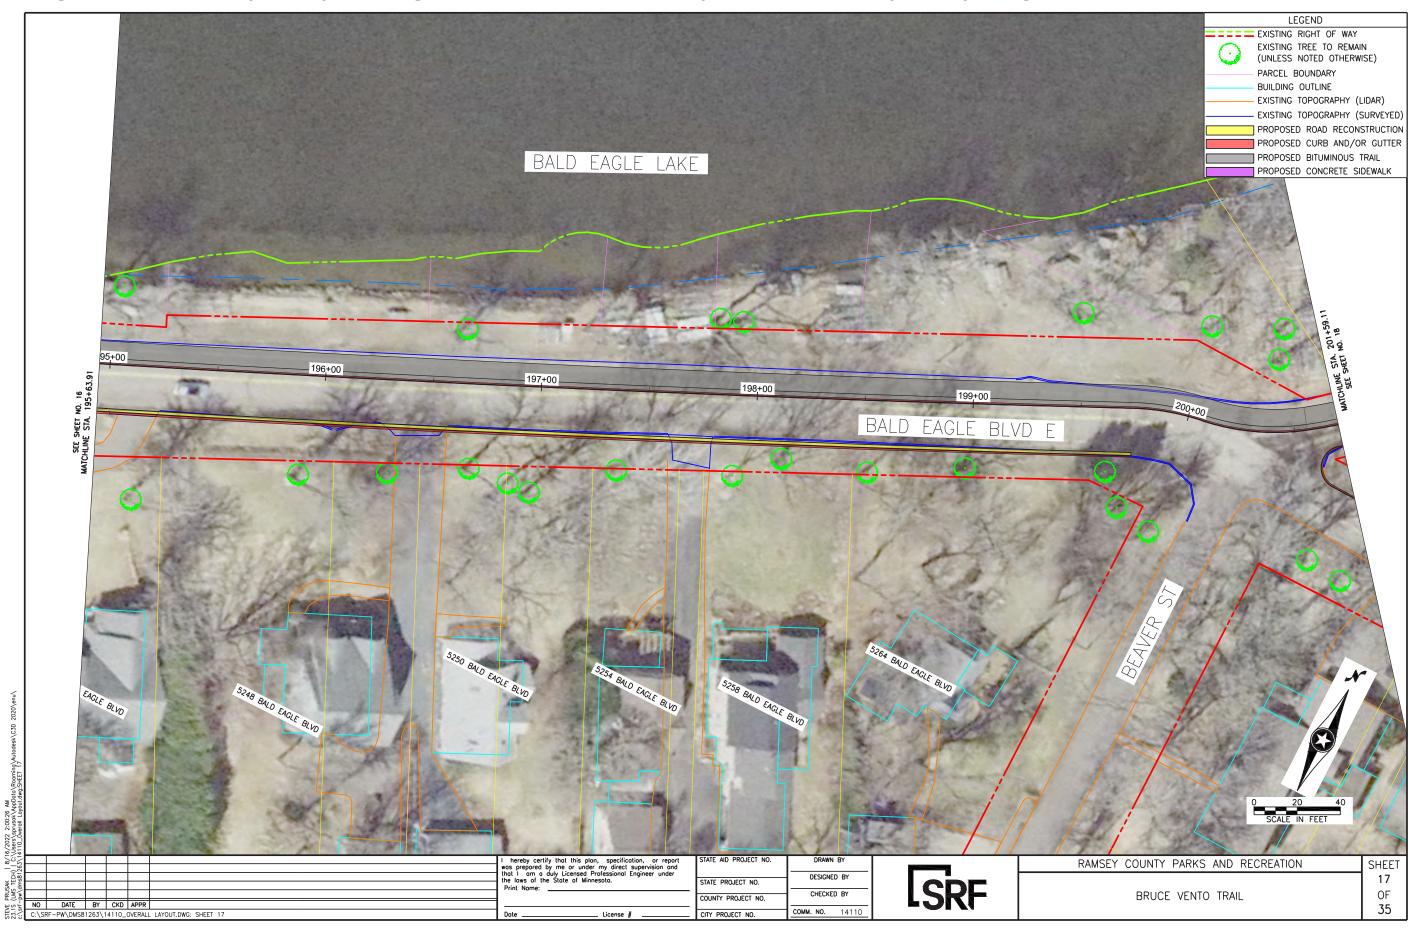

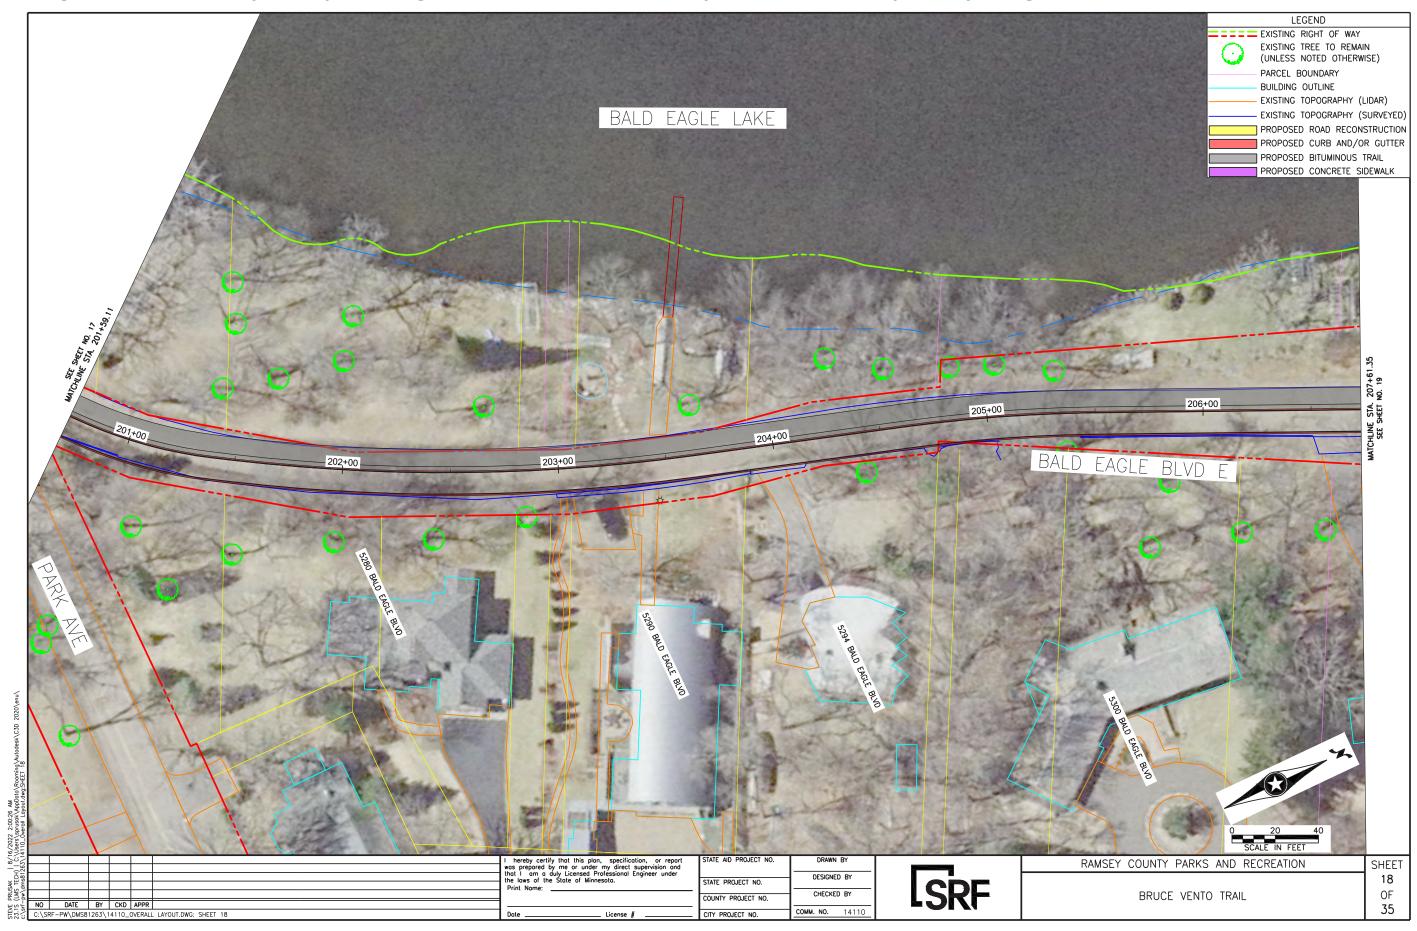

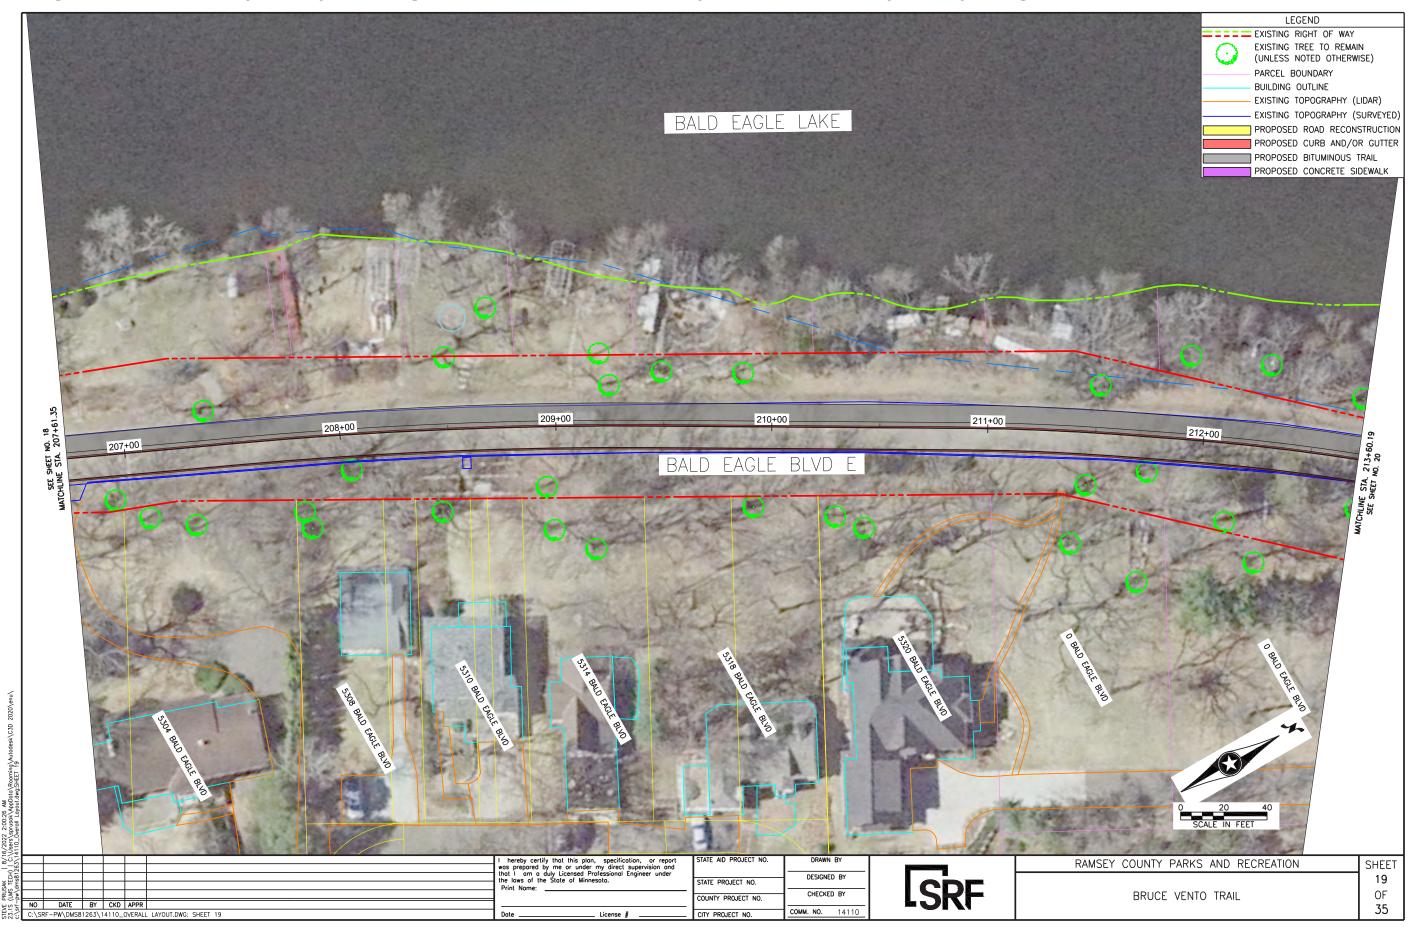

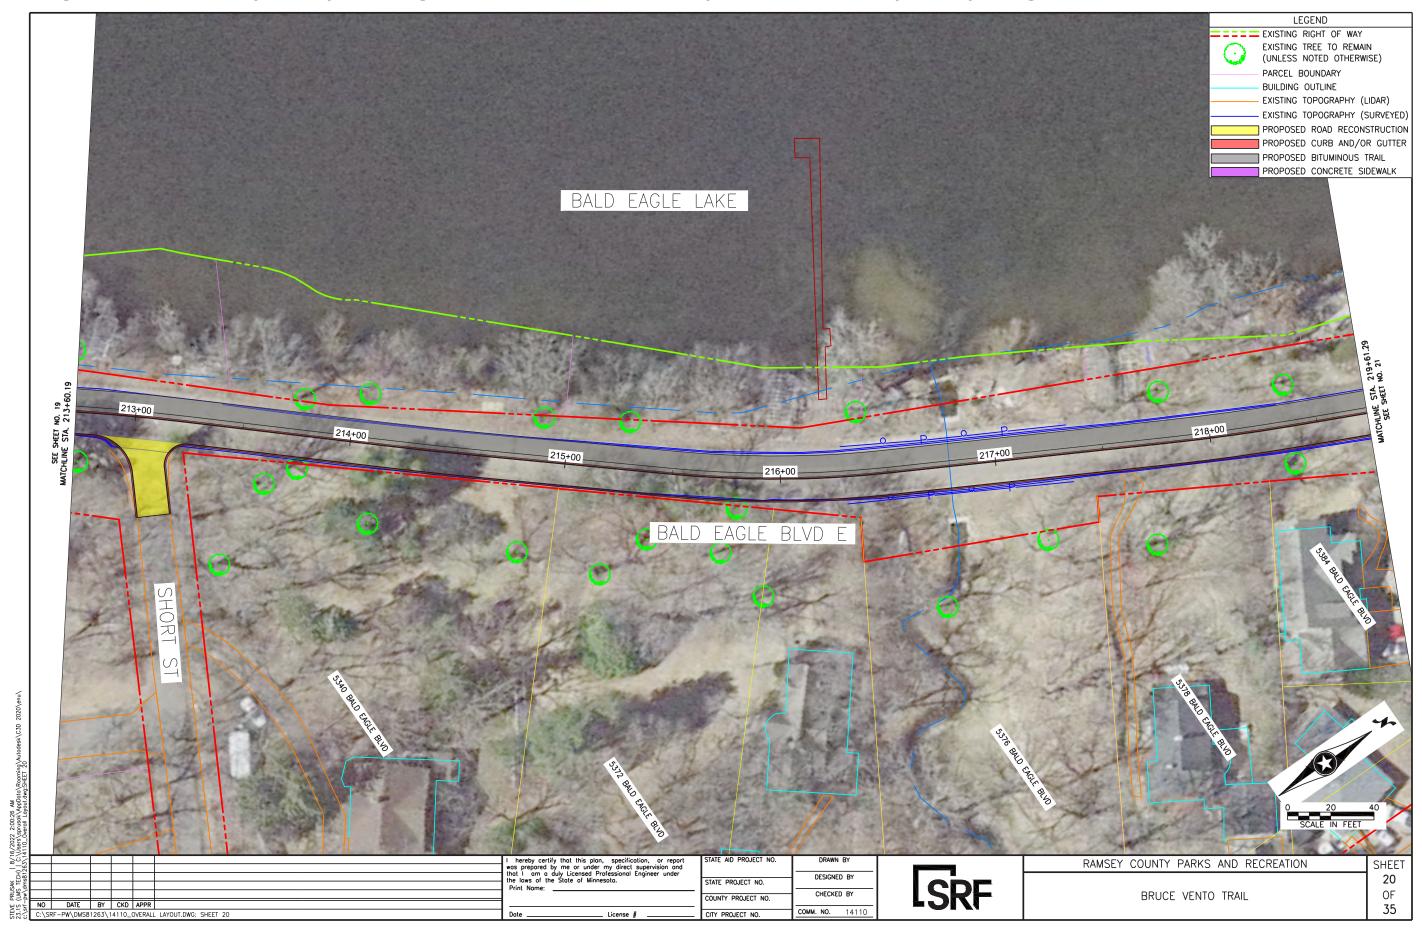

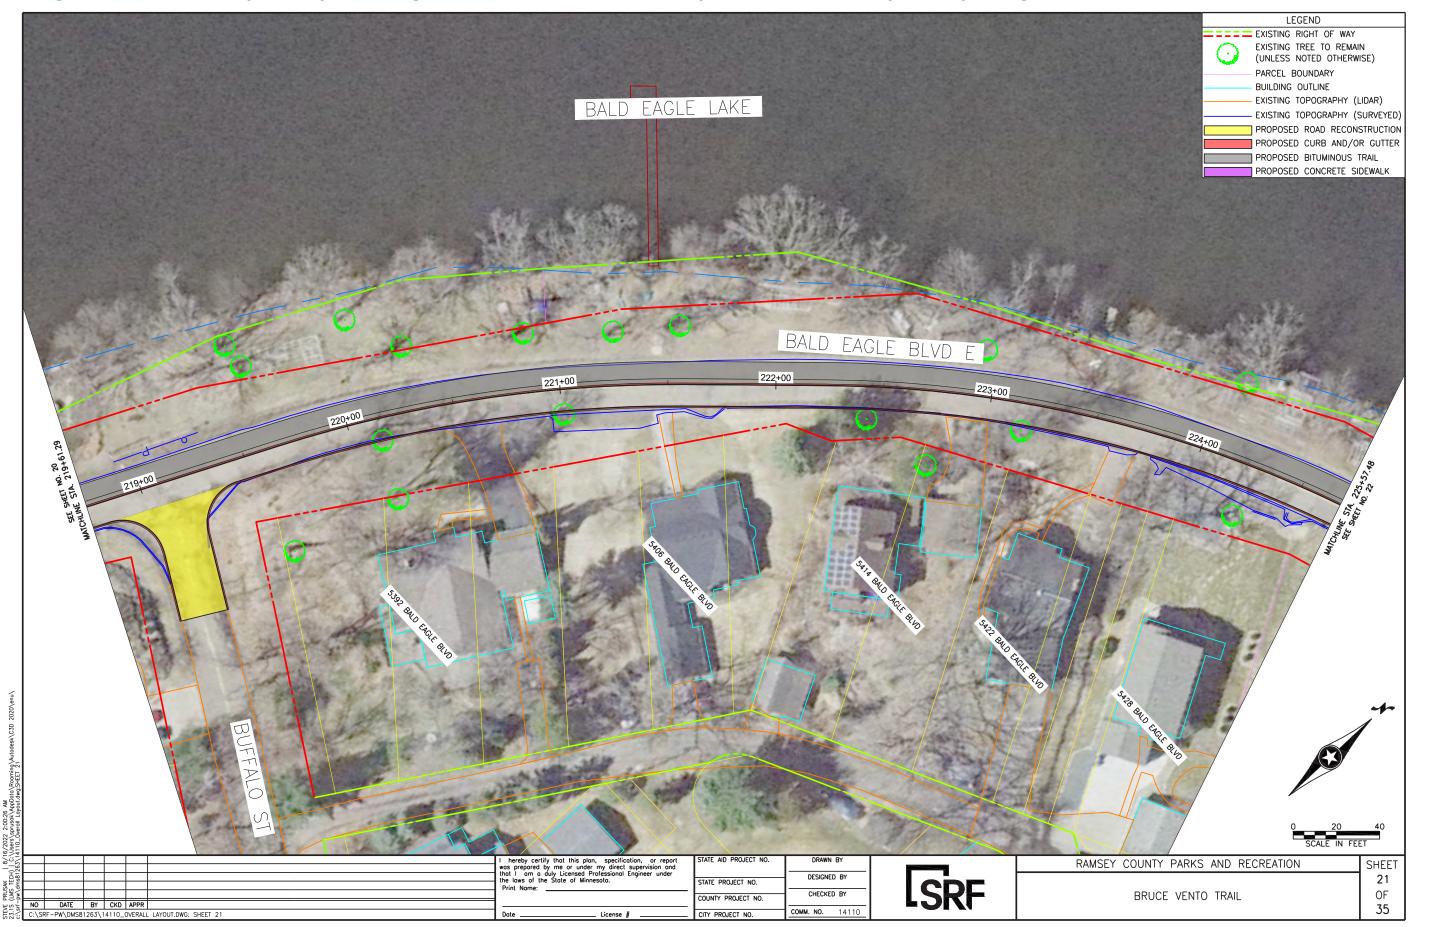

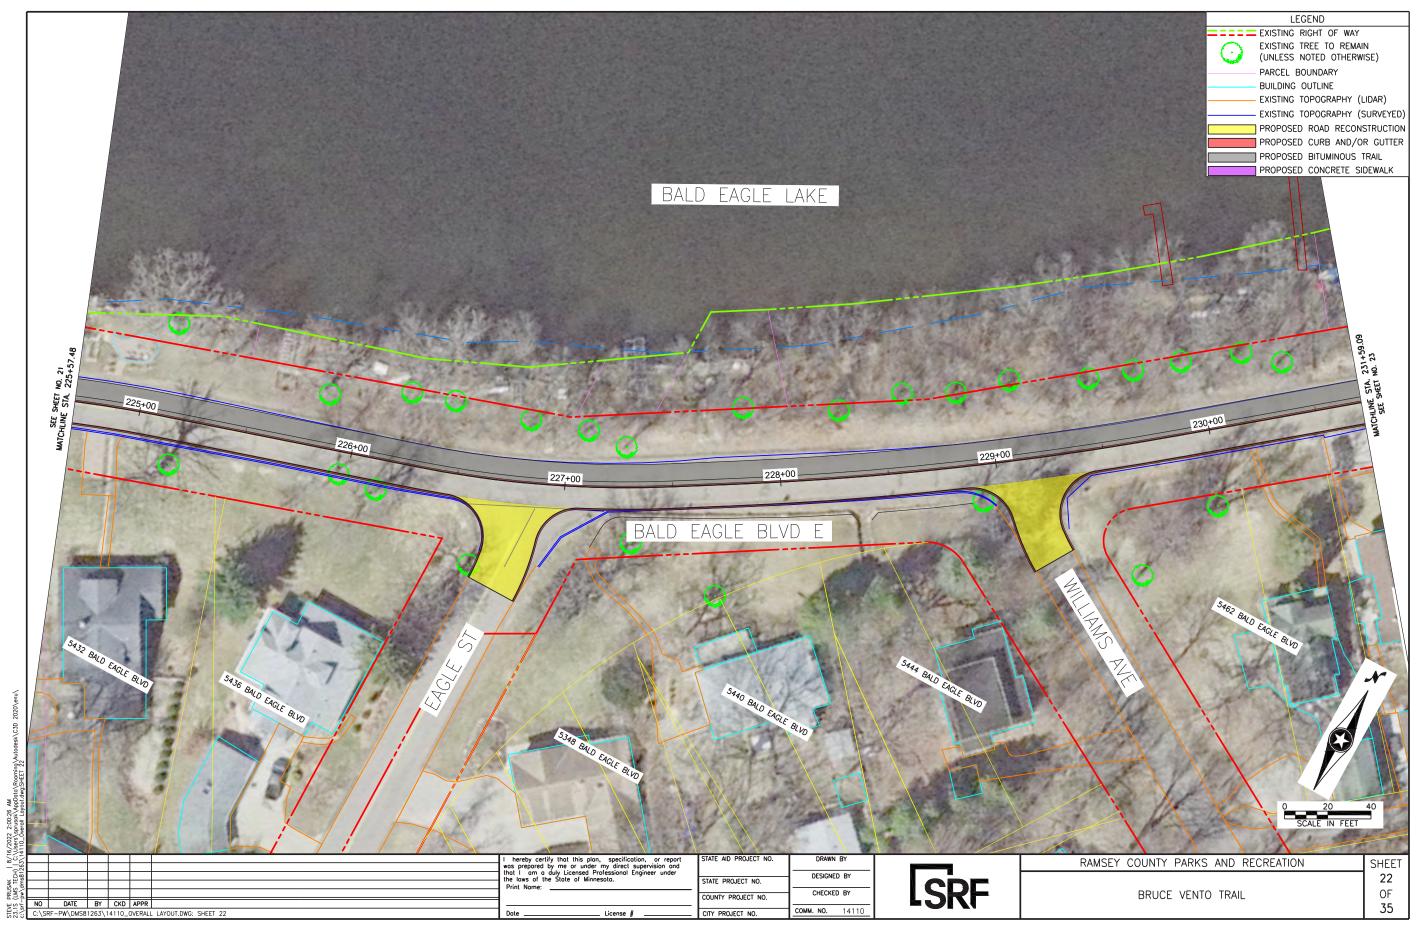

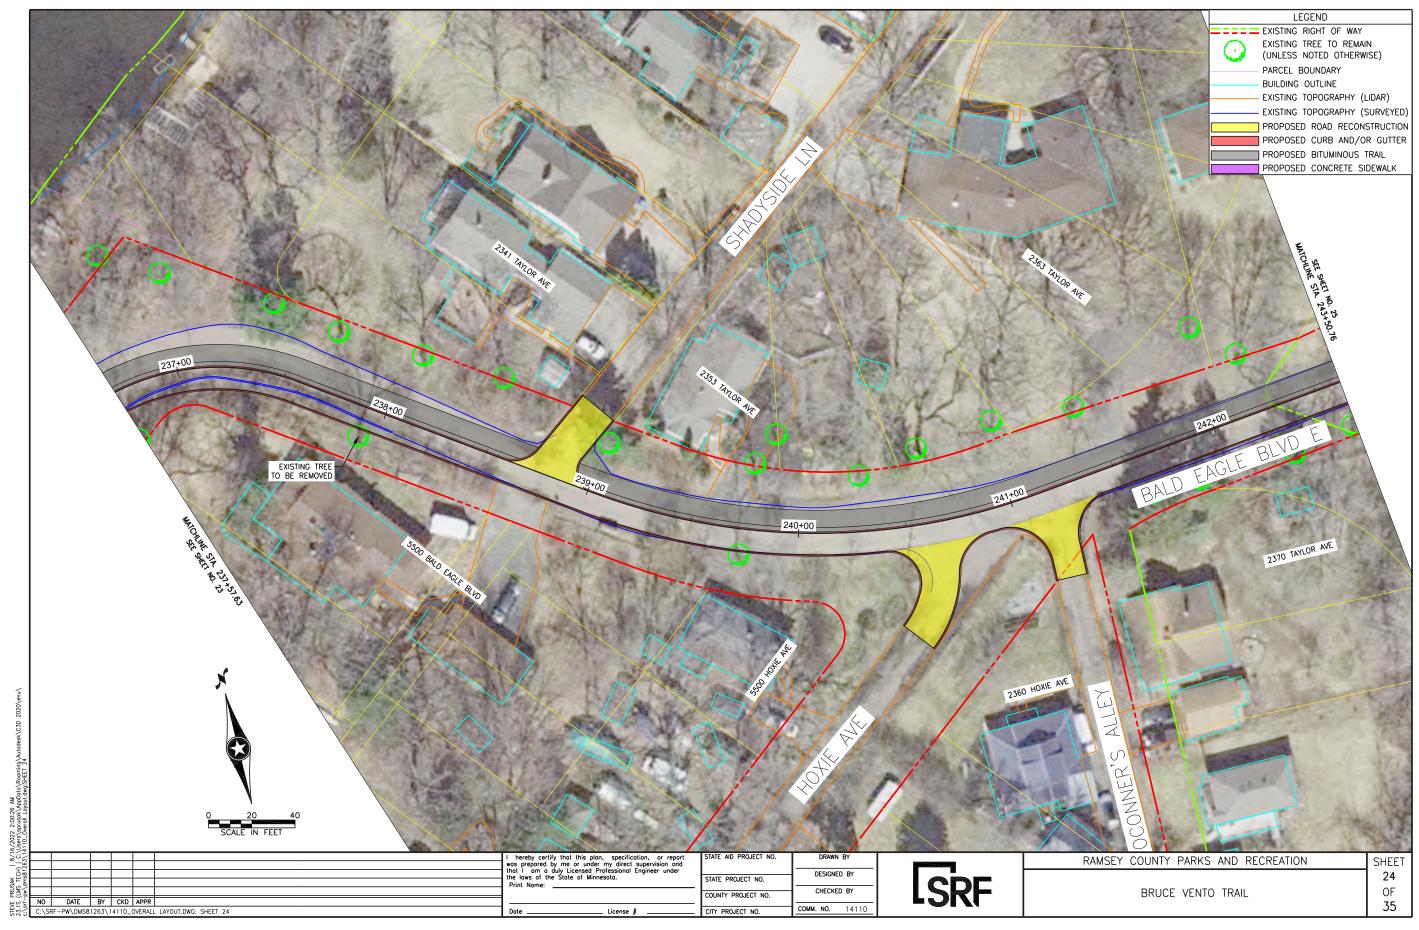

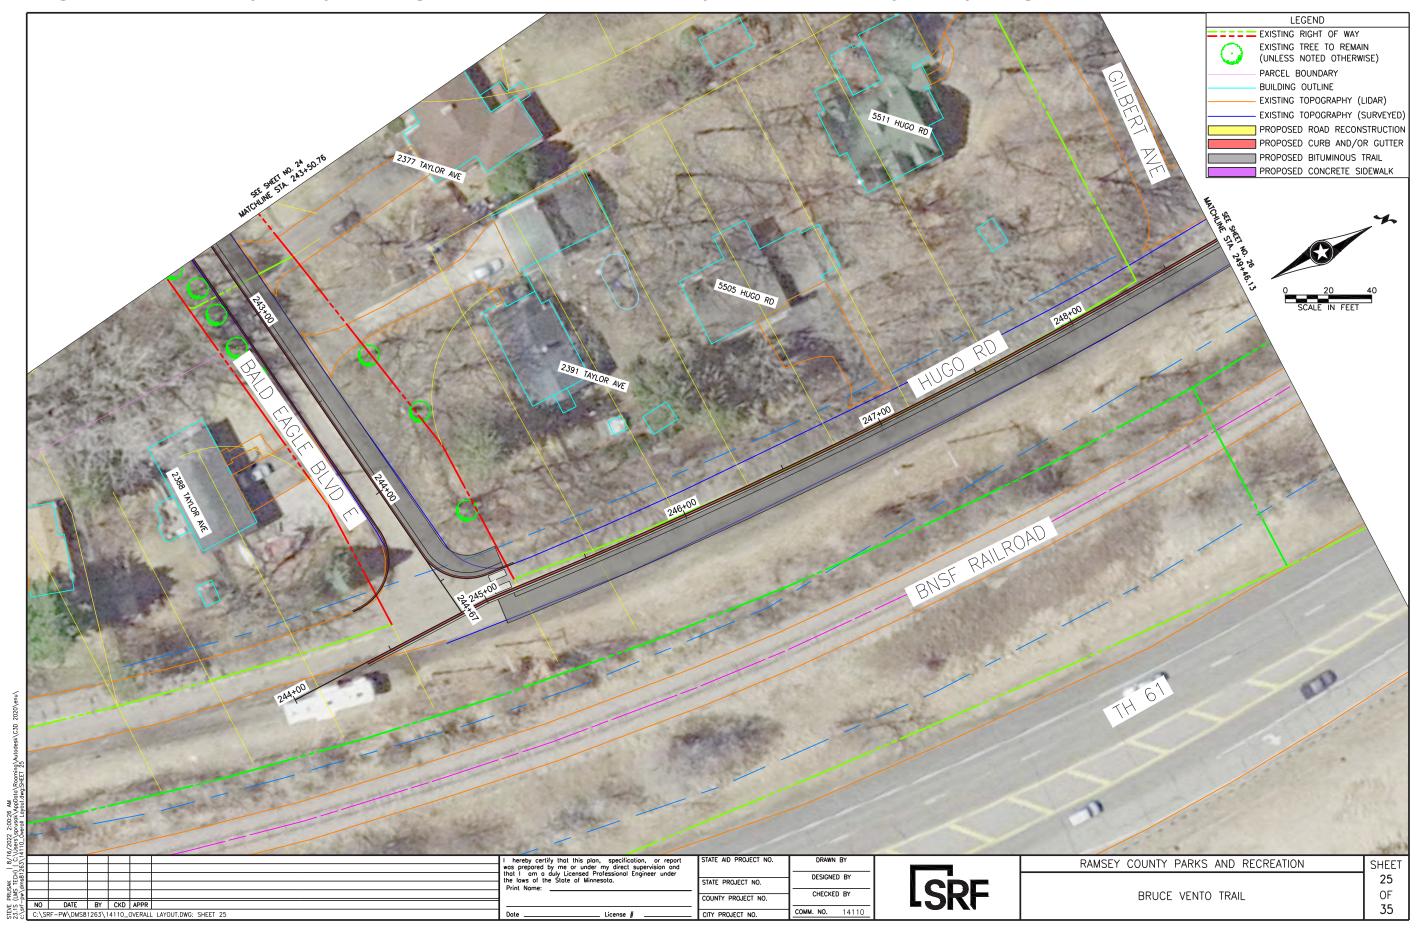

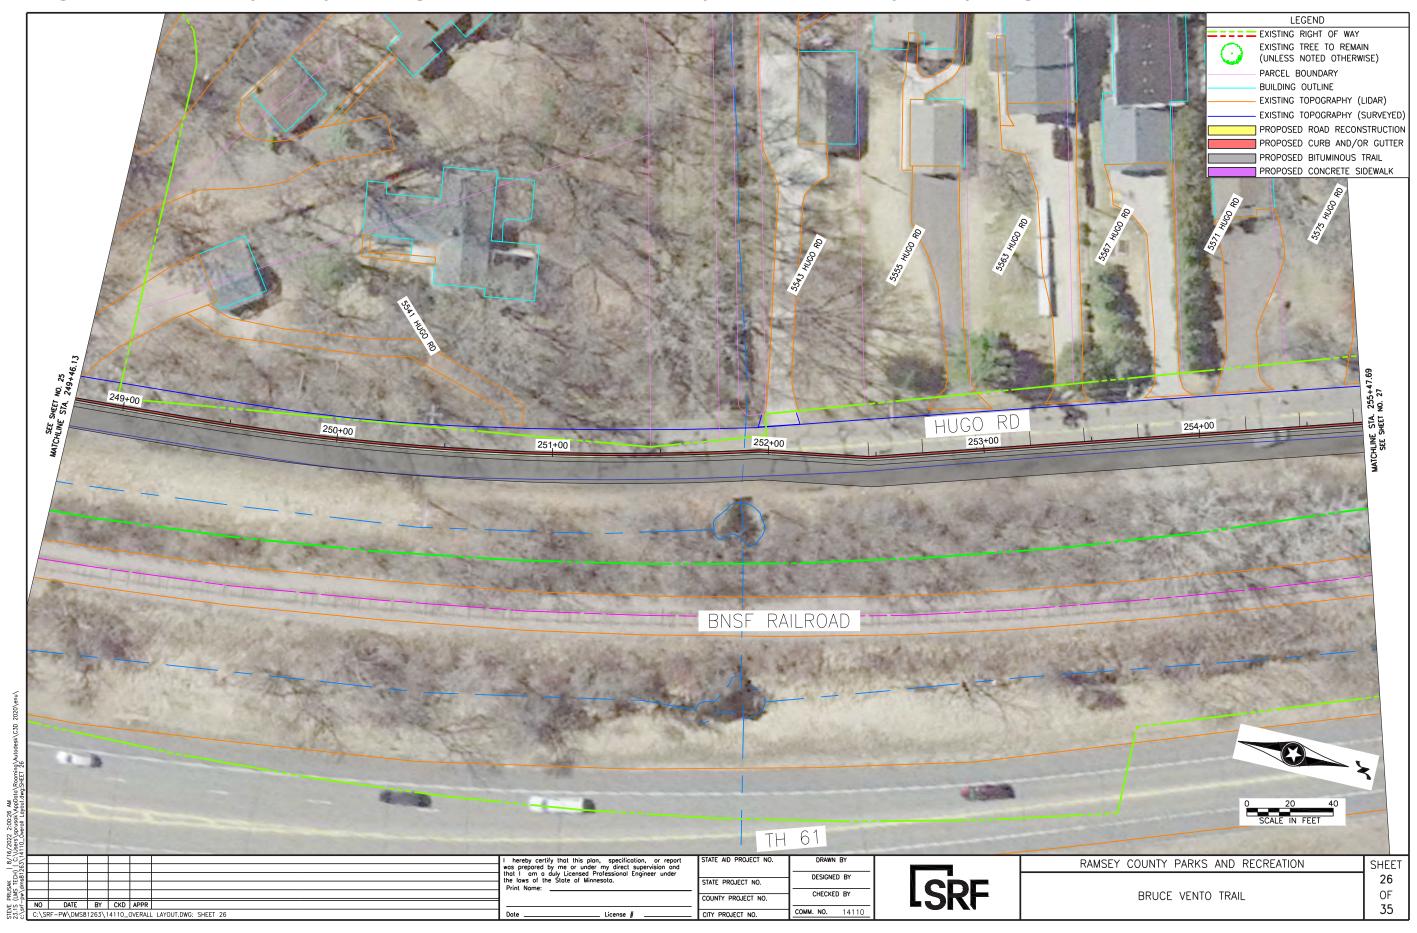

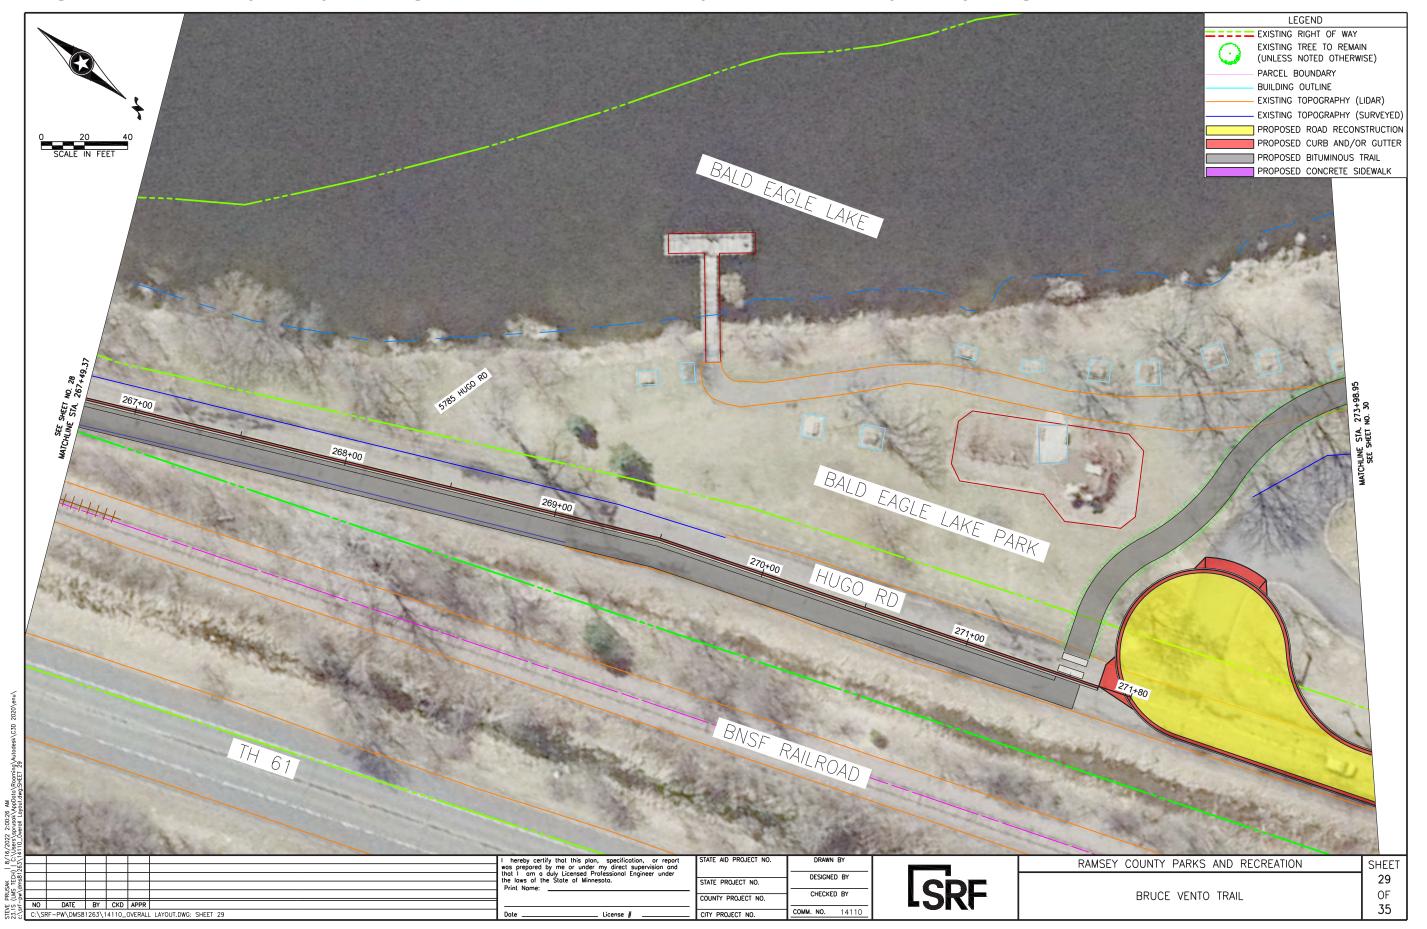

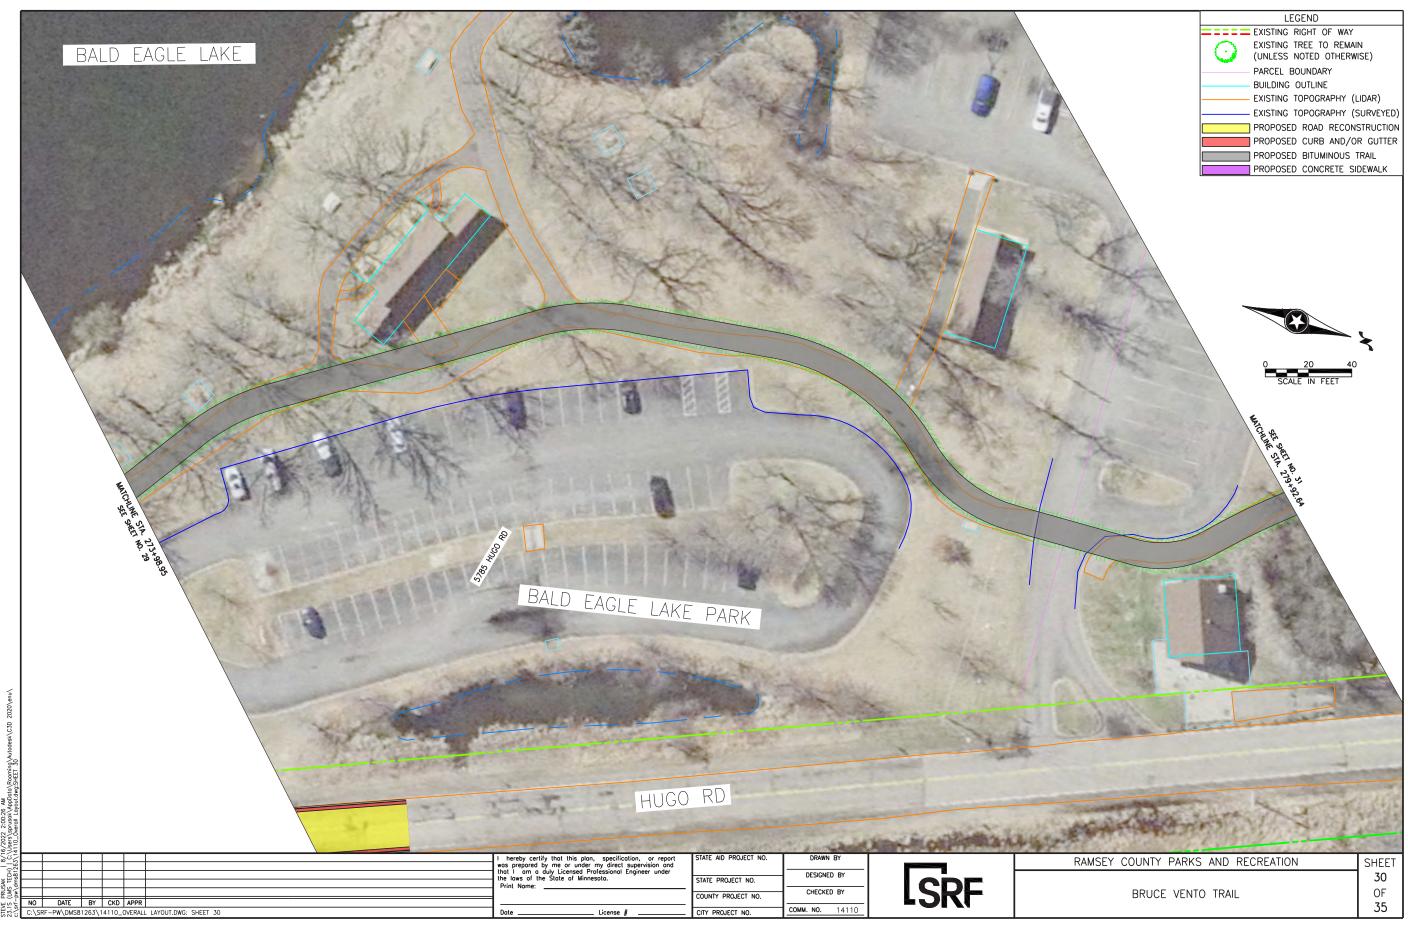

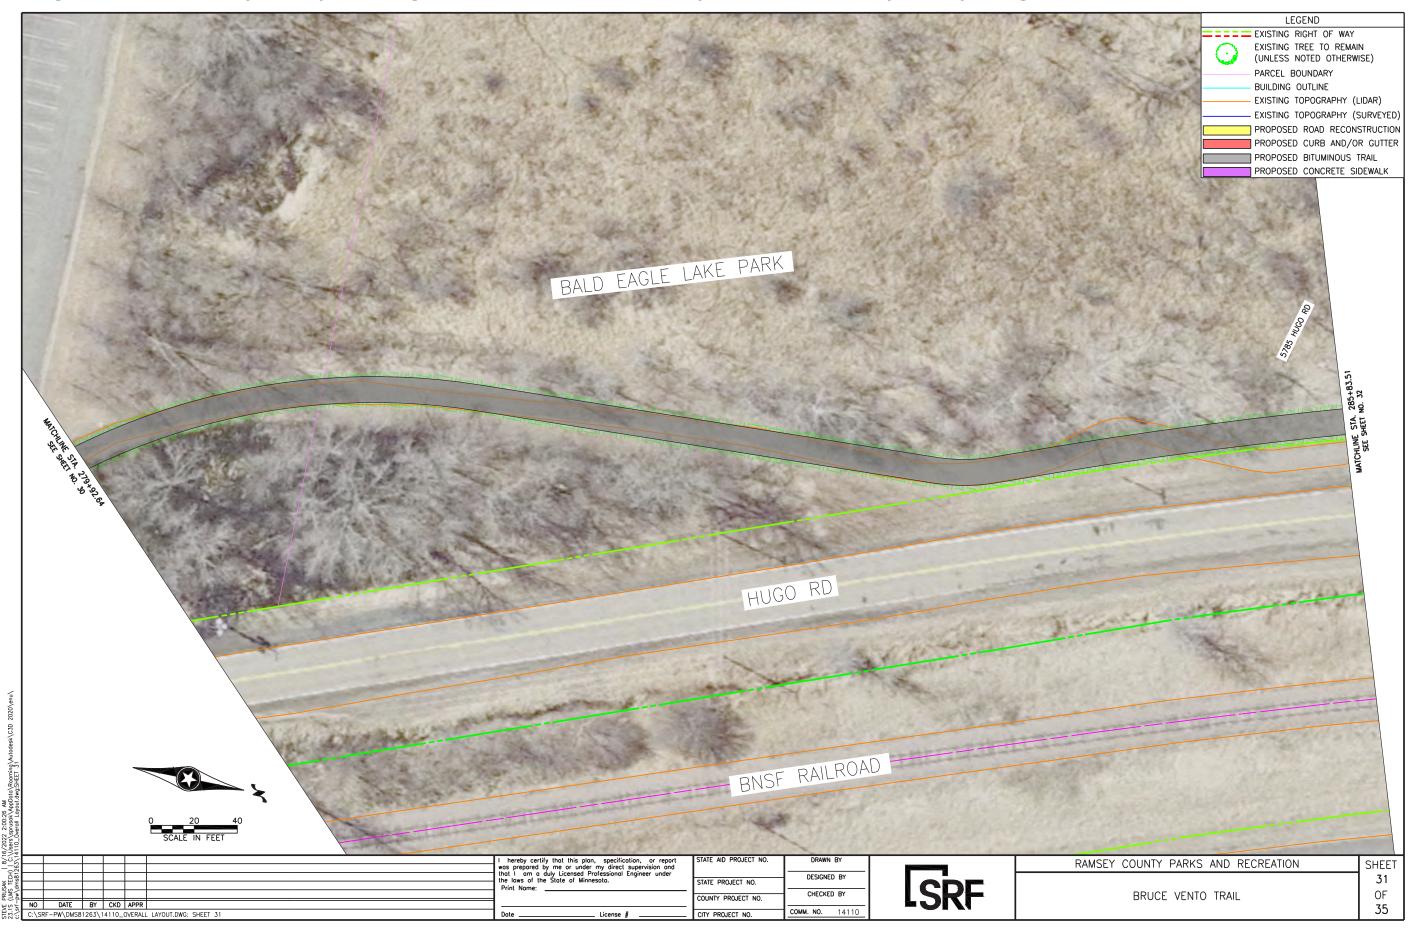

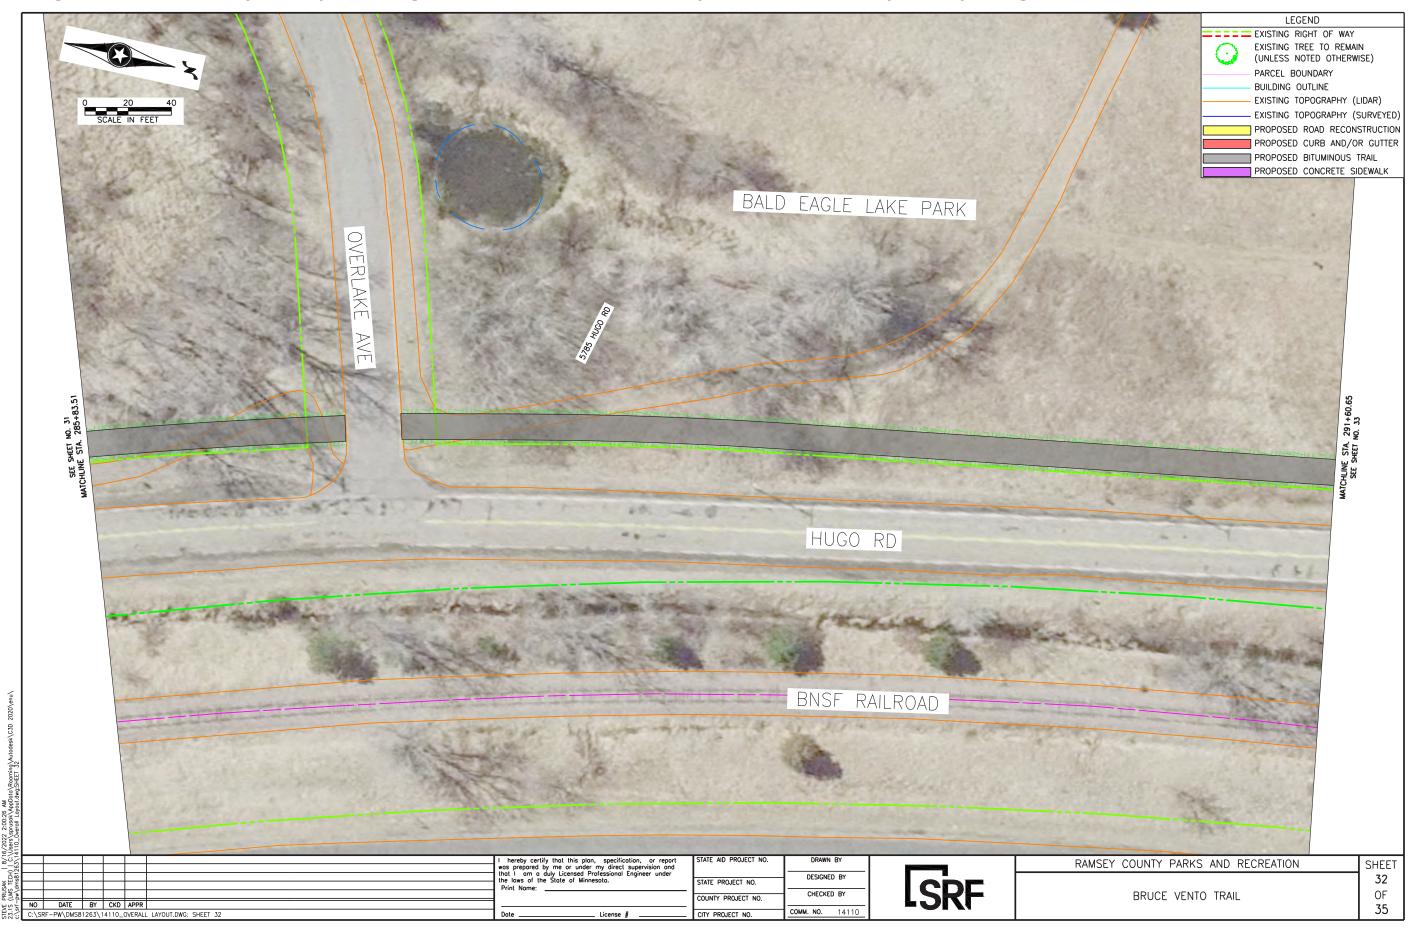

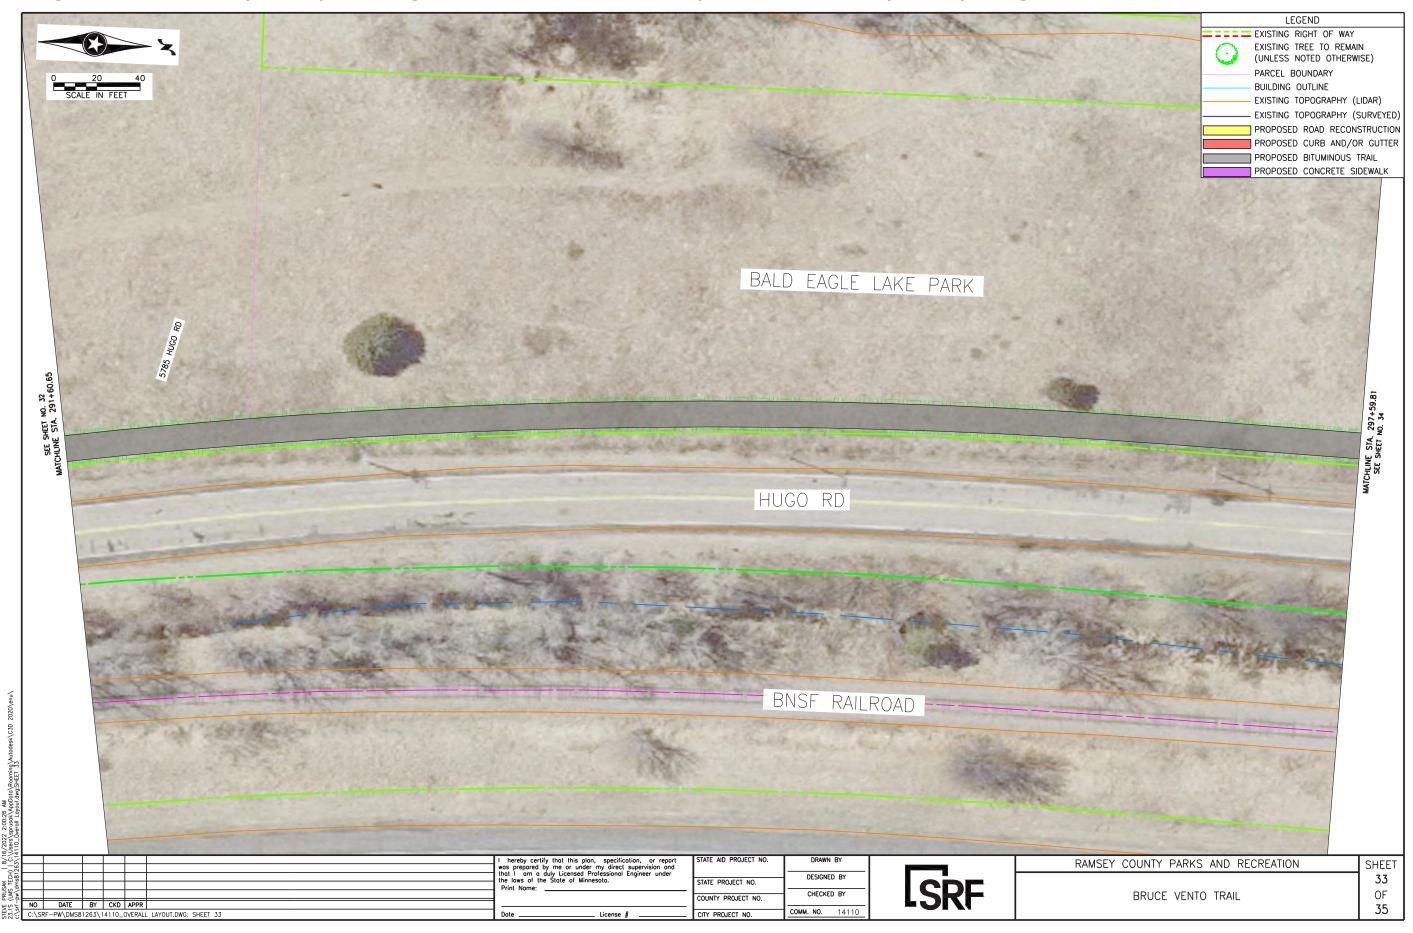

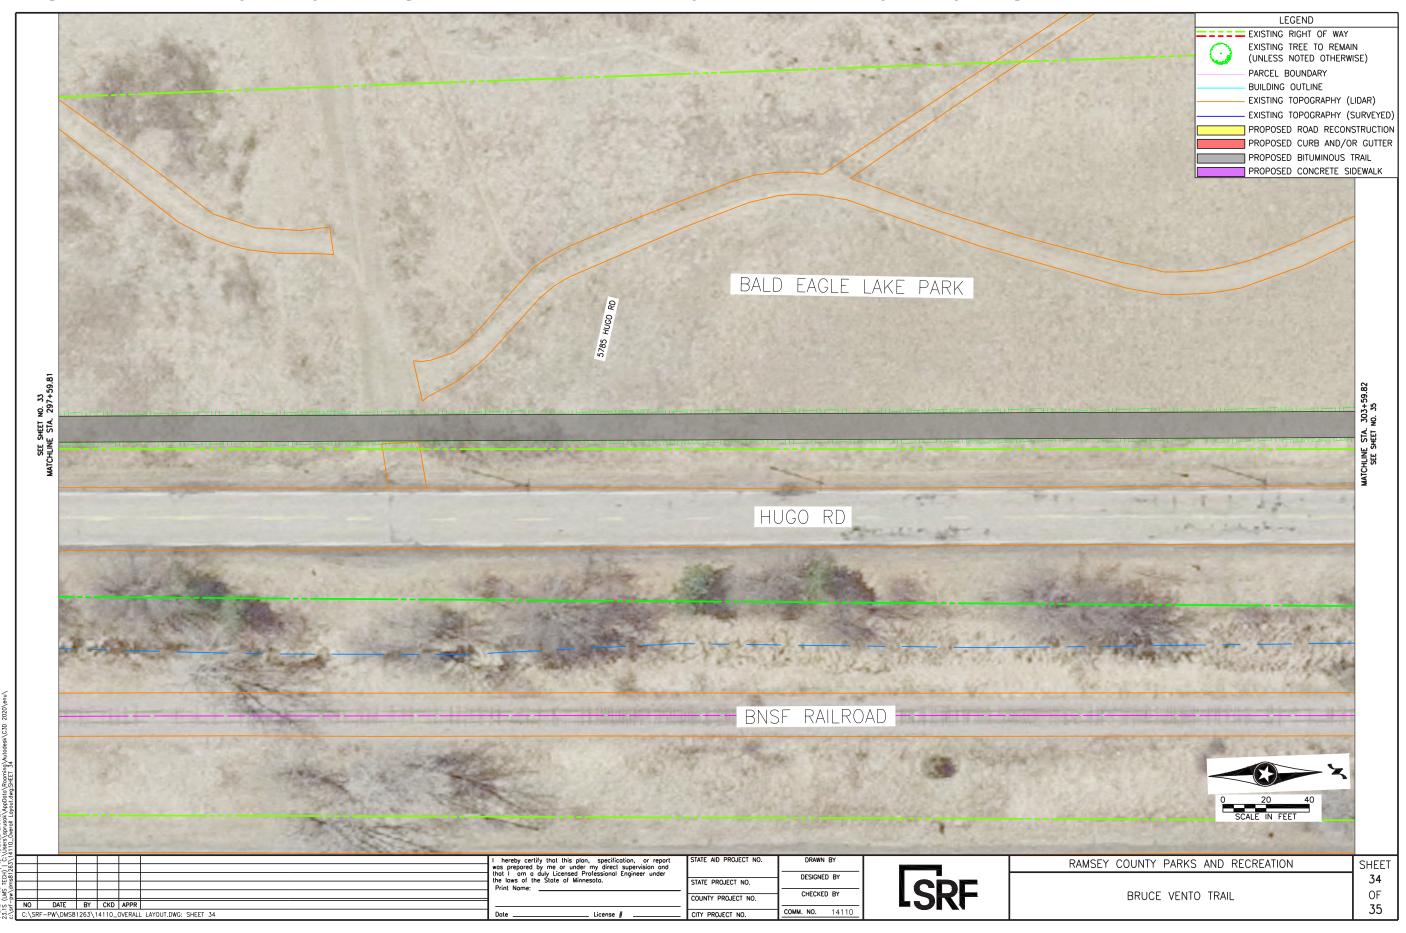

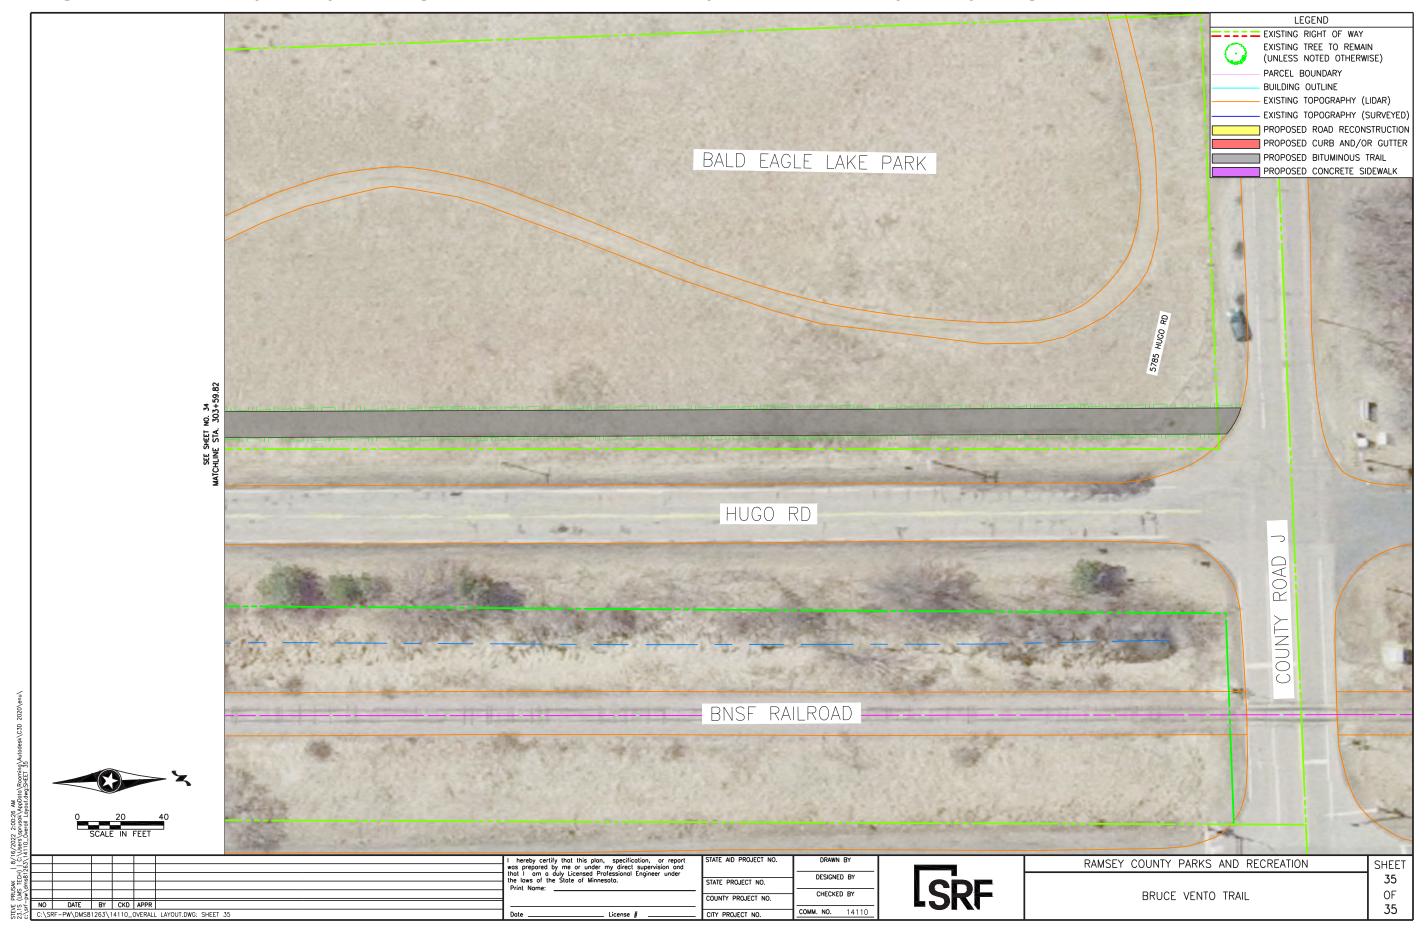

## Preferred Alignment with Two-Way Roadway on Hugo Road at Pinch Point

The following five pages include concept plans for trail concept with a two-way roadway on Hugo Road and a twoway roadway on Bald Eagle Boulevard. Figure 16 shows a conceptual section of the proposed trail placement along Hugo Road at the pinch point location.

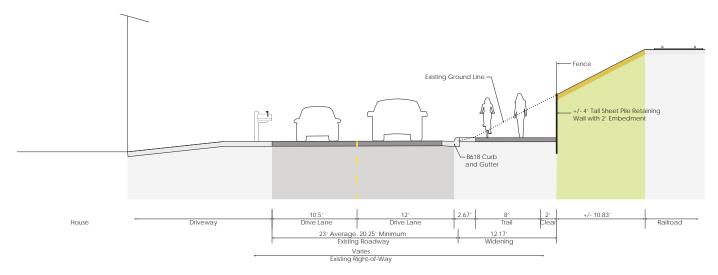

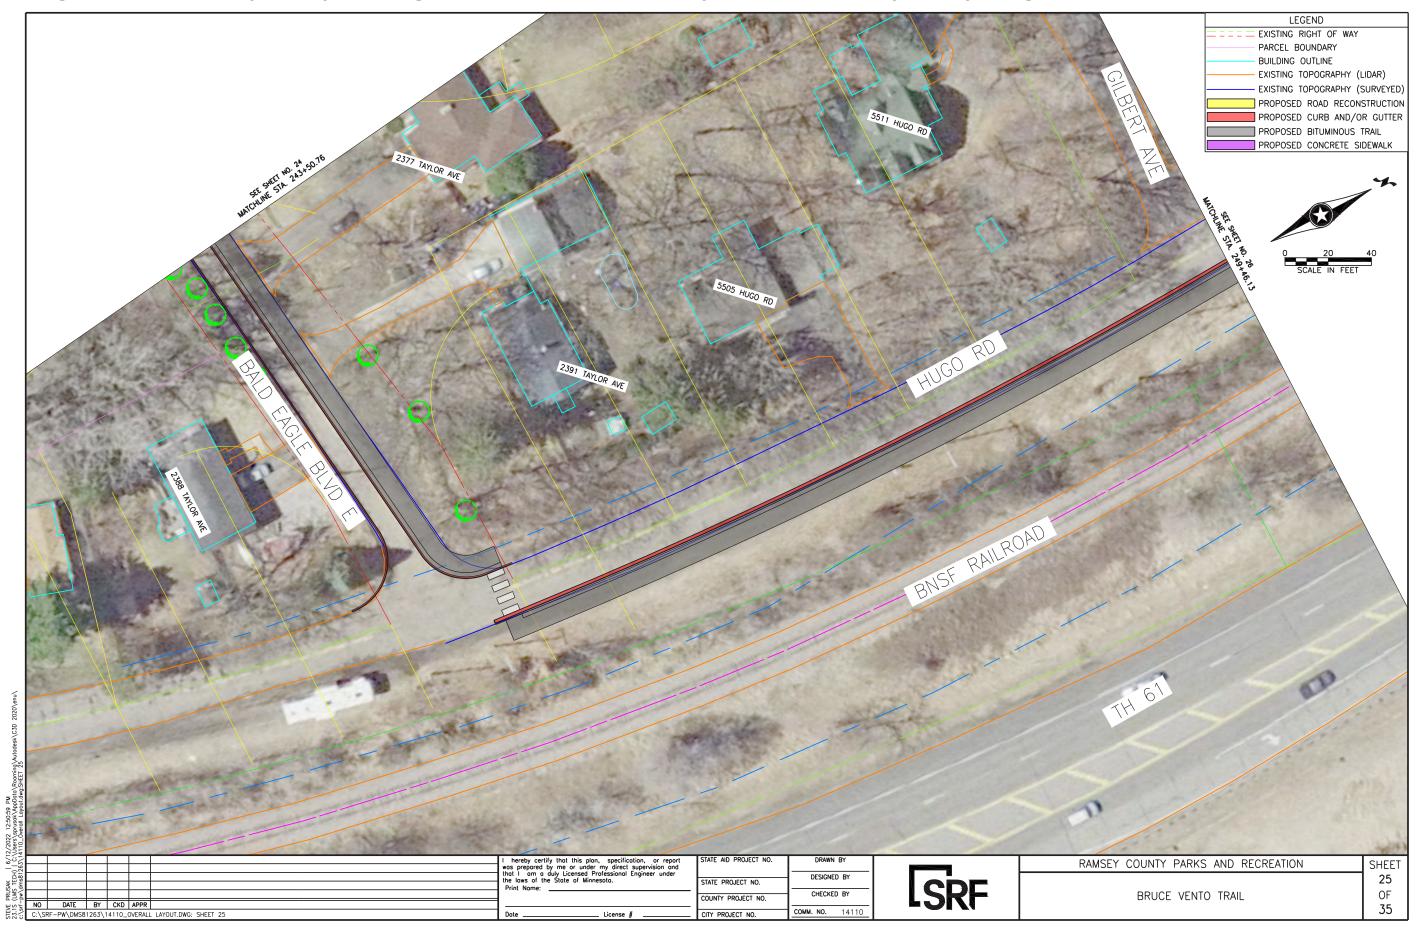

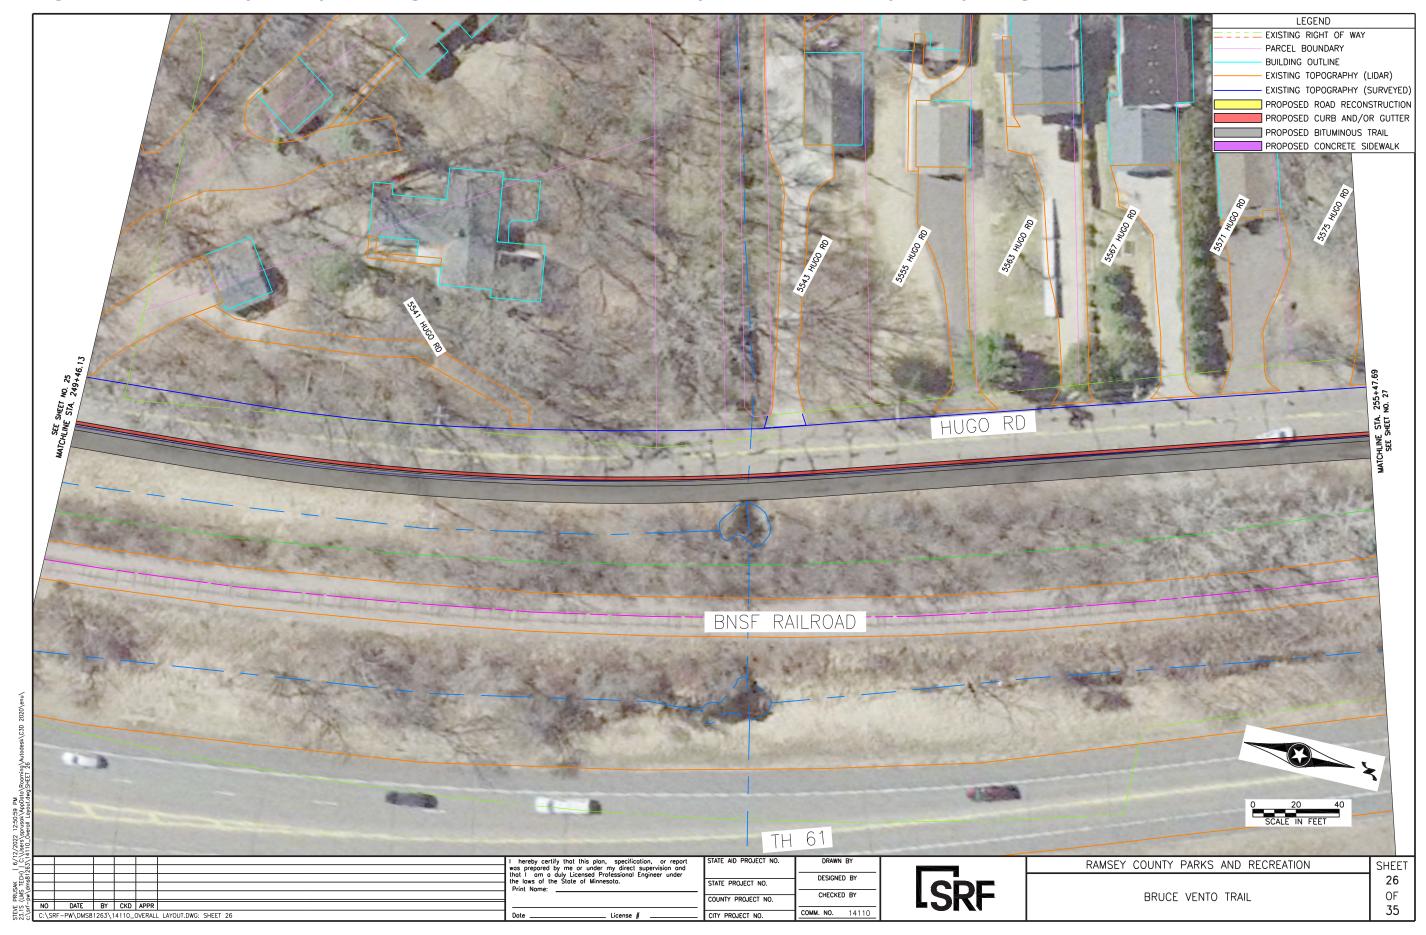

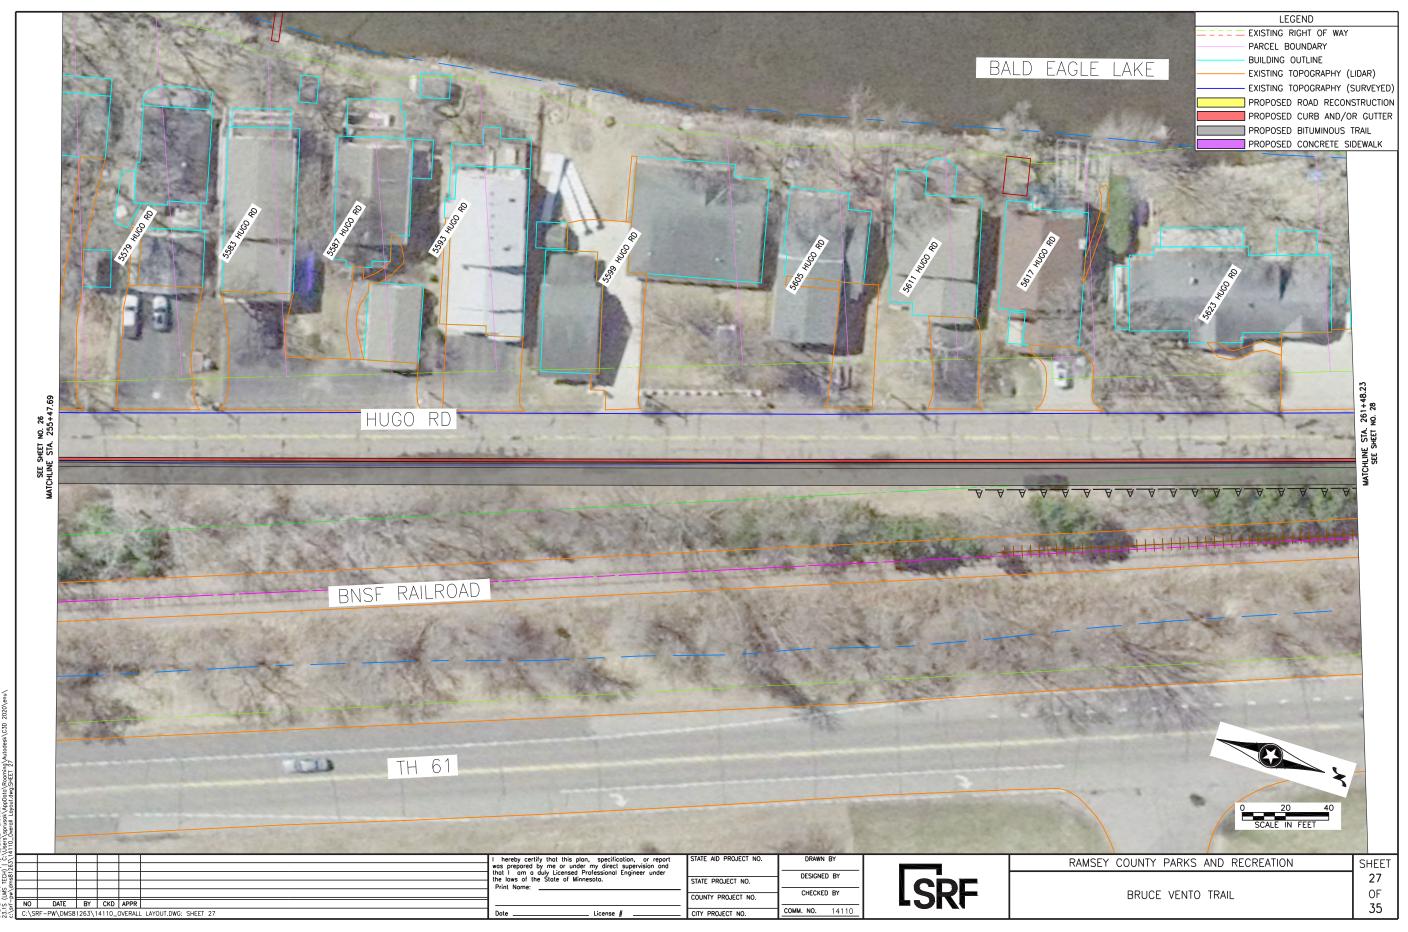

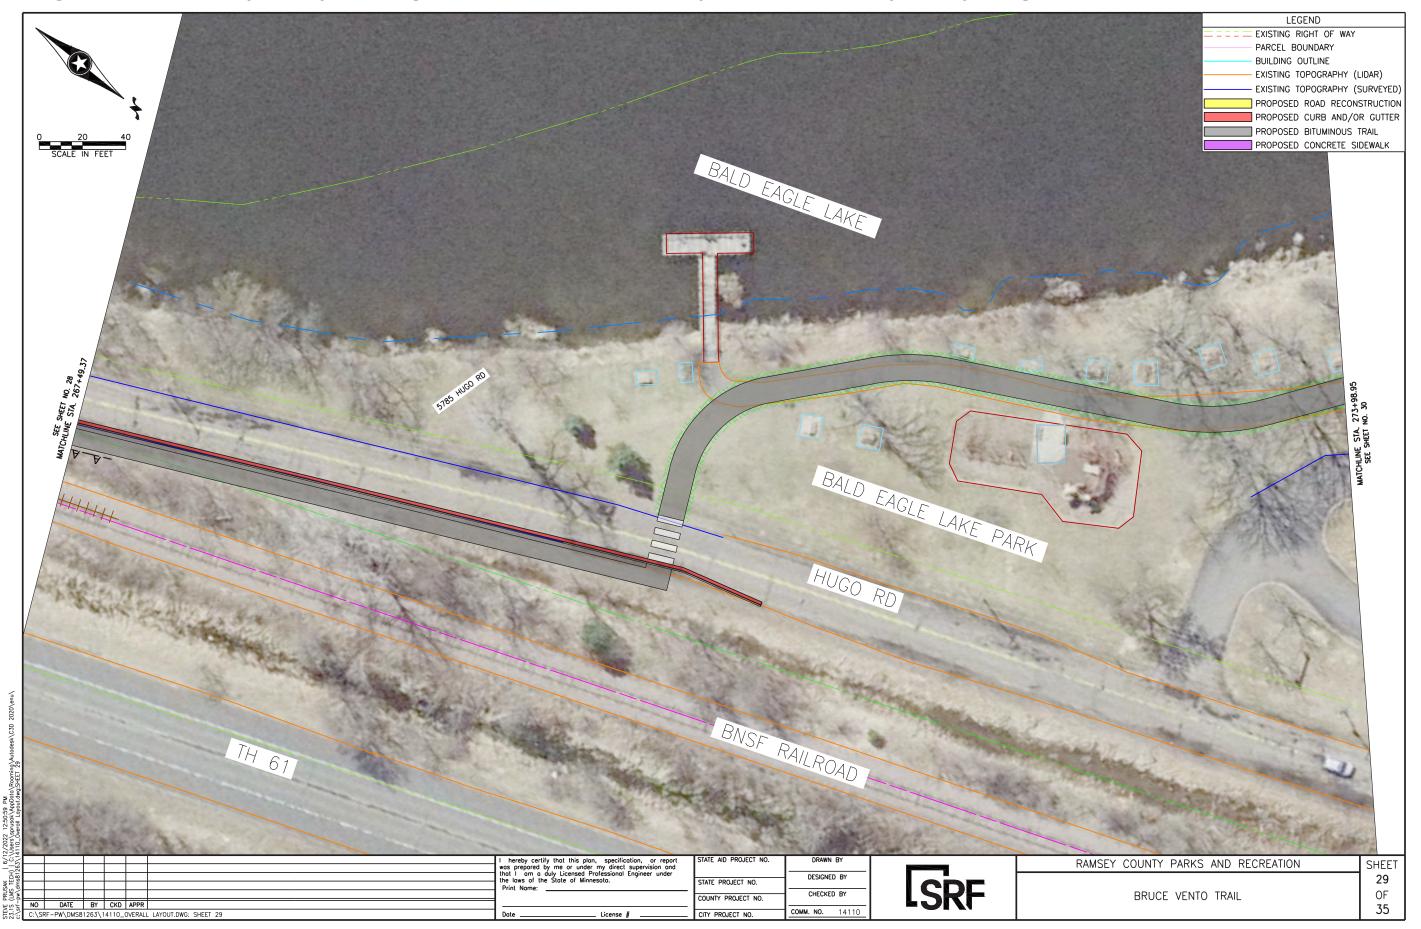

FIGURE 16: Two-Way Roadway on Hugo Road at Pinch Point Section.

# **COST ESTIMATES**

Cost estimates were prepared for the two alternatives of the alignment shown graphically in this report, the preferred alignment with one-way roadway on Hugo Road at the pinch point and the preferred alignment with twoway roadway on Hugo Road at pinch point.

The preferred alignment with one-way roadway on Hugo Road at the pinch point includes the following:

- Two-way roadway on Bald Eagle Boulevard to Park Avenue.
- One-way roadway on Bald Eagle Boulevard North of Park Avenue.
- One-way roadway on Taylor Avenue.
- One-way roadway on Hugo Road from Taylor Avenue to the Park.

The preferred alignment with two-way roadway on Hugo Road at pinch point is the same as above with the exception of a two-way roadway at Hugo Road south segment between Taylor Avenue and the Park.

Total costs for the two preferred alternates are as follows:

- Preferred alignment with one-way roadway on Hugo Road at the pinch point: \$7,018,850.
- Preferred alignment with two-way roadway on Hugo Road at the pinch point: \$7,927,300.

In order to provide additional support to propose removing southbound traffic on Bald Eagle Boulevard and Taylor Avenue between Hugo Road and Park Avenue, two additional estimates were prepared to examine concept costs to add a trail while maintaining two-way traffic on Bald Eagle Boulevard. Graphics were not prepared for these alternatives but rather defined by the following assumptions:

- Removal of existing roadway.
- New trail built on lake side of the road.
- Roadway fully reconstructed and shifted to the house side of the road.
- Retaining walls on the house side of the road.
- Additional allowances for drainage improvements, including extension of the box culvert south of Buffalo Street.
- Provisions for permanent and temporary easements along the house side of the road.
- Extensive tree removal.

Total costs for these two additional alternatives are as follows:

- Two-way Bald Eagle Boulevard with one-way roadway on Hugo Road at the pinch point: \$13,169,350.
- Two-way Bald Eagle Boulevard with two-way roadway on Hugo Road at the pinch point: \$14,077,800.

Cost estimates are for the alignments noted above are shown in Figures 17-20. Complete cost estimates are provided in Appendix F.

### **Bruce Vento Regional Trail - Phase 2** One Way Alternative on Bald Eagle Boulevard, One Way Alternative on Hugo Road Concept Cost Estimate (based upon 2020 bid price information) Prepared By: SRF Consulting Group, Inc., June 14, 2022

FIGURE 20: Phase 2 Estimate for Two Way Alternative on Bald Eagle Boulevard, Two Way Alternative on Hugo Road

## **ENGAGEMENT SUMMARY**

The project included a public engagement plan to engage the community and gather public input as the project worked to identify a preferred alignment for Phase 2 Extension of the Bruce Vento Regional Trail. The engagement plan included a pop-up event, three rounds of public open houses, two on-line surveys, an on-line comment map, a project video and a promotional campaign and project website.

The early phases of the engagement plan were geared to soliciting input from the public to inform the project decision-making and design processes.

A later phase of the plan where designed to inform the public of the preferred alternative(s) and gather further input on the design.

## **Engagement Purpose and Objectives:**

The Bruce Vento Regional Trail is envisioned as a 13.3-mile trail from the east side of downtown Saint Paul to the north County boundary in White Bear Township. This project is intended to complete a major gap in Metropolitan Council Regional Bike Transportation Network and the National US Bike Route 41 (USBR 41) by furthering the design process for the final 3.5 miles of the trail corridor.

The preferred conceptual route between Whitaker Street and County Road J primarily utilizes Bald Eagle Avenue, Bald Eagle Boulevard, Taylor Avenue and Hugo Road; an alternative route would traverse the White Bear Lake High School property and use a section of Division Street and Park Avenue to connect to Hugo Road. Ramsey County will work to incorporate input from residents and stakeholders with a racial equity lens to develop this critical link of regional trail to connect pedestrian and bicycle facilities in the County between Whitaker Street and County Road J. This is a challenging project with many traffic, design, utility, and stakeholder issues to work through. Some of the key objectives of this project included:

- Prepare schematic and preliminary plans to strengthen the County's chances for future grant requests.
- To obtain meaningful input from stakeholders living near the project corridor through highly interactive and engaging public involvement activities.
- Create high quality community spaces that promote user experiences for all people, all ages, and all

abilities.

- To provide a regional trail facility and site amenities that complement the areas natural resources and incorporate sustainable and resilient design.
- Provide trail connections to downtown White Bear Lake, the Highway 96 Regional Trail, the Lake Avenue Trail, and the White Bear Lake Marina.

Photo from White Bear Lake Market Fest Pop-up event, July 1, 2021.

Summaries of the Round 1, 2, and 3 engagement processes are included in the following sections and public engagement data, including a log of comments received, can be found in Appendices G through K.

# BRUCE VENTO REGIONAL TRAIL EXTENSION – PHASE 2 ROUND 1 & 2 ENGAGEMENT SUMMARY

# **PROJECT DESCRIPTION**

Ramsey County Parks & Recreation is looking to re-envision the Bruce Vento Regional Trail as a 13.3 mile trail from downtown Saint Paul to the county boundary in White Bear Township.

Ramsey County is working to design an extension of the Bruce Vento Regional Trail that will stretch the remaining 3.5 miles of the corridor between Whitaker Street and County Road J. This document provides a summary of community and stakeholder engagement that has helped to inform the initial design of the trail.

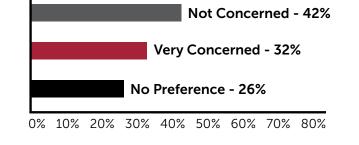

HOW DID WE GATHER FEEDBACK?	virtual engagement initial design conc and virtual public mailed meeting n	d fall of 2021, project partners hosted a pop-up event, nt, public open house and community outreach to present cepts and gather community feedback. These in-person input opportunities were promoted broadly, including otifications, social media promotion, a press release, email updates to the project website to share digital copies of 5.

	$\bigotimes$	Suggestion to consider <b>potential one-way roadway</b> on portions of Bald Eagle Blvd. and/or Hugo Road.
RAMSEY COUNTY Parks & Recreation		BRUCE VENTO REGIONAL TRAIL EXTENSION - PHASE 2

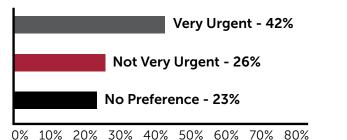

# WHAT DID WE HEAR?

In October 2021, Ramsey County conducted a survey to better understand community preferences for several design considerations for the Phase 2 Extension of the Bruce Vento Regional Trail. The survey received more than 135 responses and below is a summary of community feedback provided on the survey.

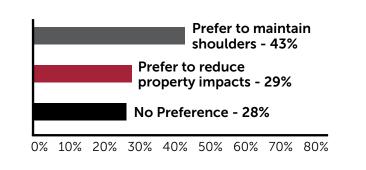

1) Would you be concerned about the narrowing of Lincoln Ave. and the potential loss of on-street parking?

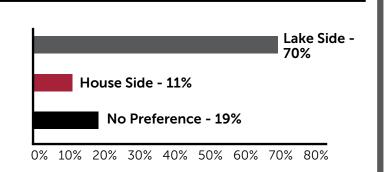

2) In your opinion, if safe bicycle and pedestrian access can be accomplished with improvements at road-level, is a pedestrian bridge over Highway 96 still urgent?

3) How important is it that existing road shoulders north of the high school remain in place once the project is constructed?

4) Do you have a preference for which side of the road a trail would be located along Bald Eagle Blvd.?

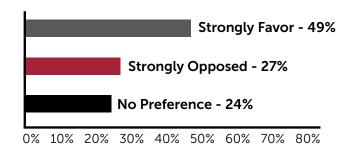

RAMSEY COUNTY Parks & Recreation

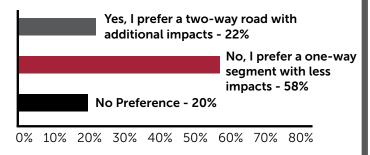

68

WHAT DID WE HEAR?

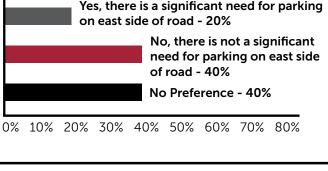

5) How do you feel about converting a portion of Bald Eagle Blvd. to one-way? (Park Ave. to Taylor Ave.)

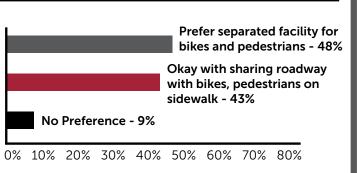

6) Do you prefer that Bald Eagle Blvd. remain a two-way road with trail if that means impacts such as acquiring more road right of way to fit a trail will occur?

7) In your opinion, is there a significant need for parking on the east side of Hugo Road, between Taylor Ave. and the Bald Eagle picnic area?

8) How do you feel about sharing the roadway with bikes along Hugo Road, between Taylor Ave. and the Bald Eagle picnic area?

## **Round 3 Final Survey Results by Geographic Location**

In April and May of 2022, Ramsey County conducted an online survey to better understand community preferences for each segment of the proposed alignment for the Phase 2 Extension of the Bruce Vento Regional Trail. The survey received 190 responses and below is a questionby-question summary of community feedback provided on the survey. The following tables provide a summary of survey responses based upon responses to the survey question "Where do you live in relation to the Bruce Vento Regional Trail?". A full summary of survey responses and comments received on the comment map are available in the appendix.

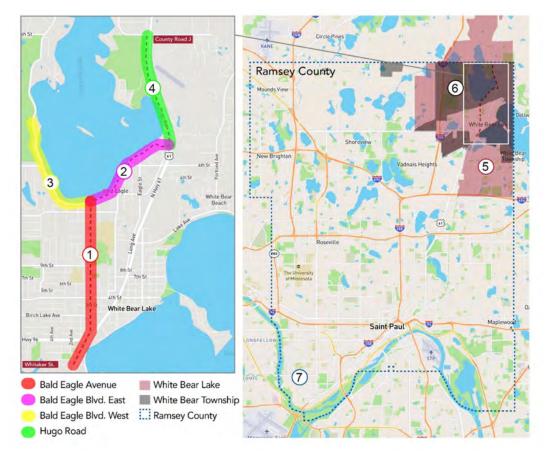

FIGURE 21: Phase 3 final survey map.

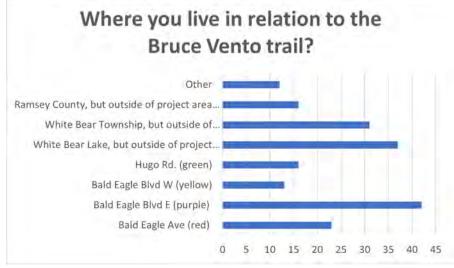

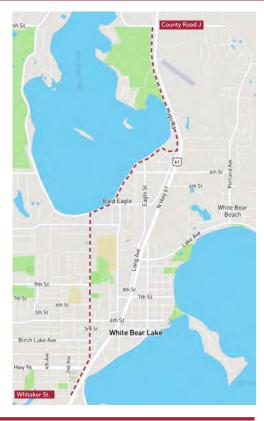

FIGURE 22: Phase 3 final survey results graph.

# BRUCE VENTO REGIONAL TRAIL EXTENSION – PHASE 3 ROUND 3 ENGAGEMENT SUMMARY

# **PROJECT DESCRIPTION**

Ramsey County Parks & Recreation is looking to re-envision the Bruce Vento Regional Trail as a 13.3 mile trail from downtown Saint Paul to the county boundary in White Bear Township.

Ramsey County has proposed a recommended alignment for the Phase 2 extension of the Bruce Vento Regional Trail, which will stretch the remaining 3.5 miles of the corridor between Whitaker Street and County Road J. This document provides a summary of community and stakeholder engagement conducted in the spring of 2022, to gather community feedback on the proposed alignment of the Phase 2 extension.

# WHAT ENGAGEMENT OCCURRED?

**Survey** April 20 – May 10 190 community responses)

Project Overview Video www.youtube.com/ watch?v=fTcOo1YMpzU&t=5s

**Open House** April 21 at White Bear Lake City Hall 90+ attendees

**Comment Map** 260 community comments

# **Survey Analytics:**

**190** survey responses**71%** of responses from 55110 Zip Code

- **79%** of responses identify as White/Caucasian
- 17% of responses identify as BIPOC

9) Hugo Road two-way - What is your level of support for the proposed alignment from the intersection of Taylor Avenue/ Hugo Road to County Road J?

BRUCE VENTO REGIONAL TRAIL EXTENSION - PHASE 2

### **NEXT STEPS**

### **Agency Engagement**

As the project moves forward with a more detailed design it is important to maintain continued coordination between agency stakeholders and policymakers, including:

- White Bear Township
- City of White Bear Lake
- Rice Creek Watershed District
- Vadnais Lake Area Watershed Management Organization
- White Bear Lake High School

### **Design Advancement and Recommendation**

The project completed design for the preferred alignment with one-way roadway on Hugo Road at the pinch point and the preferred alignment with two-way roadway on Hugo Road at the pinch point to a 15-20% level (Alignment, Profile, Typical Sections, Preliminary Sections) as the preferred design scenarios at this time. The oneway alternate for Bald Eagle Boulevard between Park Avenue and Hugo Road was advanced as it has the least grading and disruption of vegetation along the lake. By minimizing added impervious surfaces, it also is the least impactful alternative relative to stormwater management. Future design efforts will provide additional detail and specificity to the project. Some of the likely future design efforts include the following:

- Affirm alignment alternatives for Bald Eagle Boulevard E, Taylor Avenue, and Hugo Road.
- Further discussions with White Bear Township regarding road turnback associated with the one-way vs. two-way alternatives on Bald Eagle Blvd and Hugo Road.
- Further assessment of an alternate alignment through White Bear Lake High School to address resident comments about the trail along Bald Eagle Blvd. This includes evaluation of route through the High school property, along Division Ave. and Park Ave. up to Hugo Road.
- Additional consideration of the design of the proposed Lincoln Ave. cul-de-sac

- Additional refinement of grading and construction limits
- Advance design details
- Utility coordination
- Permitting and advancement of stormwater design with watersheds, local agencies and White Bear Lake High School
- Discussion of maintenance and operations of the trail and supporting infrastructure
- Complete preliminary design and final design
- Updated cost estimates
- Project specifications

#### **Public Engagement**

Through this project, it has been clear that the affected communities are very interested in this project and want to be engaged as the project moves forward. In particular, additional engagement is suggested to address resident questions about preferred alignment as the design progresses. Additional engagement is suggested in part because of evolving public opinion of the trail that was observed in the Round 2 and Round 3 surveys.

### **Additional Railroad Coordination**

The project will require additional railroad coordination as the project moves forward. Specific items to coordinate include the following:

- Additional coordination with BNSF Railroad regarding potential impacts to embankment and right of way along Hugo Road
- Additional coordination with BNSF Railroad regarding at-grade crossing at Highway 96 in conjunction with MnDOT intersection improvements
- Final Design coordination with Canadian Pacific Railroad regarding trail crossing along Bald Eagle Avenue

Appendix A -- Traffic Memorandum

### Memorandum

SRF No. 14110

То:	Scott Yonke, Director of Planning and Development Ramsey County Parks
From:	Mike McGarvey, ASLA, PLA, Director Tom Sachi, PE, Project Manager
Date:	June 28, 2022
Subject:	Bruce Vento Trail Traffic Study

### Introduction

An evaluation was completed to determine the traffic impacts of constructing an extension of the Bruce Vento Trail on Bald Eagle Boulevard and Taylor Avenue in White Bear Lake, MN along the southeast shore of Bald Eagle Lake. A high-level traffic study was conducted to evaluate the impacts of the various trail designs on daily traffic volumes and services to the surrounding neighborhood.

### **Design Impacts and Data Collection**

Multiple roadway designs were considered for adding the bike trail extension. The designs include:

- Keeping both lanes of vehicle traffic and using right-of-way to add a trail on either the east or west side of the roadways.
- Closing the northbound/eastbound vehicle lane and adding the trail on either the east or west side of the roadways.
- Closing the southbound/westbound vehicle lane and adding a bike lane on either the east or west side of the roadways.

Year 2016 and 2019 daily traffic volumes were provided by the Minnesota Department of Transportation (MnDOT) for roadways within the study area and are shown in Figure 1. Various impacts to driver behavior, civil services, and/or private properties are associated with each design.

### **Keeping Both Vehicle Lanes**

In this design, daily vehicle traffic patterns are not expected to change, but there are considerable impacts to properties. On the east side of Bald Eagle Boulevard, the land slopes upward, resulting in topographical impacts. This configuration would require cutting into the slope to add a trail and likely would involve building retaining walls for most of the length along roadway. Walkway stairs leading to the homes would also need to be replaced for many of the homes. On the south side of Taylor Avenue, utility poles would need to be relocated.

**Existing Traffic Volumes** 

Bruce Vento Trail Extension City of White Bear Lake, Minnesota On both streets, mailboxes and trash pickup would require that a small boulevard be constructed between the roadway and the trail, or these items would need to be moved to the west side of the street, causing the post office and waste services to alter their routes and the homeowners to cross the street to retrieve their mail and waste bins. This relatively high level of impact and potential need to acquire more public right of way to accomplish this design, as well as massive disruption to the corridor (tree removal, extensive grading, etc.) contribute to this being a less desirable alternative.

On the west side of Bald Eagle Boulevard, the land slopes downward toward Bald Eagle Lake. In some parts it is a gradual decline and in others it is a steep drop-off less than one foot from the edge of the road. Land would have to be filled in and then held in place with a retaining wall for most of the length along the roadway. Multiple homeowners' stairways leading to their docks would need to be replaced. On the northside of Taylor Avenue, mailboxes and trash pickup would either be between the roadway and the trail on a newly constructed boulevard, or moved to the south side of the street, causing the post office and waste services to alter their routes and the homeowners to cross the street to retrieve their mail and waste bins.

### **Closing Northbound and Eastbound Lanes**

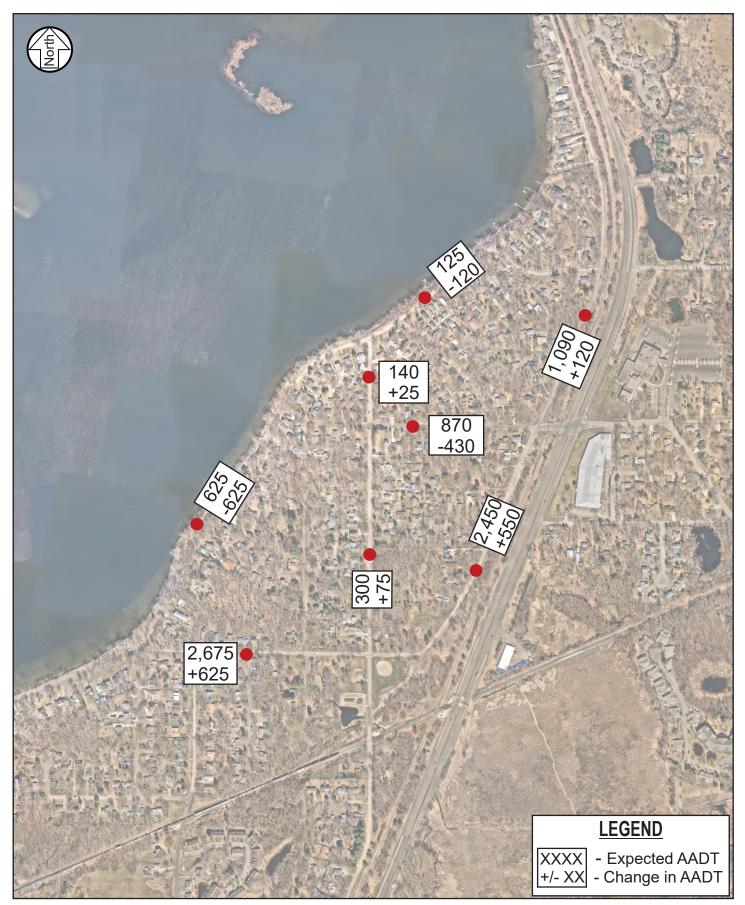

In this design, vehicle traffic is changed with the closure of the northbound lane on Bald Eagle Boulevard and the eastbound lane on Taylor Avenue. The forecasted impacts on the daily vehicle traffic volumes are shown in Figure 2. As shown, the bulk of the traffic is expected to divert to Park Avenue and Hugo Road. It is not expected that there will be any significant traffic operational impacts from the lane closure as daily volumes are expected to be well below the daily thresholds for two-lane roadways.

With the lane closures, mailboxes and trash pickup would need to be moved to the west side of Bald Eagle Boulevard and the north side of Taylor Avenue in order to be accommodated by postal and waste service vehicles. Limiting the roadways to one-way traffic can also negatively impact the response times of emergency services going to some of the homes in the design area, as they will now have slightly longer routes to these homes, depending on location.

### **Closing Southbound and Westbound Lanes**

In this design, vehicle traffic is changed with the closure of the southbound lane on Bald Eagle Boulevard and the westbound lane on Taylor Avenue. The forecasted impacts on the vehicle traffic are shown in Figure 3. As shown, the bulk of the traffic is expected to divert to Park Avenue and Hugo Road It is not expected that there will be any significant traffic operational impacts from the lane closure as daily volumes are expected to be well below the daily thresholds for two-lane roadways.

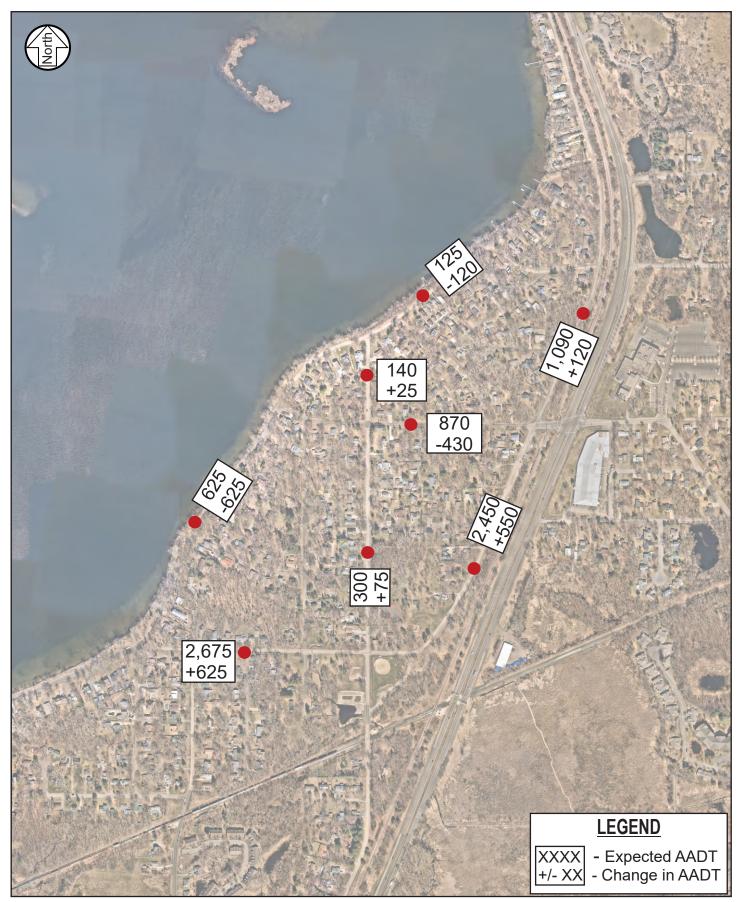

With the lane closures, mailboxes and trash pickup would need to be moved to the south side of Taylor Avenue in order to comply with the postal and waste service vehicles. Limiting the roadways to one-way traffic may also negatively impact the response times of emergency services going to some of the homes in the design area, as they will now have slightly longer routes to these homes. This alternative would appear to least impactful to adjacent properties.

#### Questions

Feas? Constructable as drawn? Does grading work?

- Is trail (with CZ) contained within existing ROW? R/W? Wall? Could a wall make trail feasible?
- PE? Would PE be required to build XS?

Y = reasonable cross section, N = excessive grading (into lake or house)

Y = Trail in ROW, N = Extends beyond Ex ROW

Y = Makes trail feasible (May still have lake access or other impacts), N = wall not necessary

- Y = PE required for trail + CZ, N = PE not required
- Would TE be required to build XS? TE?
- Y = TE required for grading, N = TE not required

#### Summary

Walls required majority of segment, difficult to meld this with exising lake access, however no impacts on the house side TS1

TS2 Some walls but not pervasive, maintains existing lake access improvements, appears to fit OK

TS3 Only a slight improvement from TS1

TS4 A slight improvement from TS2 but still requires walls, reduced wall benefit doesn't outweight loss of grassy boulevard

Eliminates most walls from TS2, easements still required, implements one way and jurisdictional transfer TS5

TS6 Improves TS5 but still walls and easements

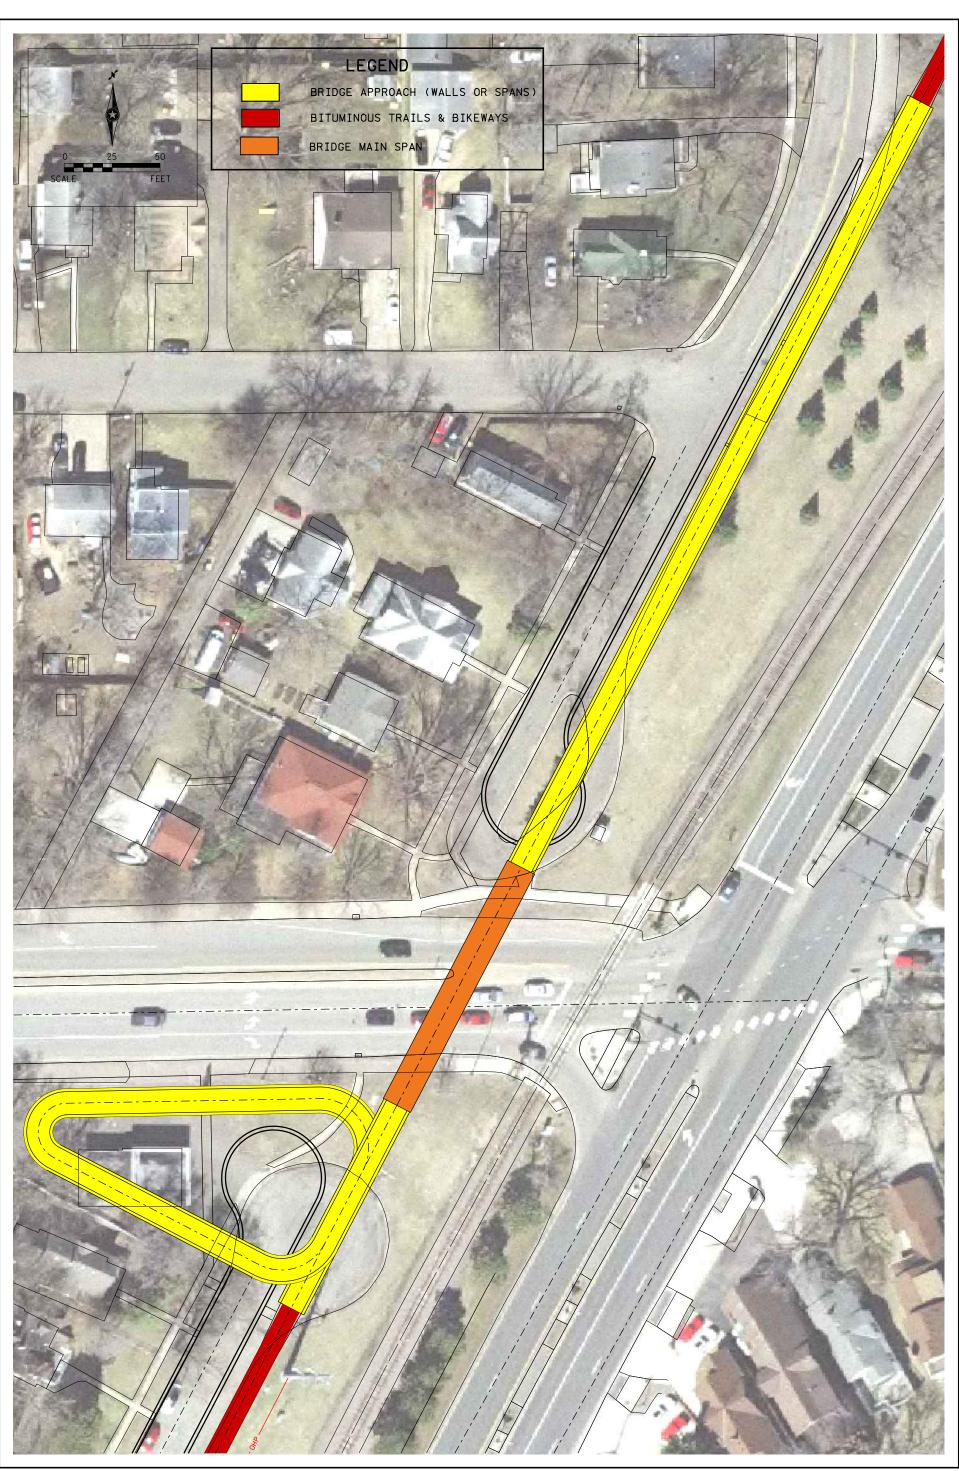

Some improvement from TS1 and TS3 but same issues largely remain, could be worth presenting for NIMBY reaction TS7

#### Recommendations

Present TS2, TS5 and TS7 as alternatives for public comment

Don't see reason (at this point) that high school alignment needs to be shared

Appendix D – Drainage Memorandum

#### SRF No. 14110

# To: Scott Yonke Ramsey County From: Jacques DuVal, PE David Filipiak, PE Date: June 13, 2022 Subject: Bruce Vento Trail (Phase 2) Preliminary Drainage Design - Technical Memorandum

Memorandum

### 1.0 Purpose & Background

SRF Consulting Group, Inc. was retained by Ramsey County to provide technical assistance in preparing the preliminary drainage design for the Bruce Vento Trail (Phase 2) project, which will provide trail facilities in the City of White Bear Lake. This project will also include other modifications to the corridor including converting sections of Bald Eagle Boulevard and Hugo Road to one-way streets.

This memorandum documents the preliminary drainage design of the stormwater treatment system that will support the proposed roadway improvements and meet the current requirements of the regulatory agencies. The Drainage Overview Map (DOM) in Appendix A includes the preliminary drainage design elements of this project.

### 2.0 Data Collection

The following data was reviewed during the preliminary design:

- Topography and planimetrics Provided by Ramsey County
- Bald Eagle Boulevard record plans Provided by Ramsey County
- Hugo Road record plans Provided by White Bear Township
- Storm sewer map and GIS data Provided by City of White Bear Lake
- Contour data From SRF survey and LiDAR data
- Soil data From the United States Department of Agriculture (USDA) Web Soil Survey
- Drinking water supply management area (DWSMA) From the Minnesota Department of Health (MDH).
- Flood Insurance Rate Maps (FIRMs) From the Federal Emergency Management Agency (FEMA) and confirmed by Rice Creek Watershed District.

Scott Yonke Ramsey County

### **3.0 Regulatory Environment**

The project corridor is located within the City of White Bear Lake and White Bear Township. It is also within two watershed organizations, Rice Creek Watershed District (RCWD) and Vadnais Lake Area Watershed Management Organization (VLAWMO). The city is the local government unit (LGU) for water resources-related permitting within the VLAWMO, but defaults to VLAWMO's standards. The project is designed to meet requirements as they currently are defined in the RCWD Rules and VLAWMO Water Management Policy. The next phase of design is not anticipated to begin for several years, during which time the regulatory environment may change and should be reviewed prior to progressing design. The regulatory information included in this technical memorandum addresses the stormwater management and floodplain permitting but does not include wetland permitting information.

Runoff from the corridor flows to Lambert Creek and Bald Eagle Lake. Coordination has taken place with the RCWD and VLAWMO and will continue through final design. Additional coordination will be required with the city on stormwater management during the final design phase.

Water resource related permits required at this time include:

- City of White Bear Lake Stormwater Management and Erosion and Sediment Control Permits
- RCWD Stormwater Management and Erosion and Sediment Control Permits
- VLAWMO The City is the LGU for water resources related permits, but the VLAWMO will be included on all submittals.
- Minnesota Pollution Control Agency (MPCA) National Pollutant Discharge Elimination System (NPDES) Construction Stormwater General Permit, and the associated Stormwater Pollution Prevention Plan (SWPPP).

The City of White Bear Lake, RCWD, VLAWMO, and the MPCA NPDES permit guide the stormwater management approach for this project. Appendix B summarizes the stormwater requirements.

### 3.1 Rate Control

Runoff from the project corridor is routed via storm sewer and drainage ditches ultimately discharging to the receiving waters noted above. RCWD and VLAWMO require discharge rates for the 2-, 10-, and 100-year storm events to be less than or equal to existing peak discharge rates using the Atlas 14 rainfall magnitudes. Existing and proposed HydroCAD models were developed to determine the scale of rate increases within the limits of disturbance. Only the impervious areas within the limits were considered at this stage. Major outflow points are identified on the Drainage Overview Map located in Appendix A, HydroCAD modeling summaries are in Appendix C and a summary of discharge rates are included in Appendix D. In general:

• Where BMPs are proposed, it is expected that they will provide attenuation for the increased rates, however this will need to be confirmed with more detailed modeling during final design.

Scott Yonke Ramsey County

- At Highway 96 the downstream storm sewer system will need to be reviewed to confirm if it has capacity for the slight increase in rates or if surcharging within the storm sewer structures is acceptable. If it does not, an underground rate control BMP may be required.
- BMPs are not proposed along Bald Eagle Lake. Additional coordination with the watershed will be required to confirm if the increase in rates to the lake is acceptable, or if rate control measures will be required.

#### **3.2 Volume Control**

The proposed project will also be required to meet the City, RCWD, VLAWMO, and the NPDES volume control requirements as shown in Appendix E. RCWD and NPDES requires treating the volume of runoff equal to 1.0-inch over the new impervious area or 0.5-inch over the new and reconstructed impervious area, whichever is greater, while the City and VLAWMO requires treating the volume of runoff equal to 1.1-inch over the new impervious area or 0.55-inch over the new and reconstructed impervious area, whichever is greater. Where feasible, infiltration is encouraged in both RCWD and VLAWMO. NPDES only counts infiltrated volume towards their requirements. VLAWMO calculates volume control credits based on guidance provided by the MN Stormwater Manual. A soils investigation will be conducted to determine the soil types and estimated groundwater levels within the proposed treatment locations. Information from USDA's Web Soil Survey is included in Appendix F.

#### **3.3 Water Quality**

RCWD and the NPDES Construction permit have water quality requirements for projects with one or more acres of new or reconstructed impervious surface. RCWD requires that Total Suspended Solids (TSS) shall be removed to the maximum extent practical. Additionally, they require adequate pretreatment measures to removed sediment upstream of biofiltration/infiltration practices. The NPDES permit requirement is to treat the water quality volume equivalent to 1" of runoff from the new impervious surface in a permanent BMP if infiltration is infeasible. Filtration systems must be designed to remove at least 80% of TSS.

#### **3.4 Groundwater**

Groundwater elevations will be confirmed with soil borings along the corridor. Due to proximity to Bald Eagle Lake and several wetlands, groundwater elevations are expected to be shallow in some locations.

Portions of the Bruce Vento Trail (Phase 2) project are located within a Drinking Water Supply Management Area (DWSMA), which require further review for the use of infiltration practices. Areas adjacent to the railroad crossing at Bald Eagle Boulevard, near Eagle St by Bald Eagle Lake, and the southernmost portion of the project are in high-risk zones. Scott Yonke Ramsey County

**3.5 Floodplains** 

Floodplain boundaries were identified within the project corridor by reviewing Federal Emergency Management (FEMA) Flood Insurance Rate Maps (FIRMs) and confirmed by RCWD. The only mapped boundary is at Bald Eagle Lake. While there is the potential for some modifications at existing outlets to the lake, no impacts to the floodplain are anticipated with this project. See Appendix G for FIRMs.

### 4.0 Preliminary Drainage Design

The project can essentially be split into two by watershed, VLAWO to the south of the high school and RCWD to the north. This section provides a detailed discussion of the two areas.

### 4.1 Bruce Vento Trail (Phase 2) - VLAWMO

### 4.1.1 Existing Conditions

Lincoln Avenue, from Whitaker Street to Highway 96, is a mix of rural and urban roadway. Project runoff drains to adjacent grassy areas, with the low point in the road draining into a low-lying residential property. The low-lying area appears to drain away via a culvert and will eventually reach Lambert Creek via an existing buried 96" RCP that runs from 5<sup>th</sup> Street in White Bear Lake and Ditch 13.Bald Eagle Avenue is primarily urban with several storm sewer networks picking up runoff water and connecting to the city storm sewer system, ultimately discharging to the Ditch 13 system.

### 4.1.2 Proposed Conditions

This project will add pedestrian facilities adjacent to Lincoln Avenue starting at the intersection with Whitaker Street and continuing along Bald Eagle Avenue until the watershed terminus near the White Bear Lake High School. Lincoln Avenue will be fully reconstructed in conjunction with the trail work, and Bald Eagle Avenue will have some new or reconstructed curb and gutter along the east side of the road.

Several potential BMP locations have been identified, as shown in Appendix A. In several locations, the proposed BMPs will take on existing impervious areas, in addition to the proposed impervious, to meet the water quality volume requirements. Basin W1, south of Lincoln Avenue, is sized to provide water quality volume for Lincoln Avenue and is expected to provide for rate control. Basin B1, just north of Highway 96, is expected to provide water quality volume and rate control for the Birch Lake Avenue Trunk and Highway 96 area. Basin B2 will require coordination with the White Bear Lake Area High School. Pond B3, adjacent to the railroad, is intended to be a dry or wet pond a wet pond for rate control and water quality.

Additionally, from the intersection of Bald Eagle Avenue and 4<sup>th</sup> Street to Bald Eagle Boulevard and Park Ave, the project will follow State Aid requirements. In this region new storm sewer will be

needed where curb and gutter is added, and a spread analysis will be required to confirm if new inlets are required in the areas with existing curb and gutter.

#### 4.2 Bruce Vento Trail (Phase 2) - RCWD

#### 4.2.1 Existing Conditions

Within RCWD, Bald Eagle Avenue is primarily rural, with some segments of existing curb and gutter. From 12<sup>th</sup> St to Ridgewood Avenue, the runoff drains towards a series of wetlands and low-lying areas around the SOO Line railroad crossing. These wetlands drain to Bald Eagle Lake through a judicial ditch crossing under Bald Eagle Boulevard between Short Street and Buffalo Street.

North of Ridgewood Avenue. There are some short segments of storm sewer pipe that connect runoff from Bald Eagle Avenue, Bald Eagle Boulevard, and Taylor Avenue discharging directly to Bald Eagle Lake.

Hugo Road is a rural roadway with ditches on both sides of the road. These ditches drain to Bald Eagle Lake through a judicial ditch crossing approximately 700 feet north of Taylor Avenue, a handful of drop inlet connections, or directly to the lake near the Bald Eagle Park and Boat Launch. In the park, trails drain to a series of wetlands, ultimately discharging to the lake.

#### 4.2.2 Proposed Conditions

New curb and gutter will be added to Bald Eagle Avenue, from 12<sup>th</sup> Street to Bald Eagle Boulevard, and Bald Eagle Boulevard, Bald Eagle Avenue to Park Avenue. Along Bald Eagle Boulevard, from Park Avenue to Taylor Avenue, and Taylor Avenue, from Bald Eagle Boulevard to Hugo Road, the northern lane will be converted to trail, with new curb and gutter to the remaining one-way route. Bald Eagle Boulevard has recently had a mill and overlay project, so the project intends to minimize disturbance to only what is needed for the new trail.

Hugo Road has two alternatives: the preferred alternative, where eastern lane will be converted to trail with some bump outs for parking. This alternative is the basis for the computations in this Report. The other alternative would maintain two-way traffic along Hugo Road but would require a wall for several hundred feet to provide space for the trail at pinch point with the railroad to the east. In the Preferred Alternative, the one way will stop at a proposed cul-de-sac near the entrance to the southern parking lot for the Bald Eagle Lake Park and Boat Launch, which will also allow access to the new one-way portion of Hugo Road. South of the proposed cul-de-sac the trail will cross and into the park and add or reconstruct existing trail north until it terminates at N County Line Road E.

Pond B3 will receive runoff from Bald Eagle Avenue and will require coordination with the White Bear Lake Area High School. The pond is located adjacent to the railroad and is intended to be a dry or wet pond for rate control and water quality.

No BMPs are proposed along Bald Eagle Boulevard, Taylor Avenue, and Hugo Road due to the limited space within the public right of way. Furthermore, much of the proposed work along the lake is considered exempt from water quality requirements. Either the proposed work does not impact the roadway's underlying aggregate base or the trail is 10 feet wide or less with a vegetated down gradient at least 5 feet wide, both of which are also exempt. There is potential for structural pretreatment devices to be added at existing discharge points along the lake to provide some water quality benefits, as shown in Appendix A. Exact locations will need to be worked out in final design.

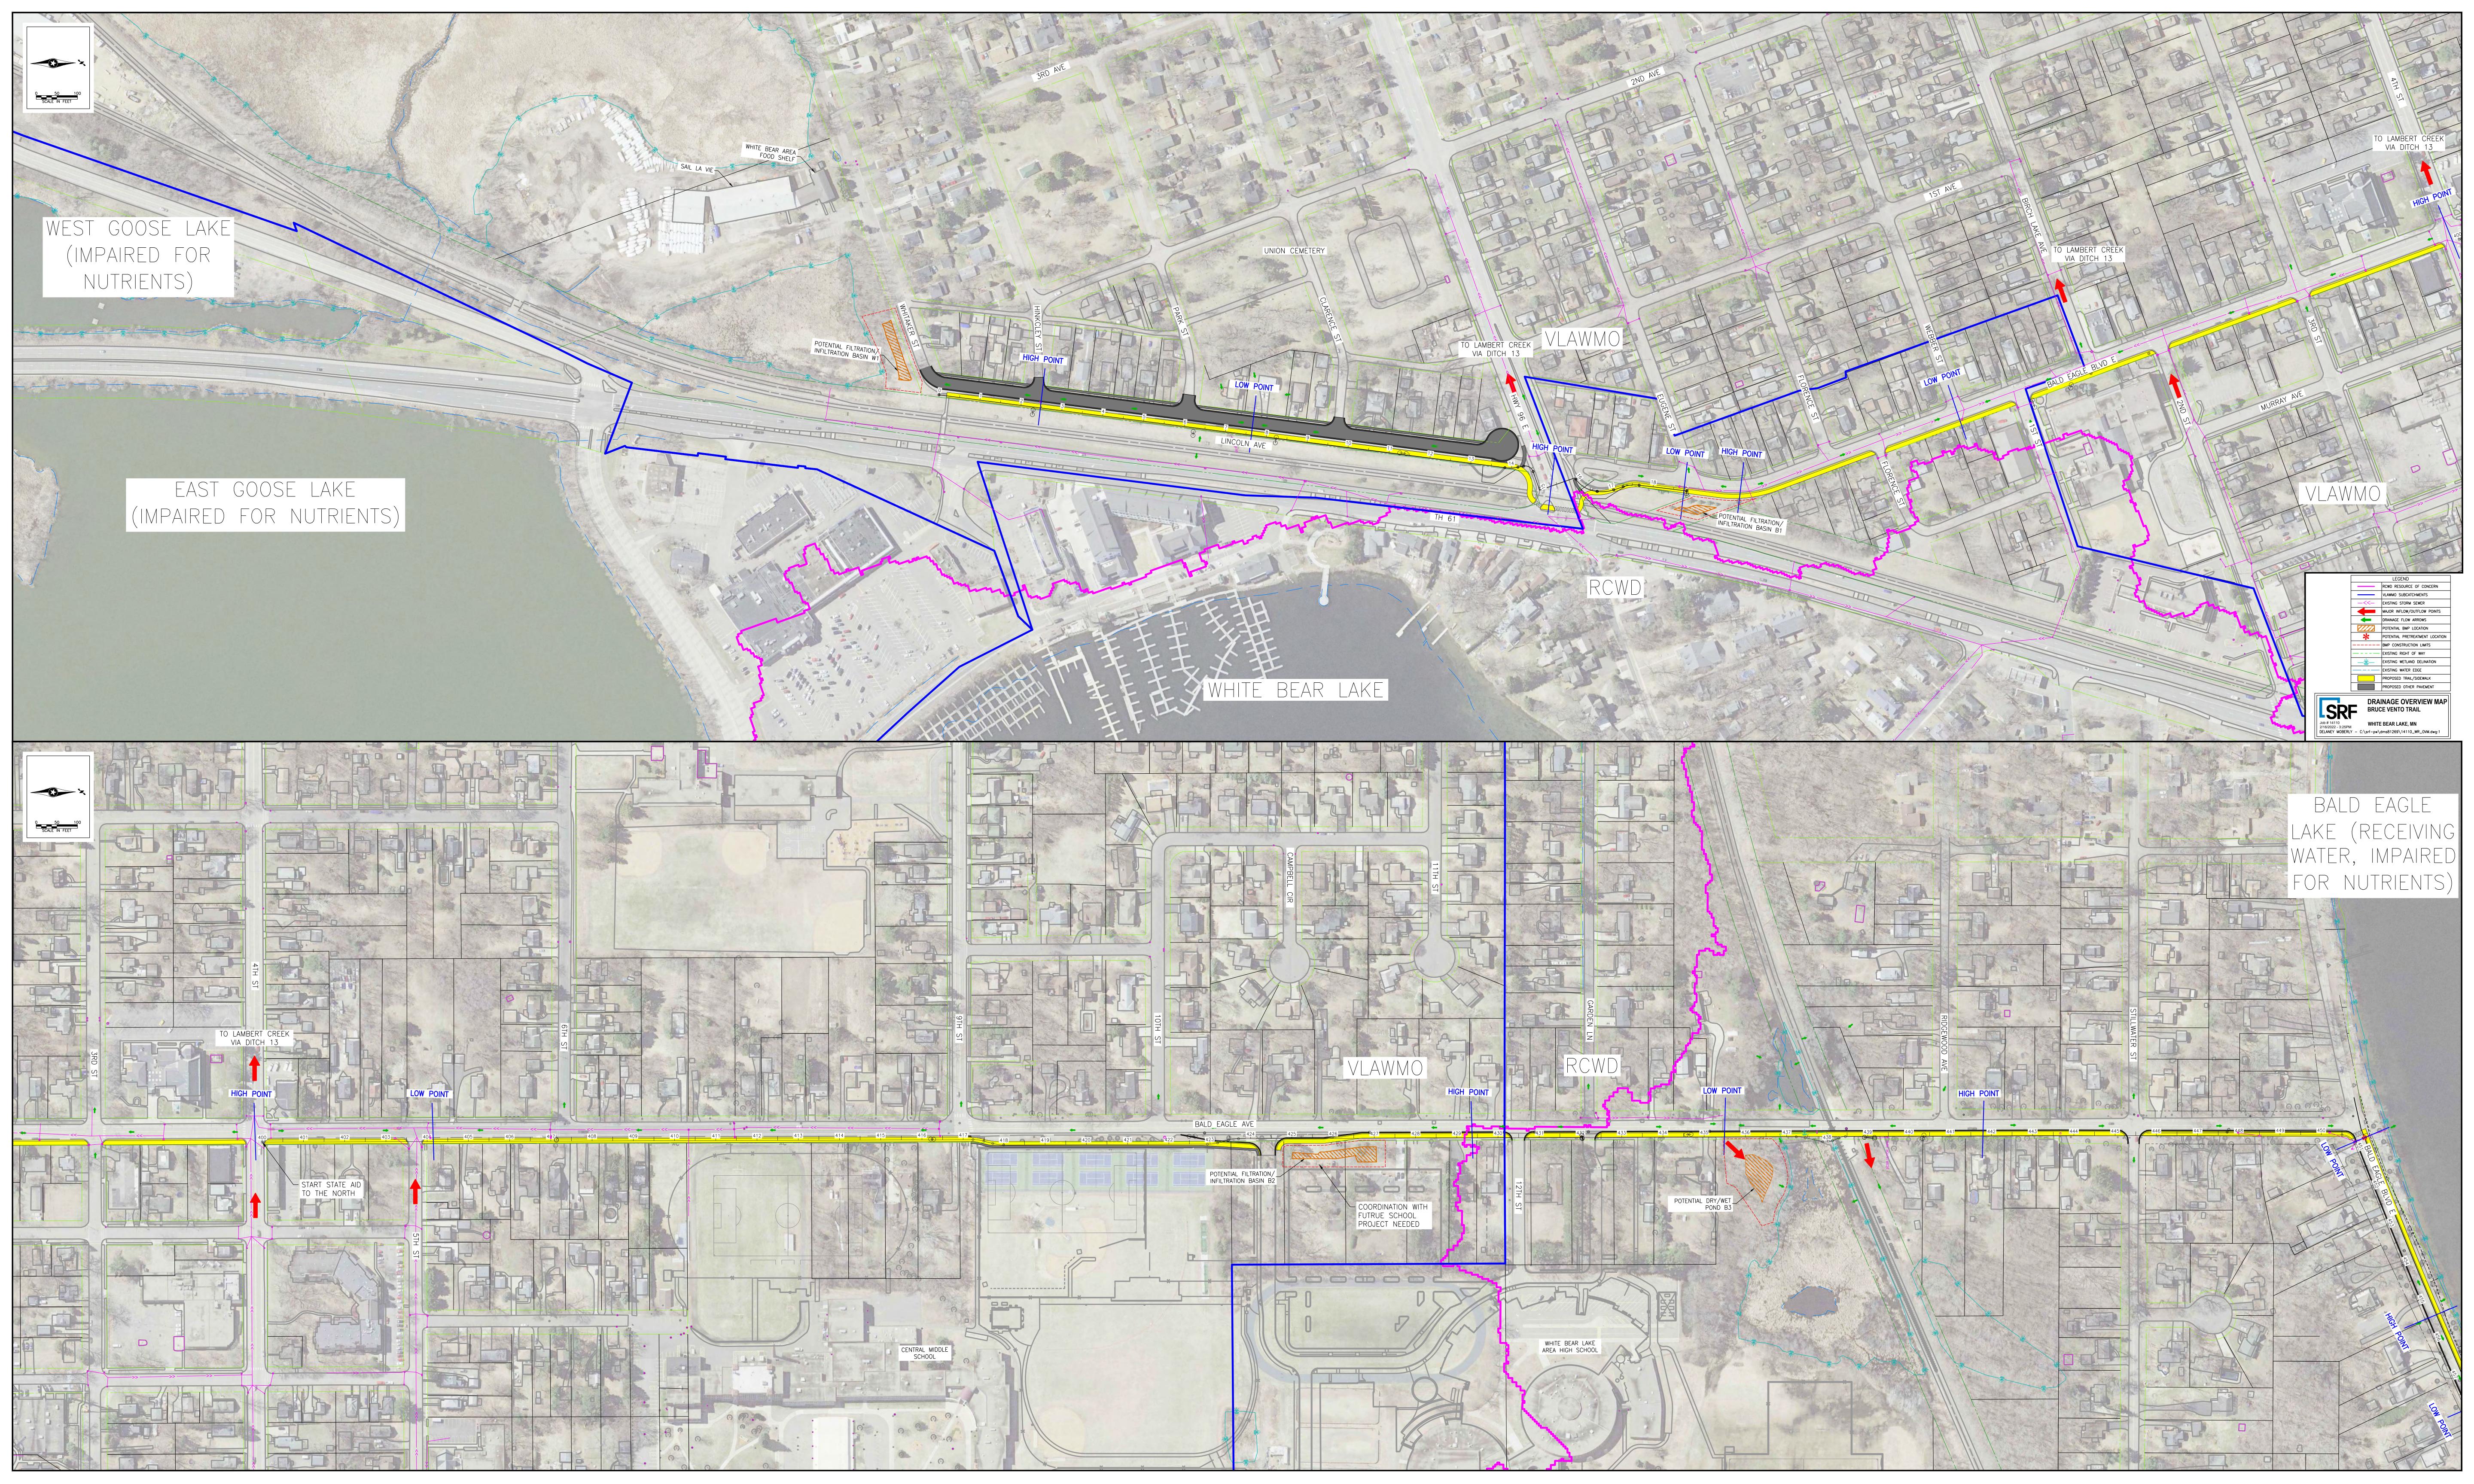

Along Hugo Road new storm sewer will be required to reach existing ditch systems. Ditches on the east side will require regrading to maintaining positive drainage adjacent to the railroad. Within the Bald Eagle Lake Park and Boat Launch, two possible BMPs are shown. Basin H2 could provide for all the water quality volume needs within RCWD but Basin H1 was left as a potential BMP.

### 5.0 Next Steps

Through collaboration with the project stakeholders throughout the preliminary design process, further important issues and next steps in the design process have been identified. These include the following:

- The project will need to confirm soil conditions by conducting soil borings at the BMP locations.
- Confirm wetland impacts once wetland survey and report are available.
- Obtain additional survey and storm sewer information and refine as needed.
- Confirm proposed BMPs can reduce rates by refining the HydroCAD modeling.
- Review capacity of downstream systems where BMPs are not proposed. If increased rates are not acceptable confirm that oversized storm sewer can be used to reduce rates.
- Coordinate with the White Bear Lake Area High School on potential BMPs.
- Review regulatory environment at time of final design for changes to the requirements
- Confirm impervious calculations are still valid, particularly the definition of reconstructed impervious

### Appendix B – Regulatory Requirements

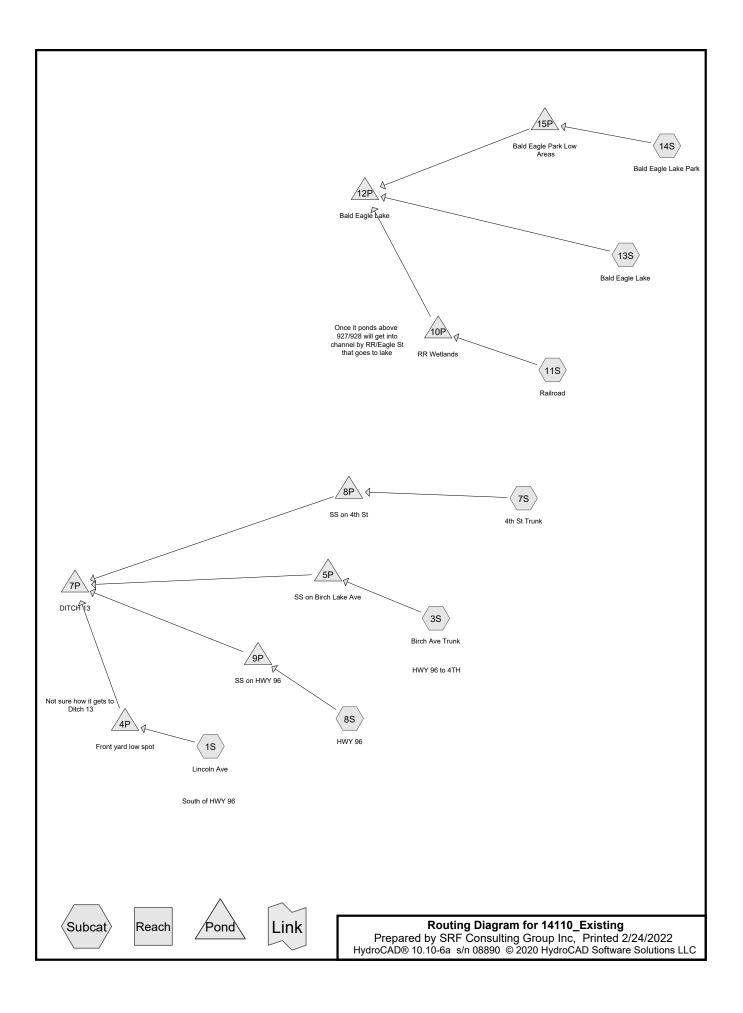

#### Bruce Vento Trail (Phase 2) - Preliminary Design REGULATORY CRITERIA FOR STORMWATER ISSUES

ENTITY	SURFACE WATER RATES	SURFACE WATER QUANTITY	SURFACE WATER QUALITY
<ul> <li>Minnesota Pollution Control Agency via the NPDES Permit Program</li> <li>Required for construction activity that disturbs greater than 1 ac.</li> </ul>	• N/A	<ul> <li>Abstraction of the first 1 inch of rainfall from the site's new impervious surface or 0.5 inch of rainfall from the site's new and fully reconstructed impervious surface, whichever is greater.</li> <li>Pretreatment must be used before filtration/infiltration.</li> </ul>	<ul> <li>Water quality volume is equal to 1 inch of runoff from the new impervious surfaces.</li> <li>Permanent pond volume of 1800 CF/acre of storage below the outlet pipe.</li> <li>Water quality volume maximum discharge shall be no more than 5.66 cfs per acre of pond surface area at the water quality volume.</li> <li>Filtration systems must be designed to remove at least 80% of TSS.</li> </ul>
<ul> <li>Rice Creek Watershed District</li> <li>Required for public linear projects that create or reconstruct 1 acre or more impervious.</li> <li>Sidewalks and trails 10' or narrower with 5' plus width downstream vegetated strip are exempt from stormwater permit requirements.</li> </ul>	<ul> <li>No increase for 2-, 10- and 100-year storm peak discharge rate.</li> </ul>	<ul> <li>Greater of 1.0 inch of runoff from new impervious surfaces OR 0.5 in of runoff from new and reconstructed impervious surfaces.</li> <li>For a public linear project, treatment volume for reconstructed impervious must be provided only to the extent feasible.</li> <li>If infiltration is feasible, on-site or regional BMPs much provide volume control. If not feasible, any BMP may be used.</li> <li>Compensatory storage required if filling more than 100 cu yards into a floodplain.</li> </ul>	<ul> <li>Runoff from all new and reconstructed impervious surface must be captured and treated for total phosphorus if feasible. Undisturbed impervious may be treated in lieu of disturbed pavement if draining to the same Resource of Concern</li> <li>For all untreated surfaces, TSS must be removed to the maximum extent practical.</li> <li>Biofiltration/infiltration measures require adequate pretreatment measures to remove sediment upstream of the BMP.</li> </ul>
<ul> <li>City of White Bear Lake</li> <li>The City is the regulator on stormwater management, however, it follows the same requirements as the Vadnais Lake Area Watershed Management Organization</li> <li>Permit required for 10,000 square feet or more of new or reconstructed impervious.</li> </ul>	<ul> <li>No increase for 2-, 10- and 100-year storm peak discharge rate.</li> </ul>	<ul> <li>Greater of 1.1 inches of runoff from net increase in impervious area OR 0.55 inch of runoff from new and fully reconstructed impervious surfaces.</li> <li>Infiltration is encouraged</li> </ul>	<ul> <li>Volume control credits calculated per the Minnesota Stormwater Manual</li> </ul>

ENTITY	SURFACE WATER RATES	SURFACE WATER QUANTITY	SURFACE WATER QUALITY
Vadnais Lake Area Watershed	• No increase for 2-, 10- and 100-year		Volume control credits calculated
Management Organization	storm peak discharge rate.	net increase in impervious area OR 0.55 inch of runoff from new and	per the Minnesota Stormwater Manual
<ul> <li>Permit required for 10,000 square feet or more of new or reconstructed</li> </ul>		fully reconstructed impervious surfaces.	
impervious.		<ul> <li>Infiltration is encouraged</li> </ul>	

Reconstructed Impervious: The removal of an impervious surface such that the underlying structural aggregate base is effectively removed, and the underlying native soil exposed.

## Description

Hydrologic soil groups are based on estimates of runoff potential. Soils are assigned to one of four groups according to the rate of water infiltration when the soils are not protected by vegetation, are thoroughly wet, and receive precipitation from long-duration storms.

The soils in the United States are assigned to four groups (A, B, C, and D) and three dual classes (A/D, B/D, and C/D). The groups are defined as follows:

Group A. Soils having a high infiltration rate (low runoff potential) when thoroughly wet. These consist mainly of deep, well drained to excessively drained sands or gravelly sands. These soils have a high rate of water transmission.

Group B. Soils having a moderate infiltration rate when thoroughly wet. These consist chiefly of moderately deep or deep, moderately well drained or well drained soils that have moderately fine texture to moderately coarse texture. These soils have a moderate rate of water transmission.

Group C. Soils having a slow infiltration rate when thoroughly wet. These consist chiefly of soils having a layer that impedes the downward movement of water or soils of moderately fine texture or fine texture. These soils have a slow rate of water transmission.

Group D. Soils having a very slow infiltration rate (high runoff potential) when thoroughly wet. These consist chiefly of clays that have a high shrink-swell potential, soils that have a high water table, soils that have a claypan or clay layer at or near the surface, and soils that are shallow over nearly impervious material. These soils have a very slow rate of water transmission.

If a soil is assigned to a dual hydrologic group (A/D, B/D, or C/D), the first letter is for drained areas and the second is for undrained areas. Only the soils that in their natural condition are in group D are assigned to dual classes.

Aggregation Method: Dominant Condition Component Percent Cutoff: None Specified Tie-break Rule: Higher

# Appendix G – FEMA Floodplain Mapping

# NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The community map repository should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or floodways have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) Report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS Report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study Report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study Report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study Report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was Universal Transverse Mercator (UTM) zone 15. The horizontal datum was NAD 83, GRS 1980 spheroid. Differences in datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

NGS Information Services NOAA, N/NGS12 National Geodetic Survey SSMC-3, #9202 1315 East-West Highway Silver Spring, Maryland 20910-3282 (301) 713-3242

To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713- 3242, or visit its website at http://www.ngs.noaa.gov.

Base Map information shown on this FIRM was provided for Ramsey County by Farm Services Administration, dated 2004 and captured at a resolution of one meter.

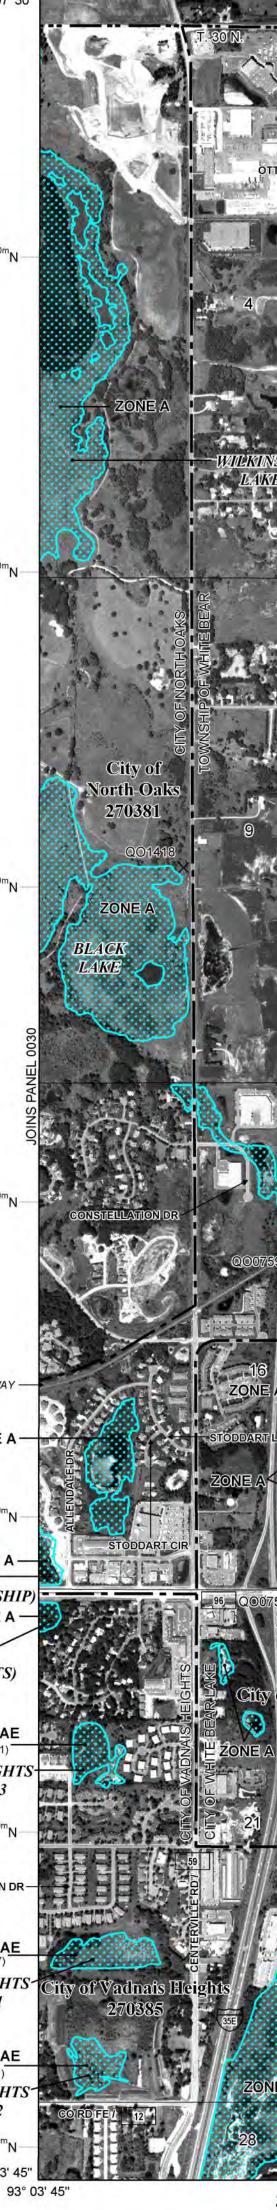

The profile baselines depicted on this map represent the hydraulic modeling baselines that match the flood profiles in the FIS report. As a result of improved topographic data, the profile baseline, in some cases, may deviate significantly from the channel centerline or appear outside the SFHA.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations

Please refer to the separately printed Map Index for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

Contact the FEMA Map Service Center at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at http://msc.fema.gov.

If you have questions about this map or questions concerning the National Flood Insurance Program in general, please call 1- 877- FEMA MAP (1-877-336-2627) or visit the FEMA website at http://www.fema.gov/business/nfip/.

TOTAL PROJECT COST (OPENING YEAR DOLLARS)				\$1,452,800		\$1,181,600		\$1,381,900		\$321,650		\$789,700		\$304,350		\$763,750		\$823,100		\$7,018,850

NOTE:

Includes aggregate base class 5 and PASB or OGAB, as appropriate.
 Includes aggregate base class 5 and earthwork.
 Does not include pavement edge drains, see separate item.
 Does not include excavation or backfill.
 Assumes Mn/DOT Standard Plan Sheet designs; does not include excavation or backfill.
 Does not include Moment Slab.
 Does mot include moment slab and concrete barrier.
 Ticludes moment slab and concrete barrier.
 Tie back system required for exposed retained heights greater than 15 Feet. This cost is additional to the item for temporary steel sheet pile.

Utility Agreements based upon: R/W Acquisitions based upon:

### Bruce Vento Regional Trail - Phase 2 - Two Way Alternative on Hugo Road

Concept Cost Estimate (based upon 2020 bid price information) Prepared By: SRF Consulting Group, Inc., June 14, 2022

## Introduction

## Purpose of the public engagement plan

This public engagement plan (PEP) articulates the engagement goals, strategies, key audiences, and schedule for three rounds of community outreach and engagement. The PEP will promote adaptable and dynamic engagement strategies that can be refined throughout the process.

Engaging residents and stakeholders will be critical to the success of this project. The project will look to build upon the county's robust public engagement efforts and to integrate the input from multiple agencies and community perspectives into the design. Through respectful conversations with stakeholders and the public, we can better understand the needs of the community and respond with creative, constructible solutions that will help to ensure successes for the Bruce Vento Regional Trail. Successful engagement will help to ensure that regional trail improvements are high quality community spaces for all people, all ages, and all abilities.

Public engagement is a dynamic process; as such, this plan is considered a living document and will be updated to reflect input received from project partners, stakeholders, and the public as the project progresses. This document will be developed with the Project Management Team's (PMT) input and serve as a guide for all phases of engagement.

## **Community understanding**

Bruce Vento was a long-time congressman from the 4th District who was a passionate environmental advocate for Minnesota and the nation. The Bruce Vento Regional Trail was established to celebrate his advocacy and share his passion with others in the community.

The Bruce Vento Regional Trail is envisioned as a 13.3-mile trail from east side of downtown Saint. Paul to the north County boundary in White Bear Township. This project would complete a major gap in Metropolitan Council Regional Bike Transportation Network and the National US Bike Route 41 (USBR 41) by furthering the design process for the final 3.5 miles of the corridor.

The preferred conceptual route between Whitaker Street and County Road J primarily utilizes Bald Eagle Avenue, Bald Eagle Boulevard, Taylor Avenue and Hugo Road; an alternative route would traverse the White Bear Lake High School property and use a section of Division Street and Park Avenue to connect to Hugo Road. **Ramsey County will work to**  incorporate input from residents and stakeholders with a racial equity lens to develop this critical link of regional trail to connect pedestrian and bicycle facilities in the County between Whitaker Street and County Road J. This is a challenging project with many traffic, design, utility, and stakeholder issues to work through.

Some of the key objectives of this project include:

- Preparing schematic and preliminary plans to strengthen the County's chances for future grant requests.
- To obtain meaningful input from stakeholders living near the project corridor through highly interactive and engaging public involvement activities.
- Create high quality community spaces that promote user experiences for all people, all ages, and all abilities.
- To provide a regional trail facility and site amenities that complement the areas natural resources and incorporate sustainable and resilient design.
- Provide trail connections to Rush Line BRT and downtown White Bear Lake.

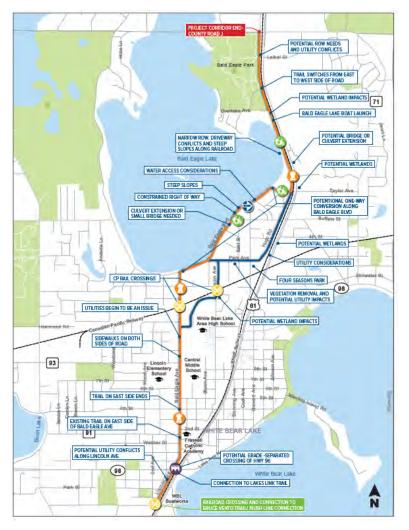

Figure 1: Project Context Map

## **Engagement Approach**

We understand the Bruce Vento Regional Trail is an important community asset, and we want to ensure new trail connections benefit residents and businesses, and neighborhoods within project corridor while also drawing new audiences to the regional trail system. Throughout the process, we are committed to advancing the best practices of the International Association for Public Participation, propose a visually appealing engagement approach designed to inform, engage, and involve a wide variety of community stakeholders.

SRF will prepare for and facilitate three rounds of outreach and engagement at key phases of the project. Engagement will be threaded throughout the project to build community awareness and participation as well gather key input needed to develop community supported trail alternatives. Each round of engagement will include a community meeting, online engagement opportunities, targeted outreach, and comprehensive project promotion.

- Round 1 engagement Project awareness, challenges, and opportunities.
- Round 2 engagement Seek input on potential trail alignment design concepts.
- Round 3 engagement Seek input on a preferred trail alignment design concept.

Inclusive engagement strategies are critical to reaching the diverse community and business stakeholders in the project area. Ultimately, our engagement approaches will remain responsive and context-sensitive to the needs of Ramsey County residents, Bruce Vento trail users, and a broad set of area stakeholders.

### **Engagement during the COVID-19 pandemic:**

During the COVID-19 pandemic, we have learned that engagement must be adaptable and outreach efforts need to go the extra mile to ensure broad representation and accessible opportunities to participate. We believe engagement is most effective when it blends in-person interactions with online information sharing opportunities. As engagement progresses, the project will look to pair interactive online engagement platforms with options to conduct socially distant in-person engagement in various formats.

We will continue to monitor State and local health guidelines and will be prepared to refine engagement to best reach stakeholders in a safe, fun, and effective way. Across engagement activities, our public engagement toolbox is adaptable to ensure similar experiences in-person and online at each phase of outreach for the Bruce Vento regional trail improvements.

## **Stakeholder Identification and Engagement**

The following list includes stakeholders that have been identified as key agencies that will need to be engaged during the project. Anticipated meetings will include, but are not limited to:

- Ramsey County Parks and Recreation (2 meetings)
- Ramsey County Public Works (2 meetings)
- Municipal meetings (2 meetings)
- Watershed Districts (RCWD & VLAWMO) (2 meetings)
- BNSF/CP Railroads (1 meeting)
- Ramsey County Regional Rail (1 meeting)
- MnDOT (1 meeting)

In addition to monthly PMT meetings, SRF will set up, attend, facilitate, and summarize project meetings with key agencies and project stakeholders.

## **Resident Engagement Strategies**

The project will utilize a suite of online engagement tools to inform, involve, and collaborate with the public. All engagement materials will be translated to ensure accessibility. Tools and strategies that will be used to engage the public include:

- Community Meetings (virtual, hybrid or in-person)
- Pop-Up Events (in-person or passive engagement)
- Focus Groups (virtual or in-person)
- Online engagement (website/surveys/social media)

All initial engagement activities will be conducted virtually due to COVID-19 restrictions. Our approach can be tailored to respond to current health guidelines and to ensure that a wide variety of community members are informed and able to participate.

## **Community Engagement Meetings:**

We recommend at a minimum three open house meetings (virtual or in-person). Community meetings will include informational displays, handouts, input opportunities (i.e., surveys or comment forms) and presentations to facilitate thoughtful conversations with the public. These events will be planned in coordination with the County and their partners to promote input and feedback opportunities. Promotional strategies include a project newsletter, press release, social media campaign, and website content for each round of engagement. Meeting summaries, including attendee lists and comments received (verbal and written), will be distributed electronically within one week.

SRF will prepare for and facilitate three community meetings at key phases of the project. Our engagement staff will prepare visually appealing project materials as well as traditional and digital promotional strategies. We have successfully facilitated a wide variety of community meetings since the start of the pandemic and our hybrid approaches are designed to ensure accessibility for all, including translation services, accessible web design standards, and targeted outreach.

- Community Meeting 1 Project Awareness, Challenges and Opportunities.
  - Focus on gathering early community input while also communicating project goals.
  - Important considerations include the potential trail alignment, safety considerations, and opportunities to ensure a high-quality community amenity for all.
- **Community Meeting 2** Seek Input on Schematic Graphic Plan Concepts.
  - Develop up to three plans showing alternative trail options, identifying site impacts and major project elements while providing estimate costs for each alternative.
  - Create a matrix to illustrate the development of these plans.

- **Community Meeting 3** Seek Input on Preferred Graphic Plan.
  - Share a preferred trail alignment and an associated project cost estimate. Preferred trail alignment is based on feedback received from technical discussions with project stakeholders and input received through the public engagement process.

## **Focus Groups:**

In addition to hosting virtual or hybrid community meetings, the project will also facilitate four focus group meeting with stakeholders and residents representing specific topic areas. We propose two sets of two focus group meetings with area businesses and trail advocates at key phases of the project. Specific focus group topics and engagement strategies will be determined with input from the PMT.

Focus group meetings are anticipated to be hosted virtually. Zoom has proven to be an effective and comprehensible online meeting platform used to host a variety of remote calls and video conferences. The platform includes features like an interactive "white board" and online polling to help facilitate engagement.

These meetings will help to inform the design of the project and seek to build upon existing stakeholder relationships to communicate project goals, objectives, and outcomes with key audiences. SRF staff will prepare for and facilitate all components of the focus group meetings.

## **Pop-up Meetings and Passive Engagement:**

The project will also look to host two socially distant outdoor pop-ups and/or prepare fun and visually appealing passive engagement materials along the Bruce Vento trail. Popups and vibrant passive engagement materials have proven to be low cost and highly effective strategies for communicating with key audiences. We have had great success pairing pop-up engagement events with in-person and online project surveys to ensure meaningful, inclusive, and timely public input opportunities.

## **Communication Strategies**

We understand promoting engagement opportunities is more important than ever. We recommend sharing regular project updates and promoting input opportunities via community newsletters, traditional media, website updates, and targeted social media. SRF will offer translations of key materials into Hmong and Spanish to better facilitate community understanding of the project and its goals. Communications will correspond with engagement events, with regular updates to the project website. SRF staff will develop project communications in collaboration with our in-house graphic designers.

## **Ramsey County Social Media Policy:**

Content and communication with the public will adhere to Ramsey's County's <u>social</u> <u>media policy</u>, which is outlined below.

Ramsey County maintains social media pages to share information of public interest with our residents, businesses, and visitors. As part of our effort to be a transparent and inclusive organization that is accountable to its residents, we encourage you to engage with us. You have a voice in your government and your participation helps us be more efficient and effective at providing services and information.

The county's social media pages are considered a moderated discussion and not a public forum. In the spirit of community, please note we reserve the right to hide or delete comment(s) that include:

- Profanity or hate speech.
- Personal attacks of any kind.
- Advertisements or solicitation.
- Deceptive or misleading content.
- Promotion of illegal activity.
- Comments that are clearly off topic in response to a particular post.

All engagement materials, including social media and promotional content, will follow Ramsey County brand guidelines: <u>link</u>

Throughout the project, we look forward to developing fun, inviting, and vibrant engagement materials that encourage public participation and advance a welcoming atmosphere for all current and future trail users.

# **Engagement Timeline**

A detailed engagement timeline will be prepared for each round of engagement. The timeline will include a schedule for developing and reviewing materials, promotional strategies, web content, notification periods as well as public input opportunities.

\*Round 1 engagement anticipated to begin in June 2021.

Appendix H - Sample Survey #1

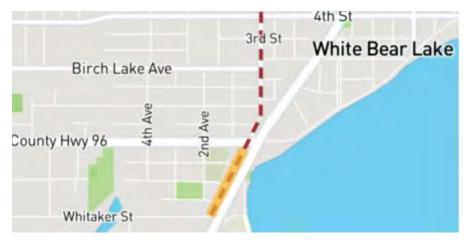

#### Bruce Vento Regional Trail Extension – Phase 2 Survey October 2021

We would like your input as we work to develop the preliminary design of an extension to the Bruce Vento Regional Trail. Please take this short, 12-question survey.

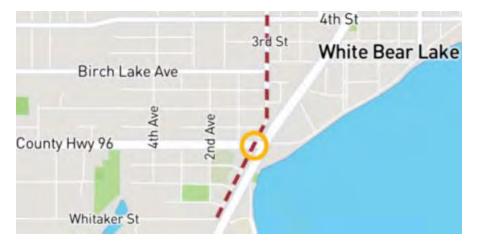

Ramsey County is re-envisioning the Bruce Vento Regional Trail as a 13.3 mile trail from downtown Saint Paul to the county boundary in White Bear Township. This phase of the Bruce Vento Regional Trail extension will stretch the last 3.5 miles of the corridor between Whitaker Street and County Road J. The map below shows the preferred regional trail corridor for this extension that was selected as a result of the public engagement process from September 2018–2020.

The current design intends to cross Highway 96 at the existing signalized intersection at Highway 61. A pedestrian bridge is being considered as a long-term safety improvement as part of a future phase.

- 1. Would you be concerned about the narrowing of Lincoln Ave. and the potential loss of on-street parking (see map above, the segment of Lincoln Ave. is shown in yellow)?
  - Not concerned
  - No preference
  - Very concerned

- In your opinion, if safe bicycle and pedestrian access can be accomplished with improvements at road-level, is a pedestrian bridge over Highway 96 still urgent? (See map above.)
- o Not very urgent
- o No preference
- o Very urgent
- **3**. Please share any additional thoughts or comments to help shape the planning for this potential bicycle and pedestrian crossing improvement at Highway 96.

The project is evaluating the trail route along Bald Eagle Avenue and Bald Eagle Boulevard.

- 4. How important is it that existing road shoulders north of the high school remain in place once the project is constructed?
- o Prefer to maintain shoulders
- o No preference
- o Prefer to reduce property impacts

The project is evaluating several options for routing the Bruce Vento Regional Trail along Bald Eagle Boulevard.

- 5. Do you have a preference for which side of the road a trail would be located along Bald Eagle Blvd.?
- o Lake side
- o No preference
- o House side
- 6. How do you feel about converting a portion of Bald Eagle Blvd. to one-way? (Park Ave. to Taylor Ave. see map above.) Please note: If converted, one-way traffic would travel in the northbound direction and impacts of the new trail would remain primarily within the boundaries of the existing roadway.
- o Strongly oppose
- o No preference
- o Strongly favor

- 7. Do you prefer that Bald Eagle Blvd. remain a two-way road with trail if that means impacts such as acquiring more road right of way to fit a trail will occur?
- o Yes, I prefer a two-way road with additional impacts
- o No preference
- o No, I prefer a one-way segment with less impacts

Do you have any additional comments about routing a trail along Bald Eagle Blvd.?

- In your opinion, is there a significant need for parking on the east side of Hugo Road, between Taylor Ave. and the Bald Eagle picnic area? (Segment shown in yellow on the map above.)
- o Yes, there is a significant need for parking on east side of road
- o Unsure / No preference
- o No, there is not a significant need for parking on east side of road
- 9. An off-road trail will not fit in this segment (shown in yellow on map above). A concrete sidewalk could be placed on the east side for pedestrians. How do you feel about sharing the roadway with bikes along Hugo Road, between Taylor Ave. and the Bald Eagle picnic area?
- o Okay with sharing roadway with bikes, pedestrians on sidewalk
- o Unsure / No preference
- o Prefer separated facility for bikes and pedestrians

- 10. What amenities would you like to see along the trail? Check all that apply.
- o Benches
- o Trash / recycling receptacles
- Bicycle repair stations
- Wayfinding signage
- Other: please specify \_\_\_\_\_\_
- 11. In addition to the Lake Avenue Trail and Highway 96 Regional Trail, are there other important trail connections you would like to see connected with the Phase 2 Bruce Vento trail extension?

12. Do you have safety concerns or comments about other bicycle and pedestrian roadway crossing locations along the proposed route of the Phase 2 Bruce Vento trail extension?

#### About You

- Native American
- o Other \_\_\_\_\_

Please share your email if you would like to sign up for project updates.

Appendix I - Sample Survey #2

Based on feedback from the community and discussions with stakeholders, Ramsey County has updated and finalized a proposed alignment for the Bruce Vento Phase 2 extension. The recommended alignment is available to review at ramseycounty.us/VentoPhase2.

- 1.) We'd like to know where you live in relation to the Bruce Vento trail. What option below best describes where you live? See the map graphic to help identify your location. (\*make this question required.)
  - 1) Bald Eagle Ave (red)
  - 2) Bald Eagle Blvd E (purple)
  - 3) Bald Eagle Blvd W (yellow)
  - 4) Hugo Rd. (green)
  - 5) White Bear Lake, but outside of project area (pink)
  - 6) White Bear Township, but outside of project area (grey)
  - 7) Ramsey County, but outside of project area (dashed line shows county boundary)
  - 8) Other:

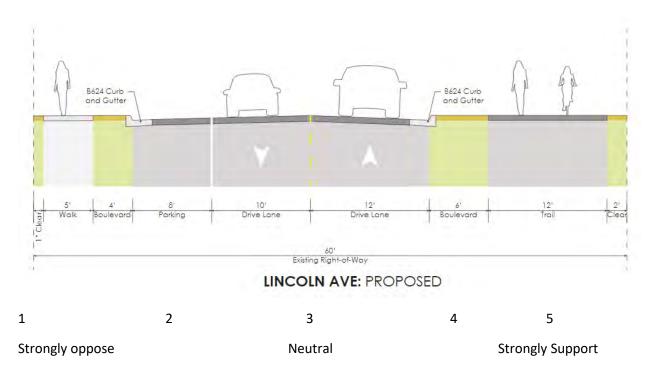

The Phase 2 Extension of Bruce Vento Regional Trail will extend from the intersection of Whitaker St. and Lincoln Avenue up to County Road J. We have heard a range of perspectives about the

recommended placement. The next five questions will help us understand your level of support for each segment of the proposed alignment:

- Lincoln Avenue
- Bald Eagle Avenue
- Bald Eagle Boulevard E
- Taylor Avenue
- Hugo Road to County Road J

2.) What is your level of support for the proposed alignment of Lincoln Avenue?

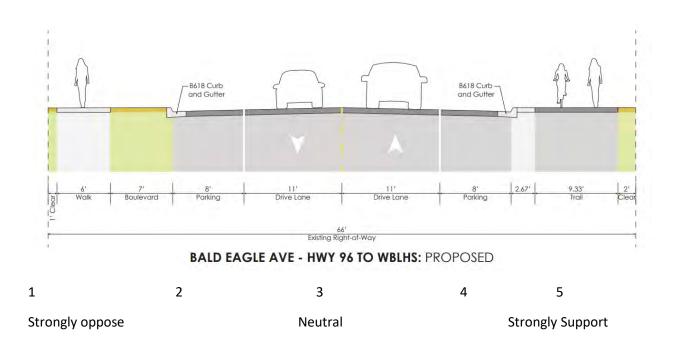

The road would be reconstructed to provide a narrowed roadway that includes a new sidewalk on the west and new trail on the east side of the road. Parking would be removed from the east side of the road.

Comments:

3.) What is your level of support for the proposed alignment of Bald Eagle Avenue (Hwy 96 to White Bear Lake High School)?

The existing trail and sidewalk will be widened to the extent possible while remaining within the existing right of way. On-street parking remains on both sides of the road.

Comments:

4.) What is your level of support for the proposed alignment of Bald Eagle Avenue (White Bear Lake High School to Bald Eagle Lake)?

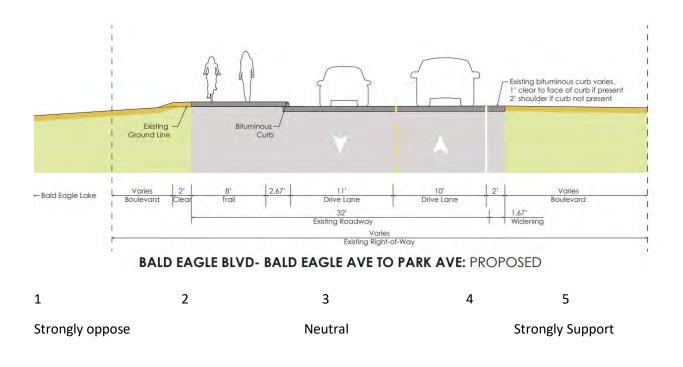

The east side of the road would be narrowed to accommodate a typical 10-foot trail. The trail typically remains within the road right of way with a new railroad pedestrian crossing and utility relocations as needed. On-street parking would be removed from the east side of road.

Comments:

5.) What is your level of support for the proposed alignment of Bald Eagle Blvd E to Park Avenue?

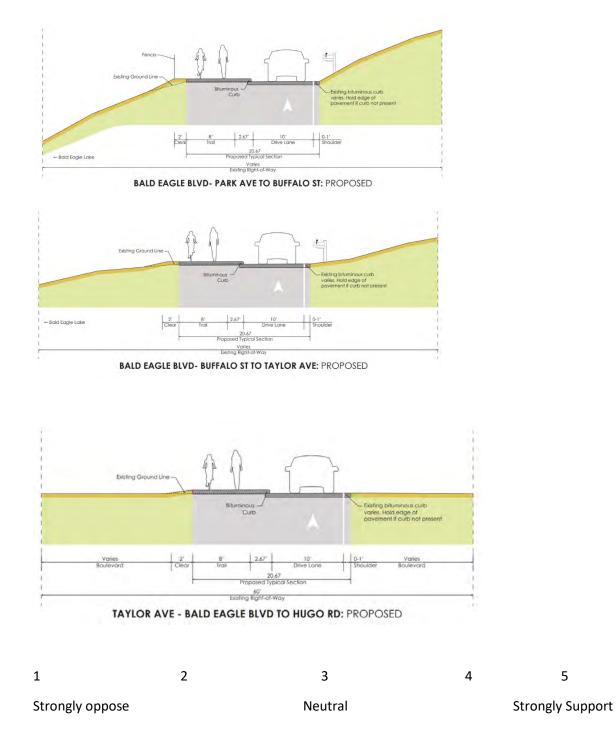

The recommended placement includes an 8-foot trail with a 2-foot paved boulevard at back of curb. The trail would run along the north, or lake side of the road. From Bald Eagle Avenue to Park Avenue the road would remain a two-way with the new trail included within the existing roadway footprint to the extent possible. On-street parking would be removed. There may be a need for added retaining walls and fencing in some locations. Grading may occur within the existing road right of way.

Comments:

Along Bald Eagle Blvd from Park Avenue to Taylor Ave and out to Hugo Rd, the preferred alignment recommends converting the road to a one-way, with northbound vehicle traffic only. Removal of an existing vehicle lane provides the space required to add a new trail while remaining within the existing roadway footprint. A one-way design would reduce impacts to private property and remove fewer trees, while maintenance responsibilities would be turned back to the local jurisdiction. Along Bald Eagle Blvd E. there may be a need for added retaining walls and fencing in some locations. Grading may occur within the existing road right of way. We would like to know how you feel about converting a portion of Bald Eagle Blvd. to one-way.

6.) What is your level of support for the proposed alignment from Bald Eagle Blvd E from Park Avenue to Hugo Road?

#### Comments:

7. Would you prefer that Bald Eagle Blvd E. remain a two-way road with an added trail, even if that means impacts such as acquiring more road right of way to fit a trail?

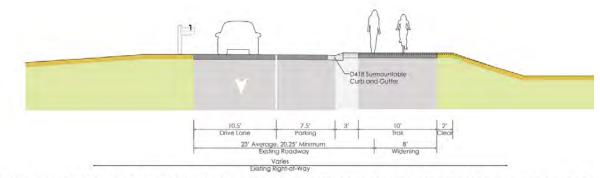

- Yes, I would prefer Bald Eagle Blvd E. remain two-way with additional right of way acquired.
- No, I support the recommended one-way design.

- I do not support the recommended alignment under any circumstances.
- No preference.

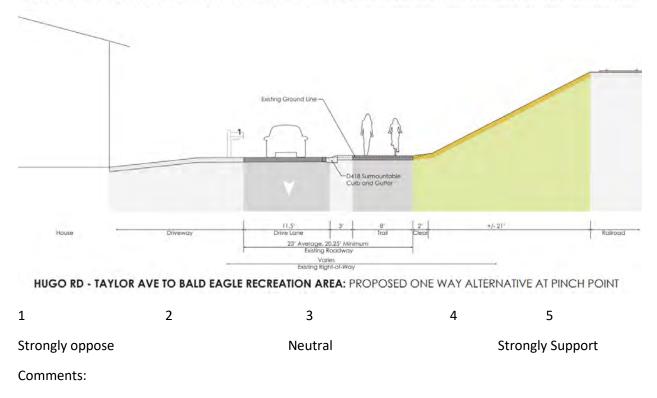

As the trail merges onto Hugo Road, the project is evaluating two alternatives, a one-way and two-way vehicle lane option. In both, the south segment of Hugo Road will include a 10-foot trail with 2-foot paved boulevard at the back of curb on the eastside of the road.

8.) Hugo Road one-way: In the one-way option, the trail narrows to 8 feet wide at a pinch point. Removal of the southbound vehicle lane in the one-way alternative allows the project to minimize impacts to the railroad embankment.

What is your level of support for the proposed alignment from the intersection of Taylor Avenue/Hugo Road to County Road J?

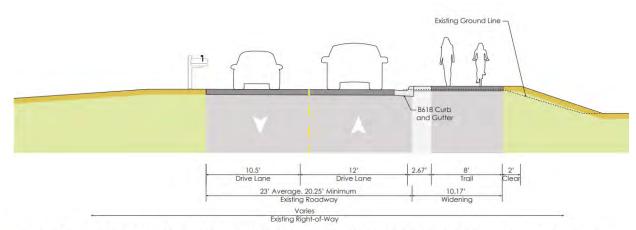

HUGO RD - TAYLOR AVE TO BALD EAGLE RECREATION AREA: PROPOSED ONE WAY ALTERNATIVE AT PARKING BAY

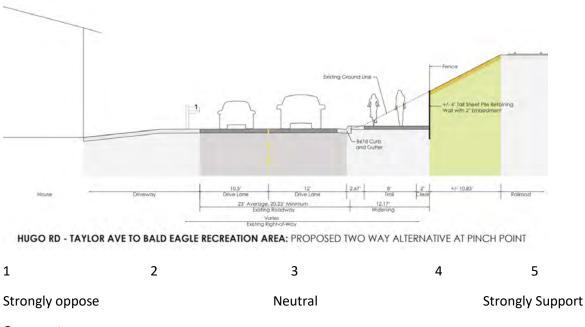

9.) Hugo Road two-way: A two-way alternative will require retaining walls, fencing and additional impacts to railroad embankment near the pinch point.

What is your level of support for the proposed alignment from the intersection of Taylor Avenue/Hugo Road to County Road J?

HUGO RD - TAYLOR AVE TO BALD EAGLE RECREATION AREA: PROPOSED TWO WAY ALTERNATIVE

Comments:

10.) Do you have any additional comments or questions regarding the Phase 2 Extension of the Bruce Vento Regional Trail? Please include your name and contact information if you would like a response to your questions or comments.

Comments:

10/21/2021	Email Comments	I am out of town but want to voice my opinion of the Bruce vento expansion. I live on the south end of bald eagle lake I grew up on White Bear Lake and dealt with the one-way traffic which was great for a while but then i just turned into a constant public misance people walking by your house all the time sitting in your yard throwing garbage people stopping by your house constantly to talk to you it was not private at all the bile path is so overcrowded on Lake Ave. Baldeage is a mantel rake by taking a lot of our Land away by the lake it will take away the simple beauty. Will properly taxes be absorbed by the public since there is a possibility we lose property? With all the building in Hupo, the traffic will have to remain on highway 61 which is already impossible to enter at times. Before living on white bear lake lived on a side road off bald eagle lake. It has remained a quiet up north feel community and I wouldn't change it.	Hi Lori, Thank you for inquiring about the Phase 2 Bruce Vento Project and your comment below. Just so you are aware, all information that will be presented at the open house will also be available on the project website today prior to the meeting. There should also be an online survey available today as well. See below for the web link. https://www.ramseycounty.us/residents/parks-recreation/planning- construction-restantion/Pruce-web-regional-trail-extension- %E2%80%93-whitaker-street-county-road-j.
10/21/2021	Email Comments		
10/21/2021	Public Open House - 2	Please feel free to call me or stop by to see what I am talking about. Scott Yonke, I am completely against the bike trail. I believel am the person who would be most impacted by this proejtci. I live on Taylor Ave as you come around the curve off allot Eagle Bivd. This is where the road becomes a 2-way road. I bought my house 5 years ago and fel in low with it due to privancy, beautifur tees and the quite beauty of the lake. If my ard is impacted by the bike trail I can literally hand the bikers bottled water as they go by, out of my window. I worked very hard for my house. I am a single woman and fel every safe in my neighborhood, this nincrease of bikers going by Moo an literally look into my living room that changes everything for me. We are a close neighborhood, people know and respect eachther. I don't believe this right place for a bike goard in don't how awnown in our neighborhood, who for this. I don't think people living by the lake would enjoy haing their privacy impacted by these bikers either.	
10/01/2021	Public Occas Hause 2	I love it! Enthusiastic support. I have been in the neighborhood ten years and have often wished that the lake road would be turned into a one-way plus trail, like Lake Ave. on White Bear Lake. We often waik along the lake and there	
10/21/2021	Public Open House - 2	are places where you cannot get off the road when cars come. Good luck!	
10/21/2021	Public Open House - 2	No way - one way. Put the trail on a non-residential area like acrosss Hwy 61 on the west side. No to Bald Eagle Lake with mature trees and houses too close to the street This proposal is not a good fit for our residential neighborhood. A single family quiet neighborhood is not designed to have a regional trail! Any trail should go on Long Ave. to Hugo Rd. Long Ave. has wide ROW and parallel to railroad	
		tracks. Where would parking occur on side streets for people who want to walk segments of the trail? Regional Trails fit better on abandoned RR lines. Maybe it's too early to try and ram a trail into our community. Any one-way restricts	
	Public Open House - 2 Public Open House - 2	access to many houses. Wait until you have an acceptable routel for those of us that live in White Bear Township this project with extension of the BRT is a NO. We don't want this trail in the township for many reasons. To list a few, negatively affects the Bald Eagle Lake with water quality changes, new impervious surface, water rate changes all that do not meet standards aftendy. There is a ready flooding along the lake roads in the spring with rundf. Negatively impacts property, encreaching, taking people's land, removal of trees. Thousands of these into a small neighborhood. No alternative path. It should be declined in White Bear Township.	
		In favor of one-way trail configuration between Park and Taylor. This will be safer for bikers and pedestrians, especially In winter, Provide a defined path for walkers and bikers (many individuals and bike groups pass in concern numbers along this stretch of read). This will provide safer walking for opeds, specially in winter. More year round foct/bike	
10/21/2021	Public Open House - 2	traffic. Bikes on pathway, not road.	
10/21/2021	Public Open House - 2	I would recommend making all of Taylor Ave a one-way. Current design has 2-way from Hugo Road to Shadyside Lane.One-way would be better. Thanksi 1 I ride this route frequently a couple times a week in the summer. Great choice for the Bruce Vento alignment. Please either widen to include bikes along Hugo Rd or maintain Hugo Rd as well as trail (surprised huwer) knocked a tooth	
10/21/2021	Public Open House - 2	out yet on that road!) Please also provide a welcoming and obvious connection to the high school campus. Thank you for all your hard work. GET 'ER DONE! :)	
	Public Open House - 2	In recent years, a few options have been considered to <u>extend</u> the Bruce Vento Trail. This is the best option! Trails improve people's lives, physically and emotionally. It's time to do this.	
	Public Open House - 2	I favor the route along Bald Eagle Lake nearby residents have easy and convenient to south bound roads. 2. Even if you do nothing: RE PAVE HUGO ROAD!!!! Hugo road has to be the worst road in Ramsy County! So bad you can't ride a bile on it for fear of your theeth slamming into eachother and shattering 3. this trail w/the trail along the lake will be a boon to the tonship much as the lake way that is eachother and shattering 3. this trail w/the trail along the lake will be a boon to the tonship much as the lake way path is the city of WBL is 14. Work with the state to add a crosswalk on the north side of county I/J2Dth and Hwy 61. For bikers is the current crosswalk and walk button- you end up riding against traffic on the west side of G1. Dangerous IAdd ac crosswalk button in the north side of a J1 Hbank S1.	
	Public Open House - 2	Thank you for the opportunity to review this information per our discussion with staff, we are very concerned with the loss of large trees around the lakeside which will negatively impact the egles in the area. There are large Oak trees that the eagles fest from. Adding with the cooton wood & large trees also concern over the loss of all the lakeside parking. There are so many utilities - the old path would not be nearly as expensive to relocate	
		My wife and I are in favor of this design. We have kids and are very athletic and would love to share the views and the road on BALD EAGLE. My only request would be to have the road on house side running north + trail on lakeside. So its	
10/21/2021 10/21/2021	Public Open House - 2 Public Open House - 2	not cross intersections & safe to travel. Also would be appered to widing road more than a few feet. NO,NO,NO, that should cover it!!!	
10/21/2021	Public Open House - 2	Love the walking and bike trail on the R.R. tracks. No one way Streets!	
10/21/2021	Public Open House - 2	Plan as presented is far too tight on Baid Eagle Bivd. E. If you take as much shoreline as you are showing you will take out all of the treats. Comment from one of the consultants was it was right of ways. Regardless, he impact is too great for the gain. A blike trail can go along route the does not have so much impact. The first portion of baid eagle blivd e will be two-way if the changes further up it is only going to increase traffic in this stretch. Cars already drive too fast, why can't trail go other side of high school where land already exists?	
10/21/2021	Public Open House - 2	<ol> <li>We are accepting of the oneway from park to Taylor 2. We prefer that the bike trail &amp; street not take any of our Blvd (requiring removal of granite steps) * We request you seriously consider the alternate routes Long Ave/Hugo Road.</li> </ol>	
	Public Open House - 2	TABLE PROJECT Please consider making Hugo (J to Taylor) road a one way for cars so that you can have a separate bike path & walking	
10/21/2021	Public Open House - 2	path- could be shared.	
	Public Open House - 2 Public Open House - 2	I think you need to hold a public forum to answer all the questions people have about what you are proposing. 1.) This needs to be brought in front of the people who live on these streets, and hold a public forum where people can get questions answerd. 2.) Please walk these streets and observe traffic and land in the area-see what is possible and what is note. A lot of this isn't possible. 3.) If all studies and funding are approved, consider a oneway on Hugo Road going north with trail closest to the homes, or better yet a culdesa cat the park-this would also decrease drug/illegal activity in the park if the you have one way out.	
10/21/2021	Public Open House - 2	Who is funding this? Have these plans been approved by the Rice Creek Watershed for Impermeable Surfaces? Evaluated Ramsey County Road traffic on Hugo Road? Space allowances for a trail on Hugo Road? What grounwork has been done for this? This needs to be tabled until all of these things are figured out, along with the rush line and drainage and space for traffic langes & a trail. No further discussion until these problems are solved.	
	Public Open House - 2 Public Open House - 2	I think this is a great idea for walkers, bikers, and community. Personally the oneway will also help w/ trffic w/ these walkers. Like the one-way, like the project	
		No need to do anything on Taylor Avenue. Literally makes no sense and will create congestion. Too many trees will be	
	Public Open House - 2 Public Open House - 2	taken out. Utilizie railroad sapce or Hugo Road. Please go back to the railroad and negotiate the land use for the trail. Fence the trail if necessary.	
10/21/2021	Public Open House - 2	This is a terrible project. I want nothing to do w/ Bruce Vento Trail. Prefer road turned back to township. No trail. No trees removed. No land taken. Contours not condusive to a trail. Prefer long Avenue, Eagle St, Hugo Road alignment.	
	Public Open House - 2	Good luck! Thank you [Anne?]. Need a bridge @ 96 and 61! The light at White[bear?] (SP?) will be problematic.	
	Public Open House - 2	Throughout this project, community engagement has been inadequate. It seems very complicated and impacts too many people's lives, land and ways around. Go back to the drawing board &	
	Public Open House - 2 Public Open House - 2	find a less invasive plan. My home is my forever home, leave it alone. opposed. This is unneccesary. There is so much and so many other priorities.	
10/21/2021	Public Open House - 2	This trail should be on a natural corridor not in a residental area. The road is narrow and it would not be easy for anyone to try & shove a walking path through – property would be lost and all of us would be affected in many ways. NO WAY ONE WAY! It seeve salone and follow a natural corridor-we need a public forum forum WTF come on.	

			The meeting format did a poor job of communicating all of the impacts this project will have on the residents of White	
			Bear Township. In general the entire project has not done a good job of community engagement. The majority of people are just starting to understand the negative impacts this will have on the local community. People see through	
			your check the box event. Removing 10 feet of green space along the south shore and replacing it with asphalt, the	
			removal of trees is a terrible idea in so many ways we cannot believe it is even being considered. Environmental,	
			erosion, runoff, tree removal, water quality, property values, etcare not even discussed. Input is not being heard. This route comes within 30' of people's front doors on Bt Ave North of the RR tracks and moves power lines closer to their	
			homes. One ways only move traffic to neighboring side streets increasing traffic in areas that is not able to handle the	
			increase. Loss of permeable land affects houses near the lake as everything from the HS goes toards Bald Eagle. Increased traffic & congestion added to what's already increasing due to the HS. Portraying this as the preferred route	
			is misleading. It isn't and never was. Portions of E Blad Eagle Blvd (Park to Taylor) can be made a one way without the	
10/21/2021	Public Open House 2		BVT. Nowhere along the 13.3 miles are homeownvers more negatively affected than in segment 4. Don't confuse safer streets with the need for the BVT.	
10/21/2021	Public Open House - 2		We strongly oppose using Bald Eagle and Taylor Avenues. (As do the comments added by local homeowners on the	
			website). Using the alternate route makes the most sense, less impact on our neighborhood. Thanks for your	
	Public Open House - 2 Community Survey 2 -October 20	021 02	considereation, the trail at street level.	
11/10/2021	Community Survey 2 -October	r 2021 Q2	road level crossing must be safe	
	Community Survey 2 -October		furthering punishing folks who must use 61.	
	Community Survey 2 -October Community Survey 2 -October		accident, especially with increased pedestrian traffic. Parking should be a priority as it is limited already. It's not at all clear how to provide safe bicycle and pedestrian access at road level here.	
	Community Survey 2 -October 20		A bridge would definitely be safe but in my opinion it could be part of a later improvement	
	Community Survey 2 -October		Intersection of major trunk thoroughfares brings high rates of speed to intersection, and neighborhood knows	
	Community Survey 2 -October Community Survey 2 -October		dozens and dozens of intersections that create opportunity for interaction with automobile traffic, not just at the loose. This makes sense as a trail, wild life corridor and pollinator area.	
	Community Survey 2 -October		abandon the plan to bring the path to bald eagle lake. Leave the township roads the way they are.	
11/10/2021	Community Survey 2 -October 20	021 Q2	already gets backed up.	
	Community Survey 2 -October		be heading straight into the blinding sun in early evening.	
	Community Survey 2 -October Community Survey 2 -October		pedestrians. That is an extremely busy intersection and drivers routinely "roll" through red lights.	
11/10/2021	Community Survey 2 -October	r 2021 Q2	pedestrian and bicycle access to downtown White Bear Lake and Linking with the Lake Avenue trail	
	Community Survey 2 -October 20		Terribly busy intersection already. Our only intersection that brings traffic coming from the west into downtown.	
	Community Survey 2 -October Community Survey 2 -October		Too busy, too fast of an intersection with added occasional railway traffic. pedestrian traffic should NOT be considered. The most safest designing should be considered first obviously	
11/10/2021	Community Survey 2 -October	r 2021 Q2	Need a bridge	
11/10/2021	Community Survey 2 -October	r 2021 Q2	would NOT be safe as drivers are already taxed here. A bridge is necessary.	
	Community Survey 2 -October 20 Community Survey 2 -October		96 is busy with speeders also. That is when they don't see pets and bikes. Very busy intersection. A pedestrian AND bicycle bridge is critical!	
	Community Survey 2 -October		Very busy intersection. A pedestrian AND bicycle bridge is critical! Would like to see planning to keep bikes away from cars on such a busy intersection.	
11/10/2021	Community Survey 2 -October	r 2021 Q2	signal to cross hiway. But how would you merge bridge users safely with walkers on the path with all the plantings and	
	Community Survey 2 -October 20		In favor of some pedestrian improvements but concerned with scale of bridge in location. Tunnel better option? that worse! Please consider better alternatives so that auto traffic will not be impacted.	
	Community Survey 2 -October 20 Community Survey 2 -October		that worse! Please consider better alternatives so that auto traffic will not be impacted. Always busy with pedestrians. A bridge would keep flow of traffic safe and flowing.	
11/10/2021	Community Survey 2 -October	r 2021 Q2	It would be nice to keep bikers off hwy 61, it isn't safe and they should not be riding there. A path could help this!	
11/10/2021	Community Survey 2 -October	r 2021 Q2	hard time giving pedestrians the right of way at this intersection. That's a very busy intersection, especially at rush hour. People will use this trail to commute as well as exercise after	
11/10/2021	Community Survey 2 -October	r 2021 Q2	work, creating road and trail traffic at the same time.	
			Long term a pedestrian bridge is ideal, but completing the trail and adding a bridge later if user volume warrants it	
11/10/2021	Community Survey 2 -October 20	021 Q2	seems like a reasonable use of funds. Long term, having a bridge is preferred, but completing the trail first is more important. Depends on how much use the	
	Community Survey 2 -October		trail gets.	
11/10/2021	Community Survey 2 -October	r 2021 Q2	We have had no trouble on bikes crossing Hwy. 61 at that location.	
			No stop light crossings are safe. Statistics should already prove they are inefficient and do not allow clear visibility of	
			pedestrians, bicycles, or motorcycles due to the poles, lights, and multiple lanes of traffic in every direction. They are at	
			best distraction filled places that encourage dangerous accidents that lead to more property damage and deaths.	
44/40/2024			Roundabouts with pedestrian and bicycle bridges are a much safer alternative that removes the direct crossing of traffic.	
11/10/2021

11/10/2021	Community Survey 2 -October 2021	02	Average bike rider does a poor job of stopping for cross traffic when on a bike path, so bridge is needed.	
			I would prefer a crossing slightly farther west of hwy 61 that would be more perpendicular to the roads with a possible	
11/10/2021	Community Survey 2 -October 2021	Q2	pedestrian crossing button if a bridge can't be installed.	
11/10/2021	Community Survey 2 -October 2021	Q2	The busy, complex intersection at 96/61 will be hard to make safe for pedestrians and cyclists at road-level.	
			Eastbound vehicles continuing east or turning south from Bald Eagle Blvd W onto Bald Eagle Ave will not anticipate	
			southbound bike traffic if Bald Eagle Ave trail portion is on west side. Alternatively, if trail is on east side of Bald Eagle Ave, westbound vehicles on Bald Eagle Ave E Blvd continuing west or turning south onto Bald Eagle Ave will not	
	Community Survey 2 -October 2021	Q7	anticipate southbound bike traffic.	
11/10/2021	Community Survey 2 -October 2021	Q7	Strongly opposed to Vento Trail along Bald Eagle Blvd	
			These are very leading questions. I much prefer the trail not be routed on Bald Eagle Blvd. at all. The decision to route	
	Community Survey 2 -October 2021	Q7	the trail on Bald Eagle Blvd. was the result of a flawed process in which most residents were unaware.	
11/10/2021	Community Survey 2 -October 2021	Q7	use park ave instead?	
			STOP! STOP!! STOP!!! This was a horrible, useless idea to begin with! What are you people doing? The busline?! The	
			horrendous high-school too? Does no one care at all about the people that actually live in the area?! NONE of them signed on or chose to make their home in the middle of some traffic-muddled, metropolis. We want a quiet place to live	
			just like everyone ride, but that desire sends to come in 2nd to whatever plans you people seen to be making.	
11/10/2021	Community Survey 2 -October 2021	Q7	PLEASE STOP!!!	
			Concerns on curbing that may impact water run off going into the lake	
			Concerns about parking for bikers, side streets can't handle parking, also West Bald Eagle can't handle parking as well	
11/10/2021	Community Survey 2 -October 2021	Q7	as the two small public areas on W. Bald Eagle at cross street West and the other at St. Anthony. This segment of road is popular with pedestrians and cyclists despite how unsafe it is. It will remain popular if the trail	
11/10/2021	Community Survey 2 -October 2021	Q7	is rerouted to avoid this stretch.	
			Residents currently utilize the available 'shoulders' for temporary parking of vehicles that are installing and removing	
11/10/2021	Community Survey 2 -October 2021	07	docks and lifts during spring and fall due to the steep banks, which requires equipment to remove and install. Will temporary parking still be available along this segment?	
	······			
			Bald Eagle to Park is a vastly different road than Park to Taylor. I suggest the County keep Bald Eagle to Park a two- way, but take as little as property as possible from Bald Eagle to Park, and reduce speed limits all along the entirety of	
			the trail. If the County is going to turn the modified road over to the Township anyway, lower speeds should not be an	
11/10/2021	Community Survey 2 -October 2021	Q7	issue, and should reduce the amount of land necessary to safely build a trail and road in close proximity.	
			Get off the Boulevard. Do not cut trees, take land. This project is so wrong on so many levels. The wind on the road 8	
			months out of the year is cold and miserable. The amount of bike traffic BVT will generate in a neighborhood is a safety	
			hazard for people backing out of driveways and crossing to docks. You had a better route off the boulevard, justify why you changed? You also ask loaded questions. Never the option of not interested in this project at any cost. Shame on	
11/10/2021	Community Survey 2 -October 2021	Q7	you changed. You also as todated questions. Never the option of not interested in this project at any cost. Sname of you for the lack of transparency, arrogant attitude in taking peoples properties, and complete lack of consideration.	
11/10/0004	Community Suniou 2 - October 2021	07		
11/10/2021	Community Survey 2 -October 2021	ų/	Definitely shouldn't make wider there. Also, shouldn't have two way in the earlier section you didn't ask about.	
			Bald Eagle Blvd E is NOT a place for a trail. It is hilly, has some blind curves and has no place to add roadway. Some	
			homes are already close to the street and to think you can add a trail on the lake side between Park Ave and Taylor	
			streets, means people planning this trail have not set foot in the area. There are drop off cliffs up by Taylor street that	
			are already treacherous. The asphalt is caving down the hill. I currently/ regularly walk and bike in that area and it is treacherous, even if it were one way. This is NOT the preferred route. Then you add in the "purple/rush" line busing	
			proposal and the expanded 4 grade highschool off of Bald Eagle Avenue which will increase car AND school bus traffic	
			and you have created a nightmare. It feels like these 3 conditions aren't being discussed as part of the entire picture. I	
			am all for walking and biking trails, but your "preferred" location is not smart. You also need to consider the impact on Bald Eagle Lake water quality and street run off. Tens of thousands of dollars have been spent on alum treatments to	
			improve water clarity. Homeowners and the Rice Creek Watershed shared the expenses. Homeowners agreed to be	
			taxed an additional amount for 10 years to pay for this. You have a community invested in maintaining lake quality.	
			Additional hard surfaces will not enhance that. SAFL baffles and a nearby iron/sand filter are all in place for the benefit of Bald Eagle Lake and the entire Rice Creek Watershed. Hugo Road is no place for a trail either. Houses have	
			very shallow lots between the lake and the street. Their only option for having guests is parking along Hugo Road, as	
			their driveways are often quite short. If you widen the road towards the railroads tracks, trees/vegetation would have	
			to be removed, leaving the homeowners with less of a buffer for Hwy 61 noise. I really don't believe the planners have walked on Bald Eagle Blvd E between Park and Taylor or this wouldn't be a consideration for a trail. And the high school	
			car/bus congestion, the purple bus line and current conditions along Bald Eagle Bivdl E and Hugo Road need to be	
11/10/2021	Community Survey 2 -October 2021	Q7	addressed as an entire system. STOP this trail location.

	Community Survey 2 -October 2021 Community Survey 2 -October 2021	Q11 Q11	[from question 9] Bikes and walkers could share a path, but needs to be wider! Run the trail along the RR tracks on Long Avenue and Hugo Road. Stay out of the [?] neighborhood.	
	Community Survey 2 -October 2021	Q11	eventually connect with the gateway trail north	
			It seems like the original plan was to run the Bruce Vento trail along 61. It seems like all the controversy is stemming from this new plan to run it up along Bald Eagle lake, which would be pretty, but is it convenient for people who live in	
	Community Survey 2 -October 2021	Q11	White Bear Lake and would be using it often?	
11/10/2021	Community Survey 2 -October 2021 Community Survey 2 -October 2021	Q11 Q11	Hardwood Build Lake Links east to Gateway and Brown's Creek	
11/10/2021	Community Survey 2 -October 2021	Q11	Connect to hardwood creek trail. This survey is worthless. Your route is planned and nothing anyone says will change your minds. Just like all the	
	Community Survey 2 -October 2021	Q11	opposition to the choo choo train along university Ave when it was to be next to 94.	
11/10/2021	Community Survey 2 -October 2021	Q11	A trail to Tamarck Nature Center, Ottor Lake dog park, Polar Lakes Park area would be awesome!!! Bald Eagle Ave and 4th St intersection	
11/10/2021	Community Survey 2 -October 2021	012	Bald Eagle Ave and Bald Eagle Ave E, W intersection Bald Eagle Ave and WBLAHS parking lot intersection	
			The proposed route is not a feasible solution for the Bruce Vento Trail. The alternate route by the high school	
11/10/2021	Community Survey 2 -October 2021	Q12	connecting to Long Ave and Hugo Rd would be a much better solution.	
			Yes road in front of my house 5661 is to narrow to share with vehicles & bikes would like to see this trail on the other side of railroad tracks along same side down highway 61 a lot more room for a separate bike path. Make a call da sack	
11/10/2021	Community Survey 2 -October 2021	Q12	last house on Hugo by park, making accessible only to school bus or emergency vehicles.	
			These roads were NOT meant to carry all this traffic, but people who live there shouldn't have to pay for it with their yards. Run these through parks and other public land, but please stay out of people's yards because "Plan A" didn't	
11/10/2021	Community Survey 2 -October 2021	Q12	work out. Many safety concerns with use of Hugo road. This should be one way going north to increase safety.	
11/10/2021	Community Survey 2 -October 2021	Q12	Concerns of public parking on narrow side streets and emergency vehicles. None. I think there is a safety issue now without the trail, especially along the lake. I support this fully and I live on	
11/10/2021	Community Survey 2 -October 2021	Q12	Beaver St and could be impacted by additional traffic but I would rather have a trail.	
11/10/2021	Community Survey 2 -October 2021	Q12	The intersection/crossing at Taylor Road to Hugo Road has very poor sight lines due to existing terrain. There is potential for car/bike accidents at this location.	
			Make Hugo Road a culdesac at the park. I think it a mistake to try to wedge all of what the County thinks is necessary into such a limited space. The plan, as is, will require extensive engineering and retaining walls. Dead end the road and	
11/10/2022	Community Superv 2 - October 2021	012	you will eliminate 90% of the vehicle/pedestrian interaction without any additional expense and create a very appealing neighborhood/trail/park interaction	
11/10/2021	Community Survey 2 -October 2021	Q12		
			No, only concern is Hugo Road, this section is VERY unsafe unless a one way is made of it to allow for a bike path as well on the east side. If this was done parking would not be lost for residents, safe passage of pedestrians, cyclists, and cars	
	Community Survey 2 -October 2021	Q12	could happen simultaneously with a cross walk over to BE recreational park at the boat launch.	
	Community Survey 2 -October 2021 Community Survey 2 -October 2021	Q12 Q12	Bicyclists don't stop at stop signs. Traffic control on 61 at Buffalo and 8th. Taking the trail along Bald Eagle after adding all of the High School traffic is asking for problems.	
11/10/2021	Community Survey 2 -October 2021	Q12	I feel it should follow the existing railroad area and not impact the already busy roads Safety is my biggest concern! Hugo Road has the "Pinch point" area from 5641 Hugo to the BE Regional Park. That area	
			cannot accommodate the trail without cause Multiple other issues. I recommend the safer issue of putting the on the	
11/10/2021	Community Survey 2 -October 2021	Q12	east side of the railroad tracks.	
			I have huge safety concerns for the bikers who will be traveling with the drivers along Hugo Road. This road already sees people consistently exceeding the speed limit (89th percentile of speed is 39 in a 30 mph zone - Ramsey county	
			study). There will be injuries and/or deaths if this road is not made a one-way like other narrow sections of the trail.	
			Speed will become a bigger problem if the road is fixed (right now people speed and it is signed as a "rough road" - imagine what a smooth road will bring) I also have concerns that residents along Hugo road will not have parking on	
			the east side of the road (that is the only place to park if not in a driveway). Snow removal will be an issue - residents generally move snow across Hugo onto the east side of the street - there is not room between homes to store snow.	
			Who is responsible for keeping the sidewalk that is proposed clear? If trees are taken out, noise from why 61 will be	
			Who is responsible for keeping the sidewalk that is proposed clear? If trees are taken out, noise from why 61 will be dramatically increased. The boat traffic coming south-bound on Hugo from the public launch is also an issue, having	
			Who is responsible for keeping the sidewalk that is proposed clear? If trees are taken out, noise from why 51 will be dramatically increased. The boat traffic coming south-bound on Hugo from the public launch is also an issue, having the stretch of Hugo that is residential become a one-way would also solve that - create a barriers of hat hosts can only netw/exit the launch area from the north. If this road cannot become a one-way, I don't think Hugo is a good fit for it or the stretch of Hugo that is residential become a one-way, I don't think Hugo is a good fit for it or the stretch of Hugo the stretch of the stretch of the stretch of Hugo the stretch

	Hi Scott,	
10/27/2021 Email Comments	Thank you for setting up and presenting the proposed Bruce Vento Trail Phase 2 information last week. As I had mentioned to you at that event, I am very concerned about the boat traific on Hugo Road. Drivers with boat traifers fail to follow the posted signs and illegally enter and exit the Baid Eagle Boat Launch paring area: 1) When exiting this area thy frequently turn right could) even though there are two signs posted which symbolize: "No Bight Turn". 2) When arriving from the south, they frequently enter the boat launch "exit", because it is the only access when coming from that direction. The sign (from the south) on Highway 61 does not communicate boat traific to use County Road. J. The sign on Hugo Road a Budialo, is positioned to them cortist can only read it after they have elready turned (or they may have missed it as they are watching that their trailer makes the corner). At that point they have very few options to correct their cours, back onto Highway 61 (Introheount) Ro County Rd J. (After multiple calls and emails by both my wife and I, neither MNDOT nor Ramsey County can coordinate to correct thes signs.) Ramsey County is well-aware that the section of Hugo Road south of the Baid Eagle Regional Park is not wide enough to support boat trailer traific coming from the south. This is why, many years ago they set up the process for boad trailered motorists to enter and exit from County Road. J. The difficulty has been in getting drivers to abide by these rules when it can not be effectively communicated or monitored. If this process could be corrected, there would certainly be a more positive response about the Bruce Vento Trail on Hugo Road. If the process cannot be corrected, and the trai is installed, the result Swould likely be very dangerous for Markers and pedietrian attempting to get to the phayrocound from south of the park. EFECTURE KRENOVE THE BOAT TRAFFIC (as the county has already mandsted) and you will have A MUCH SAFER CORRIDOR for this wonderful trail. Feel free to c	Hi Daryl, Thank you for inquiring about the Phase 2 Bruce Vento Project. I appreciate your insight and comments for Hugo Road. Your comments have been recorded as part of the engagement process. We are looking into several design considerations to help correct and make this a safe corridor for pedestrians, Bicycles, and vehicles. There will be more information to come as the design progresses.
4/7/2022 Email Comments	Would you like someone to contact you? No Your comments or questions: I also think the railroad tracks is the better area but a one way street where the landowners don't lose any or much of their yards also works. There is a little dog on the corner of Taylor and the lake that is aloud to bully my German Shepard so I can what for this project to put this dog in check if you dog ol ake side. Best wishes. I'm disabled so I love the area and the trail extension is my dream come true cause I'm from st paul cabins trailer park and would love to safely ride down there again. My roommate Robert Bland will be there to speak for us both as well as our granditisk who will love the trail	Information to come as the design progresse. Hi Laura, Thank you for the feedback regarding the Phase 2 Bruce Vento Trail Project. Iam glad that you will have a representative available to attend the public open us on April 21st. Just so you are aware, all material that will be available at the open house will also be available on the project page for individuals that cannot attend the meeting. This material will be available at the open house will also be available on the project page for individuals that cannot attend the meeting. 4/14/2022 Email Comments	Hugo road south of county J is in Horrible condition! TWICE this spring futile tossing of asphalt fill lasted less than a week before monstrous potholes returned. This is relevant because If it was in better shape, the need for a bike lane along the road would be greatly diminished! While I am strongly in favor of optical 16 roth ter lati route, any of the proposed routes would be great IF THE TRAIL IS MAINTANED! As poorly as the county has maintained Hugo road, I worry that a parallel bike trail would be as poorly maintained, blocked by lifegally parked cars, and still be unsafe. I am an Avid biker, cycling to work at St John's Hospital from Bald Eagle Lake as often as I can during the summer.	HI Charles, Thank you for reaching out regarding pavement conditions on Hugo Road and potential trail improvements. Our Public Works department is planning to implement a pavement project for Hugo Road this year. The intent of this project is to improve pavement conditions on Hugo Road since the Phase 2 Bruce Vento Trail project is at least 8-10 years out. I have copied a representative from our Public Works department for any additional information regarding this project. Regarding the proposed Bruce Vento Trail, we are still in early stages of design and are proposing two design scenarios for Hugo Road. One scenario is proposing a two-way road with an off-road trail, and the other scenario is proposing a two-way conversion from two-way to one way with an off-road trail. The Park department is holding an open house on April 2, 2022, at the White Bear Lak City Hall from Spm- 7pm to solicit additional feedback for the Phase 2 Bruce Vento Design Project. There will be a variety of materials for the public to provide project. There will be a variety of materials for the public to provide project. There will be avariety of materials for the public to provide project. There will also be on the project page for additional feedback from the public.
4/19/2022 Email Comments	Hello, I'm not able to attend Thursday's meeting but I'm in support of the one way road with trail on bald eagle Blvd e, that I live on. I work from home most days and the number of people walk on the road and it really is so unsafe. I was excited to see this possibility happen in Ramsey county, considering I moved out of hemipen county that had lots of lake trails to explore. Let me know if you have any follow up questions.	Hi Doug. Thank you for your response. Just so you are aware, all material that will be presented at the open house on the 21st will also be available on the project website. Also, I would encourage you to take the online survery on the project page for additional feedback. This material and survery should be available for viewing on the 21st. Below is the link to the project page. https://www.ramseycounty.us/residents/parks-recreation/planning- construction-restoration/twuce-vento-regional-trail-extension- %22808038-withten-trate-to-outry-coad-j
4/21/2022 Email Comments	I could not make it to the April 21st Bruce Vento Trail extension Segment 4 feedback meeting so I am sending this email. As a White Bear Township resident I am voicing my opposition to the current proposed route down Bald Eagle Ave and along Bald Eagle Lake. I do NOT wan the trail going through this residential area. With the new High School addition being built it changes everything, especially traffic flow. I think it is premature to continue with any plan for this segment until the high school is completed and traffic routines are set. Also, several studies in the past regarding changing the traffic flow on Bald Eagle Bivd. have proven longer for emergency and sefty vehicle. This as a resident I do not approve of. The safety of the community is the highest priority as a taxpayer. I low the White Bear Lake area and want to see it flourish for all, but not at the sake of safety. I CANNOT support the Bruce Wento Taihough Bald Eagle area at this time. I support stooping the project at downtown or rerouting along long Ave as was originally proposed.	Hi Shelia, Thank you for providing a response to the project. Just so you are aware, all the information presented at the meeting is also available on and take the online survey. In addition, I referred individuals to the project page Wilk Map last night. The intent of this exercise is for individuals to place a comment on their property to designate support for the project and proposed design. Project Page Link: https://www.ramseycounty.us/residents/parks-recreation/planning- construction-resolution/pruce-wento-regional-trail-extension- %E2N8093-whitaker-street-county-road-j Hi Glen,
		Hi Glen, Thank you for providing feedback regarding the Bruce Vento Regional

5/31/2022	Email Comments	Support		I missed your last meeting on the Trail, but I continue to support its construction. Please let me know if I can help in any way. Thanks.	H Eric, Thank you for reaching out and your continued support for the Phase 2 Bruce Vento Trail project. Just so you are aware, all information that was available at the last public meeting is also available on the project page at the location link below. Currently, we are reviewing all feedback received from the meeting, survey and will be posting results on the project page when completed. https://www.ramseycounty.un/residents/parks-recreation/planning- construction-restoration/true-vento-regional-trail-extension- %22808039-whithear-txeret-county-read-j My suggestions for showing additional support for the Phase 2 Bruce Vento project is reaching out to your respective city council (White Bear Lake) or towo board (White Bear Township) regarding the project. Also, J will record your comments as part of the project for showing support as well. Prease letm known (you have any questions.
				It's obvious that the people doing the planning don't live in the neighborhood. The value of houses along Bald Eagle Ave	
4/27/2021	Public Open House -3			Is dominant the tipe periods using the planning out in the minimization node. The net of the planning using	
4/07/0004				property encroachments, changing the character of the residential neighborhood, personal safety. Other alternatives	
	Publiic Open House -3 Publiic Open House -3			exist, they should be pursued 1.) Increase in traffic on a neighborhood built in the 1800s with 250 cars a day now passing through. ADP 270,000 people passing through (parking?) 2.) We have baid eagles nesting more wildlife as well they would be distrubed and more out. 3.) Invasion of personal property and privacy. Most properties on the lake have little to know room off of the road and would be invaded by people. 4.) What other trail goes through residential area? Why? 5.) What does 'for the most part' and "generally speaking" mean? (from April 21 open house). 6.) Retaining walls will ruin the natural allure of the area's natural beauty. 7) Seems like "Avoiding impacts to land and property' has been said alot at 4/21 meeting? 1.) Where else along the BVY is the route this disruptive to a residential neighborhood? 2.) Why are routes that are less	
4/27/2021	Public Open House -3			disruptive to home owners no longer being considered? 3.) Why not route on the east side of Hwy 61? 4.) How close will the trail be to people's homes? 5.) How will the significant increase in student traffic for WBLHS impact traffic flow? 6.) What permist and approvals are required by the Rice Creek Watershed or DNR? 7.) What is Ramsey County going to do if the WBT does not support this route?	
4/27/2021	Publiic Open House -3			I do NOT want the bike trail to go along Bald Eagle Bivd, around Shadyside Lane and Taylor Ave. I bought my house for hte privacy and if the trail goes by my house it will be about 12 ft from the side of my house and a main window. I abo have bushes all along the side of my ara. I OD NOT WANT to be looking our my window at people on the trail NO PRIVACVI bought my house for the quiet road and quaint neighborhood - I feel ths would really depreciated the value of my home. I am ot against the bike trail, but id NO Twant it no our street. I vote for along Jung Road - no one lives on the side of the road near the railroad tracks, less invasion of people's property. The path going down Bald Eagle Biol. through shadyside Lane and through Taylor Ave to Hugo would change the look and feel of the neighborhood : (	
	Publiic Open House -3			Please don't change the route, it is a GREAT alternative	
				I am in support of this project. I walk/run in this area often, almost daily, and have nearly been hit by cars on more than	
	Public Open House -3 Public Open House -3			one occasion. This would be a huse improvement for people who wall/blke in the neighborhood. A safe place to push a stroller or walls a dog is a great addition to a neighborhood. Plase keep fighting. A residential neighborhood is the perfect place for pedestrian ammenties such as this. And the lake if for everyone in the County to be able to enjoy – no itus those who can afford to own a home on the lake. Iblke around the lake multiple times a week - I'm one of 'those' people they want to get rid of. I'm already there. Please make it safe for me. Maybe stop using the word 'regional'?	
				No person owns the lake, it is here for everyone to enjoy, not just those lucky enough to have shorefront property. We are worried about retailation from neighbors and township board as we are fighting for a variance. Anything you can do to address following concerns would be helpful 1.] The trail will not increase crime (park patrol, cops on bikes) 7.2.1 Reterate the definition of Right of Rodwave, people are upset that property that might be used is actually not their property. That would be a HUGE help. 3.] How you will keep it clean, for those who live on the lake we have plenty of angless trash. I an sure proper trash recipicals would make the trail less messy. 4.) Do you have data from other trails through neighbordos where it helped the neighbordo ZD you have anyone on those inished trails who could talk	
	Publiic Open House -3 Public Open House -3			to the positives? This neighborhood has had three major projects impacting traffic, green space, and home values in the past four years (school redesign, BRT) and arts district) They have never had a meaningful place at the table. They have sacraficed enough for the "greater good" but is somewhere else - or imagine - don't do it at all.	
				No resident input from Township community!! We are being railroaded into thinking this is the only solution for the Bruce Vento Trail - put the trail on Hugo rd. or railroad track, follow White Bear Lake as much as possible. No way - One	
4/27/2021	Publiic Open House -3 Publiic Open House -3			Way!! Not in residential neighborhood. The tomboard doesn't support. Will you shove down residents throats? Go to railroad tracks. This project simply does not belong in a residential area - all the way from Hwy 96 to County Road J via any of the paths laid out in the attached survey. The original BVT was to follow vacated railroad corridors become available should this	
	Public Open House -3 Community Survey 2 - May 2022	Lincoln Ave Suppo	ort	project move forward. Lincoln Avenue is not even on the map you provided	
	Community Survey 2 - May 2022 Community Survey 2 - May 2022			Makes perfect sense to ise the rail road right of way. NOT Bald Eagle Blvd. You say preferred trail is Bald aeagle blvdnot anyone that live on bald eagle blvd feels that way so who's is prefered?	
	Community Survey 2 - May 2022 Community Survey 2 - May 2022			This is a good plan. As 50 year residents of the area we strongly support the plan. Need more bike infrastructure in this area, love it!	
5/18/2022 5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Suppo Lincoln Ave Suppo	ort	I run and walk on the Bruce Vento several times per week. I absolutely love the trail, and I would love to extend my options for running routes! The trail would provide another way for people to get to the food shelf, which is great.	
	Community Survey 2 - May 2022			A great idea that should not be halted because a few privileged folks don't want to deal with a minor inconvenience. why not 10' lanes in each direction on this low a few traffic street? then there could be 6' of boulevard on both sides	
	Community Survey 2 - May 2022			why not u lanes in each direction on this low traffic street; then there could be 5 of boulevaro on both sides protecting sidewalk users just a little bit more.	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Suppo	ort	We live on Whitaker St. about a block west of Lincoln Ave. and are impressed with the proposed trail on Lincoln. It would be great to have a trail near hwy 61 and the main business/commercial area.	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Suppo	ort	I currently bike this route frequently, but Hugo Road REALLY need's resurfacing. The ability to safely move north from the current trail to White Bear Lake would be great!!	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Suppo	ort	Very reasonable	
5/18/2022	Community Survey 2 - May 2022	Lincoln Ave Suppo	ort	It's a logical placement.  Hope there is a bridge proposed to cross 96. This seems like a dangerous intersection.	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	Not in residential neighborhood We can't stand socialism anti-Americans	
	Community Survey 2 - May 2022			This is not a good idea. As someone who lives in this area I do not support this trail at all The trail should cross highway 61 to bring the trail along the the shores of White Bear Lake, leveraging already existing	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	trall systems, and allowing much better access to downtown White Bear Lake. Regional Trail does not belong here. No engagement with WB Township residents. Umited parking on west side of 61 in this area. Large parking lot near Kowalskis with ample parking. Trail on east side of 61 makes more sense.	
5/18/2022	Community Survey 2 - May 2022	Lincoln Ave Oppos	se	This project shouldn't proceed until the tracks come available. It's a poor fit for densely populated neighborhoods.	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	Waiting for access to railway seems the cheaper alternative With all the school building going on it is a mess with all the traffic bikes would not be safe at this time	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	Already parking problems in area parking should not be removed. Oppose the trail here	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	I oppose any plan traversing residential neighborhoods. It is especially dangerous to have walking/biking paths on the same side of road where cars are exiting driveways. Ibelieve the trait should follow Lake APS Janog the lakefront and through Veteran's Memorial Park Having attended the meeting 4/211 am now strongly opposed to the trail altogether.	
5/18/2022	Community Survey 2 - May 2022	Lincoln Ave Opnos	se	It's obvious the only sensible option is along the rail corridor. Anything else is an ugly kludge. As such it's better to play the long game and wait the railway out.	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	Do not want trail along Hugo Road residential neighborhood Homeowners are losing property to make this work.	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	Too invoice a revolution of the constant of th	
	Community Survey 2 - May 2022 Community Survey 2 - May 2022			Get it out of the neighborhoods. We have a page and a half of crime in White Bear Lake now documented in our weekly White Bear press. We don't	
5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Lincoln Ave Oppos	se	need to make it two pages. Keep this thing away from Bald Eagle Lake	

5/18/2022	Community Survey 2 - May 2022	Lincoln Ave Onnose	any trail design should not involve taking parking or widening any existing road, it should not be simply justified by being the road right of way. Any and all existing green space should be maintained.	
			I would like a wider buffer between the vehicle space and the trail. Reduce the parking lane and/or the driving lane.	
			Connecting this path to the school is a great idea for the safety of our students and encouraging them to cycle to school	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	more safely. Looks good. I like that parked cars will continue to help protect walkers and bikers somewhat. What can be done to	
			make vehicle drivers slow down on this residential street and how does the design create safe and convenient crossings for walkers and bikers? currently this is a wide, straight road that encourages high speed even though it's has	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	a lot of family and student pedestrian traffic.	
		Hwy 96 to White Bear Lake High Se		
5/18/2022 5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High So Hwy 96 to White Bear Lake High So	Make that path wide enough for bikers or the bikers will be on the road. I live near here. I walk here. I ride a bike and would welcome a safer ride. I drive here too.	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	This is the logical place for the trail. Unclear how 96 crossing is done safely. Bridge?	
5/18/2022	Community Survey 2 - May 2022	Hway 96 to White Bear Lake High Se	Safer crossing lights/paths? Right turns from 61 southbound render crossers very vulnerable.	
			A safe way for students to walk, bike to school. Looks tight (7ft blvd) on one side for utilities. all OH power is on that side, and they usually have an offset requirement	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se		
			I oppose this regional trail, it should wait to follow the railroad corridor as previously intended. At the very least, I	
			think you can make it work on Long Ave. (even though you are saying that road is not an option). should be downtown next to hwy 61	
			This is a residential area. You are planning a path meant for a park or wilderness area THIS IS NOT APPROPRIATE FOR A NEIGHBOORHOOD ! By your own acknowledgement over 200,000 people used Phase 1 of the plan in 2019, we do not	
			need that number of people passing through our street not to mention the traffic. The new High School is already set to add 500 cars a day to the traffic on Bald Eagle Ave. This will only decrease the value of our property along with the	
5 (40 (2022			added garbage, cigarette butts and dog poop left for the homeowners to clean up. We are a family neighborhood not a	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High So	Due to Covid, the number of parents driving their kids to and from Central and North has vastly increased, making it	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	hard for locals to use Division and Bald Eagle Ave. This will only get worse with the new high school. We don't need additional congestion.	
			Goes through a residential Neighborhood Bald Eagle Avenue will already be overcrowded with the combined senior high school at north campus,	
			A Regional Trail does not belong in a residential neighborhood with small businesses, a Catholic Church, a mortuary and a private school. There is a busy intersection and narrow corridor space at BE Ave and 4th. High accident and	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	traffic location. Current road narrows at 6th and again at 10th.	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	Seems like this would be very disuptive to a predominantly residential area, in addition to the greatly increased number of students and staff in the area of the WBL high school and Central Middle School.	
			This will run with the sidewalk, so no loss to homeowners, there, but the amount of traffic with the new HS and how busy Bald Eagle Ave has become and will likely continue to grow is a major casue for concern when you bring that	
		Hwy 96 to White Bear Lake High Se Hwy 96 to White Bear Lake High Se	many people together through a neighborhood. Not in a residential neighborhood	
			Use common sense and we can't stand Biden either	
5/19/2022	Community Survey 2 May 2022	Hwy 96 to White Rear Lake High C	We do not need additional sidewalks or trails on our street. We bought our new home here without being given knowledge of these terrible projects to accommodate my wheelchair and to get away from the crime in East Saint Paul.	
5/16/2022	Community Survey 2 - May 2022	nwy 50 to write bear cake rights	The trail should be directed to pass along the shores of White Bear Lake and into/adjacent to downtown White Bear.	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	Having the trail pass through dense residential areas and next to a busy High School is not where I want to see the trail installed.	
			Additional traffic from the new high school will make this an unpleasant route. It is not a good fit for the neighborhood.	
			This is not the original route. This proposed trail should wait until the RR ROW is available through abandonment. Regional Trail does not belong in a residential area.	
		Hwy 96 to White Bear Lake High So	There will be added school buses and school traffic moving along this street with the enlarged high school. More bicycles and pedestrians would be chaos. Not to mention dangerous.	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	The traffic is already a night mare, this just continues the hell for the neighbors. Please find a different path that is not entering a highly residential area, that cannot support this volume of people and	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	usage.	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	Adding this is going to add to traffic issues with the move of the high school and present dangerous conditions with new drivers mixing with walkers and bikers	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	This regional trail is a bad fit in the neighborhood of the high school and family homes. It will create traffic hazards.	
5/18/2022	Community Survey 2 - May 2022	Hwy 96 to White Bear Lake High Se	This regional trail is a bad fit in the neighborhood of the high school and family homes. It will create traffic hazards. 				he	Γ
				The trail should be directed to pass along the shores of White Bear Lake and into/adjacent to downtown White Bear. This would bring in undue amounts of traffic into a very residential, quiet area. It seems the trail system along White	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	Bear Lake is a much better option. Additional traffic from the new high school will make this an unpleasant route. It is not a good fit for the neighborhood.	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	Parking is needed on the east side of the street. This proposed trail should wait until the RR ROW is available through abandonment.	
				Regional Trail does not belong in a residential neighborhood.	
				This is our community. I do not want a parade of bikers, walkers etc crossing in front of my property. We purchased our property for its proximity to the water. It's tranquillity and beauty. Bringing in thousands of people a year to our	
				neighborhood, more noise, more trash and cutting down trees is something I am VERY opposed to. We pay higher taxes	
				to live in this beautiful area. Please don't destroy it with a regional trail. If as you say this project is 10 years out. Use what will probably an abandoned railway at that time. Also, the southern portion of the regional trail is separated from	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	homes by green space and fencing. You are proposing a trail situated practically in our front yard with no separation. I can't imagine many homeowners would want this.	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	Again densely populated, poor fit for a small residential neighborhood.	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	Please find a different path that is not entering a highly residential area, that cannot support this volume of people and usage.	
	5/18/2022	Community Survey 2 - May 2022		Bad fit near high school and neighborhood. It will create traffic hazards.	
				once again this is NOT an appropriate alignment. GO back to the drawing board. NO trail here at all. Absolutely oppose to this alignment.	
				l oppose any plan traversing residential neighborhoods. It is especially dangerous to have walking/biking paths on the same side of road where cars are exiting driveways.	
				Language such as 'typically remains within the road right of way' is misleading and murky. Loss of parking, especially	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	near the lake presents an inconvenience for homeowner's entertaining guests. Homeowners are losing property.	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	Money, money, money, think about it! Get it out of the neighborhoods. This exact street is already a mess due to the high school remodel. This neighborhood	
	5/18/2022	Community Survey 2 - May 2022	White Bear Lake High School to Ba	has seen enough bad government dealings already! this must be a joke, at no time previous have neighbors been made aware of a plan to go down to Bald Eagle Lake. This	
	5 (40 (2022			has been a recent change, when over covid? Where is the transparency? Do not think this is an appropriate place to	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	add a high traffic bike trail, or to remove existing infrastructure to do so Seems fine. Could this be a one-way and convert the lane closest to the trail to parking?	
			Bald Eagle Blvd E to Park Avenue - Bald Eagle Blvd E to Park Avenue -	I trust your recommendations. This makes sense to me. Keeping the trail on the lake side would allow for great views of the lake.	
				This is my preferred route. I know some neighbors oppose but many more of us prefer this route. We love this route.	
				I would prefer a one way here so that it reduces traffic congestion, more safety near the water, and allows space for	
			Bald Eagle Blvd E to Park Avenue -	both bikers and walkers to safely enjoy the trail. This minics the design of lake Ave on white bear lake but with two way traffic. I don't see a high need for parking	
	5/18/2022 5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue - Bald Eagle Blvd E to Park Avenue -	there. It's a great design. This alignment makes sense to us.	
			Bald Eagle Blvd E to Park Avenue -	Make it a sloped transition from path to road like lake dr in white bear in case biker has to take the road to get out of the way of the family of 5 with 3 dogs.	
	.,,	, 22.12, 2 (60) 2022	un recibe-	The way of the failing of 5 with 5 dogs. I live near here. I walk a different part of the lake and it is an uncomfortable walk - this would seem to take discomfort	
				away from those who walk here. I ride a bike and would welcome a safer ride. I drive here too. I pull a boat here too.	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	Will reduce traffic making walkers and bikers safer. Nice!	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	l oppose this Regional trail, it should wait to follow the railroad corridor as previously intended.	
				The path would be 10-12 feet away from my side window. My privacy - the reason I bought my home - would be GONE. We have a very quiet street and would like to keep it that way. Property value of my home would definitely go down. I	
-				DO NOT WANT THIS PLAN, I don't want my trees or lilac bushes removed either, they provide lots of privacy.	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	Not much shoulder room for bikes	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	This is a narrow roadway with steep pitch on the lake side. This is a neighborhood. A regional trail has no business in a quiet neighborhood. Please consider going back to the original route along the railroad tracks.	
				Your nutsthe only one that prefers bald eagle blvd are you nut cases. Not one person living in the area wasn't it	
		Community Survey 2 - May 2022		around the lakenot one I oppose this regional trail, it should wait to follow the railroad corridor as previously intended.	
				should be downtown next to hwy 61 A regional trail in a residential area is not a good fit. This is where we live and cross to our beach.	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	This will seriously alter the parklike feel of that part of the community. It will take out a lot of trees. From my walks it is hard to believe the existing roadway is 32 feet wide.	
				Once again a Regional Trail DOES NOT belong in a residential neighborhood. Residents do not want fencing and	
				retaining walls to enter their lakeside property.	
	5/18/2022 5/18/2022		Bald Eagle Blvd E to Park Avenue - Bald Eagle Blvd E to Park Avenue -	Again why in a residential neighborhood. Those people pay huge taxes to see people walking in front of their lake view. We don't want your s*** in our Town. get it	
				This alignment would inert large amounts of foot traffic and dangerous amount of bicyclist onto a road that residents use frequently to cross to access the lake. Imagining a large amount of bicycles zipping past while young children are	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	trying to access the beach is scary. Additional traffic from the new high school will make this an unpleasant route. It is not a good fit for the neighborhood.	
				Parking would be needed in this area to accommodate large numbers of Regional Trail users. Parking would need to be	
	5/18/2022 5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue - Bald Eagle Blvd E to Park Avenue -	located here like a parkway in Minneapolis. Disruption to personal property , existing infrastructure and not enough corridor space for a trail.	
				NO, ABSOLUTELY NOT. There are turtles that cross, frogs that cross in huge numbers during certain times of the year.	
				Lots of people walking and home owners walking back and forth to docks. This is a safety issue. Bicyclists are not well known for their love of safety. We had bike runs down the street before and they were fast and unsafe. This is a	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	terrible idea. The numbers using are far too high for a neighborhood.	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	Please find a different path that is not entering a highly residential area, that cannot support this volume of people and usage.	
				I live in this section of Bald Eagle Blvd E and am strongly opposed because the traffic is terrible and cars drive way too fast along here. It makes no sense to add/encourage a significant number of pedestrians, runners and bikers to this	
				area. With the new high school this area will have increased numbers of cars-especially teenaged drivers coming from	
				school, sports and other activities. It is already difficult and dangerous for property owners to cross the road to enjoy our lake and adding more foot/bike traffic will make it even more difficult. The trail would also take away all street	
				parking which is utilized often for all residents in this are as many don't have much space in their driveways. A regional trail such as this is not intended for residential areas. It was always intended to be in the abandoned railroad bed and	
				should wait until that becomes available. Or utilize the trail that has already been established on Lake Avenue along White Bear Lake. I know it is said that that was taken off the table because their residents screamed loud enough. So	
				now you want to route it through a residential area where we are not set up for it and it will add many possible	
				dangerous situations not to mention inconveniences. You should come sit and watch traffic during busy times and see cars driving 50mph and going through the stop sign. I walk or run 5 miles everyday and believe me I know this is a	
				horrible idea!! DO NOT PUT THIS TRAIL WHERE IT DOES NOT BELONG!! In addition to the traffic issues, this takes away all street parking in this stretch	
				Negatives of proposal: Removal of trees, seizing property, dramatically increasing traffic in neighborhood=traffic and	
	E/10/2025	Community Common 2	Paid Fadlo Plud F to P	pedestrian hazards. This regional trail should not be installed through a neighborhood, injecting tens of thousands of	
	5/ 16/ 2022	community survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	people into a neighborhood. Regional trails work best on or alongside abandoned railroad right of ways.	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	NOT support at all, terrible idea. Have you asked the folks that are mostly impacted. Putting up a fence, and retaining wall? Are you kidding? How are home owners to access their lake shore? THIS IS NOT FEASABLE	
				I pay 12 000 a year in property taxes this would take away the land I own on the lake side. Lake avenue is so crowded	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	biking is difficult we don't want the same thing on bald eagle lake we want it to be a quiet beautiful lake! No Trail here at all. Absolutely opposed to this alignment. Do NOT destroy the current walking and biking, parking area	
				that exist. The road was recently repaired with narrowed lanes, this works well already, DO NOT need to have more	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -		
				l oppose any plan traversing residential neighborhoods. It is especially dangerous to have walking/biking paths on the same side of road where cars are exiting driveways. Other alternatives are available and far less disruptive and	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -		
				Removing on-street parking is an extreme hardship for visitors along this segment. Retaining walls and fencing will also	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	create more ongoing maintenance expenses, which seem to already be non-existent or will result in higher taxes.	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	I currently walk this route and it is not safe with the little bit of pedestrian traffic already. Now add 200,000 + people and the privacy of the neighborhood is gone. Might as well install a Walmart in the neighborhood.	
	5/18/2022	Community Survey 2 - May 2022		Wow, elaborate drawings, nothing better to do.	
	5/16/2022	continuinty ourvey z - iviay 2022	ours cagle bivo è to Park Avenue -		
				again, strongly oppose this plan. You are not using existing foot print if you are taking away parking and using fences!!! I highly doubt those people that live along that road would want a fence or some wall to prevent them from accessing	
	5/18/2022	Community Survey 2 - May 2022	Bald Eagle Blvd E to Park Avenue -	the lake shore. Have you considered the possibility of litigation or liability with that, apparently not.	

			T	
		2022 Bald Eagle Blvd E from Park Aven 2022 Bald Eagle Blvd E from Park Aven		
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	I like this. I think it worked well on Lake Ave. I wish the trail had more separation from the cars, but if the cars are made to travel in the 15-20 mph range, I think it's fine.	
			I love the idea of a one way for this section. It is a quiet street, with most traffic moving in the proposed direction and very few driveways. A one way is ideal and as a resident who lives on this stretch I am very much in favor of this	
-		2022 Bald Eagle Blvd E from Park Aven 2022 Bald Eagle Blvd E from Park Aven		
		2022 Bald Eagle Blvd E from Park Aven	Love this route. Many of my neighbors agree that this route is prefect. I know a few are upset, but so many more	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	How can we determine if a fence will be needed on our property? Converting this to a one way will reduce car traffic by the lake. Making the neighborhood quieter and the path safer.	
		2022 Bald Eagle Blvd E from Park Aven 2022 Bald Eagle Blvd E from Park Aven	J Five stars.	
	5/18/2022 Community Survey 2 * Wa	2022 Baid Lagie bivd L from Faix Aven		
			I would have voted for Southbound One-way. Based on my driving habits. I am primarily using this to get to and from Highway 61 using Buffalo Street. Most of the time I continue East on Park to get to Hugo Road to get to Buffalo to 61.	
			Wider for the boat. If I am coming East to West I can reverse my course or go to the lake and continue Southbound.	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven		
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven		
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	I know many of the residents along this section want no changes. But it is a public right of way that belongs to a everyone. Bald Eagle Blvd is not a private driveway.	
			I am so glad to see these improvements in the works. The intersection of Taylor and Hugo Rd is one of the most dangerous I experience on a bike in the area. Poor visibility and fast car traffic make this intersection an accident	
		2022 Bald Eagle Blvd E from Park Aven 2022 Bald Eagle Blvd E from Park Aven		
			You will be destroying the peoples yards that live there and forcing them onto a one way street is not right.	
			Goes through a residential Neighborhood. I live on Taylor. Too many people in a Residential neighborhood. I like my peace and quiet. Don't need to put up with	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	people NOT FROM MY NEIGHBORHOOD!	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	Too tight and confusing. better to go straight east on buffalo	
			l oppose this Regional trail, it should wait to follow the railroad corridor as previously intended. The trail should run along the railroad tracks.	
	5 (40 /0000 -	2022 0 115	We pay substantial property taxes to live Bald Eagle Lake. The proposed trail would dramatically increase the flow of	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	I traffic Also, we're concerned about private property encroachment and value of our house.	
			You would need none of this or far fewer modifications to the landscape if you used the area adjacent to the rail rd tracks on 61. That means wY less \$. At the least you should compare costs of two different designs	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven		
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	Retaining walls and fencing will change the quiet character of this residential neighborhood. This will cause a significant change to the feel of the community with lost trees and a fence. The picture shows the	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	existing roadway in the middle of the easement which is not accurate.	
			One way limits residents access and diverts traffic on to other side streets. Also increased high school traffic. This is a narrow corridor and does not accommodate a Regional Trail. Many residents are opposed to a one way for a Regional	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	Dra't need more traffic issues in a family neighborhood for people who do not live here, but choose to walk, ride or	
		2022 Bald Eagle Blvd E from Park Aven	J bike here.	
			I Get some smart people on that can think This road should not be a one-way. It will only increase the traffic speeds and the trail should not be installed along	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	I Bald Eagle. A Regional Trail does not fit in a single family residential neighborhood. This does not even consider a two-way! You cannot restrict access to homes in this area. These are long blocks with	
			limited intersecting streets for home owners to access their homes. This one way idea has been brought up many times in the Township and it has been rejected every time. Stop trying to jam this into our neighborhood again - you are	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	creating significant discord in our neighborhoods. A Regional Trail does not fit in a single-family residential neighborhood.	
		2022 Bald Eagle Blvd E from Park Aven	Regional Trail does not belong in a residential neighborhood. Creating one way roads diverts traffic to other streets and this will become worse with increased high school	
			See previous answers. A one way is inappropriate in this area. This has been suggested previously. This would impact traffic speeds as one way drivers have no opposing traffic to watch out for. It would possibly create longer response	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	times for emergency vehicles and limit access for homeowners in this area. Where will bikers and walkers park? On narrow side streets????	
	S/10/1012 Community Survey 2 mil		The difficulty for the people in this portion of the project is awful. This is a neighborhood with a lot of disabled people, houses are affordable and most are one level. Accessing their homes as others do becomes an issue. This is just cruel	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	I to this neighborhood.	
		2022 Bald Eagle Blvd E from Park Aven		
			I On way is a nightmare for this section and two way has too many negative/expensive impacts People in this community have NOT wanted a one-way. It has been discussed for over 20 years, and the answer is the	
		2022 Bald Eagle Blvd E from Park Aven 2022 Bald Eagle Blvd E from Park Aven		
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	I oppose any plan traversing residential neighborhoods. It is especially dangerous to have walking/biking paths on the asme side of road where cars are exiting driveways.	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	Having residents have to 'back-track' to access their residences with a one-way street in this neighborhood is absurd. I don't consider that minimizing impacts to residents.	
			This project does not belong in a quiet, settled community of single family homes. The influx of thousands of people will severely impact our quality of life, wildlife, tree canopy, and property values. Those who already walk, bike, and	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	y wander the area love it here - and don't want this.	
	5/18/2022 Community Survey 2 44-	2022 Bald Fagle Rivel 5 from Dark Aug	I like to drive around the lake in both directions. Having a one-way limits that. Also, the homeowners are losing some of their property and will have their homes within the required setbacks to the new trails/roads.	
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven		
	5/18/2022 Community Survey 2 - Ma	2022 Bald Eagle Blvd E from Park Aven	apparently you are unaware of how many times a one way in this area has been opposed. I don't love the idea of a one way on this road for the people the live there.	
			a But that being said, I'd prefer any optionb that gets a tail built!!!!	
		2022 One Way Taylor Avenue/Hugo Ro	If you are going to do this section, would prefer one-way for the least amount of construction and disruption to existing	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro	a trees. I think along hwy 61 would be better if at all possible.	
			With the width issues on Hugo (south of the park) one way north bound from Buffalo to the park is the really the only option. Two way from the park to J with a cul-de-sac on the south end of the park. All park and boat traffic would	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro	a come in from J. A median would stop north bound traffic from entering the park or launch. Will this one-way travel south? I could see this adding a little bit of distance to homeowners returning home, but it's	
			mostly traveling at high speed on hwy 61 so it wouldn't add much time to their commute. narrow lanes could keep it safer. would like to see more of a physical barrier between the cars and pedestrians. short hedges would be enough to	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro		
			a should be reviewed. My sis lives on Taylor and I recall it being hard to see vehicles	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro	a We like the one-way options best - why expand paved surfaces more than is needed. If this guestions is asking about support for one way traffic, I support this.	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro	al don't have a dog in this fight, but feel that it should run with the railroad.	
			There should be a cul-de-sac where Hugo Road meets the park - to stop ALL boat trailer traffic in front of Hugo Road homes. (Boat trailers is the most dangerous traffic we see daily in the summer as residents.) Entering Hugo Rd from the	
			south end (Taylor Ave) is much better for residents than from the North end (park). IT IS A RESIDENTAL NEIGHBORHOOD!	
		2022 One Way Taylor Avenue/Hugo Ro 2022 One Way Taylor Avenue/Hugo Ro	NOT A GOOD IDEA! No Regional Trail. Narrow corridor. Doesn't belong here	
			a Horrible horrible thinking horrible . Typical democrats want to wreck good neighborhoods	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro	This proposed trail should wait until the RR ROW when it is abandoned. That is a hugely underutilized amount of land. A one-way has been discussed many time previously in the Township and has been rejected every time. This proposed	
	5/18/2022 Community Survey 2 - Ma 5/18/2022 Community Survey 2 - Ma		A one-way has been discussed many time previously in the Township and has been rejected every time. This proposed a trail should wait until the RR ROW is available through abandonment.	
	5/18/2022 Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro 2022 One Way Taylor Avenue/Hugo Ro	A one-way has been discussed many time previously in the Township and has been rejected every time. This proposed farali should wait until the RR ROW is vanibate through bandonment. Regional Trail does not belong in a residential neighborhood. Creating one way roads diverts traffic to other streets and this will become worse with increased high school vafile.

	5/18/2022         Community Survey 2 - Ma           5/18/2022         Community Survey 2 - Ma	2022 One Way Taylor Avenue/Hugo Ro 2022 One Way Taylor Avenue/Hugo Ro	A one-way has been discussed many time previously in the Township and has been rejected every time. This proposed fails should wait until the RR ROW is vanilable through bandonment. Regional Trail does not belong in a residential neighborhood. Creating one way roads diverts traffic to other streets and this will become worse with increased high school vafile. Emergency vehicle access times would increase. Inconvenience to homeowners in this area. Wait for the tracks or work with Lake A vand Lake Links. Nobody wants 5 dateway trail in front of their house or in their neighborhood. This is just nonsensical. Please find a different path that is not entering a highly residential area, that cannot support this volume of people and Please find a different path that is not entering a highly residential area, that cannot support this volume of people and Please find a different path that is not entering a highly residential area, that cannot support this volume of people and Please find a different path that is not entering a highly residential area, that cannot support this volume of people and Please find a different path that is not entering a highly residential area.	

			Again - one way is problematic and two way has many negative impacts and costs	
5/18/2022	Community Survey 2 - May 2022	One Way Taylor Avenue/Hugo Roa	NO TRAIL I oppose any plan traversing residential neighborhoods. It is especially dangerous to have walking/biking paths on the	
5/18/2022	Community Survey 2 - May 2022	One Way Taylor Avenue/Hugo Roa	same side of road where cars are exiting driveways.	
5/18/2022	Community Survey 2 - May 2022	One Way Taylor Avenue/Hugo Roa	This regional trail was intended to utilize the railroad corridor and until that corridor is available, I do not support an alternative alignment that routes the trail through a residential neighborhood.	
			How much of our regional parkland will we lose to accommodate this mess? Will it become a giant parking lot for the	
5/18/2022	Community Survey 2 - May 2022	One Way Taylor Avenue/Hugo Roa	bike riders? Make Hugo rd a cul de sac is my preferred option. Much less traffic hence safe for shared use of roadway without	
5/18/2022	Community Survey 2 - May 2022	One Way Taylor Avenue/Hugo Roa		
			This road is already too narrow for the existing traffic. When you add in the fact that these are lake front properties and the activities on these properties involve the use of trailers & boats, how will the residents be able to mover around the stretser with large loads when you have 2000000 = adder gleedstrins and fast moving traffic. I already have to block traffic anytime I bring a trailer to my property to load or unload. Also, anytime a contractor needs to come fix something at my property, their commercial trucks have to be parked on the strete blocking traffic. If you make this a	
5/18/2022	Community Survey 2 - May 2022	One Way Taylor Avenue/Hugo Roa One Way Taylor Avenue/Hugo Roa	one-way, the pedestrian walkway will become a street.	
		One Way Taylor Avenue/Hugo Roa		
			same rationale, these are collector roads for the neighborhood, it is a very old area, homes are close, not meant for increases in traffic including bikes, etc. If you biggest reason is to provide a view, then this is a misguided attempt. People can walk or bike along the lake already without addition disruption of the area. It is not appropriate here. It belongs in an area that can handle it, such as the RR corridor.	
			I think it is odd to propose a Northbound one-way to thru Taylor only to be met by a Southbound one-way to continue	
			North. You are forcing all people to go to Buffalo and then to 61 to go North to J to come back South to the Lake.	
5/16/2022	Community Survey 2 - Way 2022	One Way Taylor Avenue/Hugo Roa	like thos choice better, but I put my answer as "no preference" because I'm not super picky. I jusy want you to get it	
		Two way Taylor Avenue/Hugo Roa	done. Reduce the parking lane and/or the driving lane.	
			This seems to be a more costly option that might not have a good enough use case to justify, I would go sign the one	
		Two way Taylor Avenue/Hugo Roa	way option. I prefer one way traffic, but am not concerned about impacting the Railroad embankment.	
			I favor keeping Hugo road as a two way.	
			There should be a cul-de-sac where Hugo Road meets the park - to stop ALL boat trailer traffic in front of Hugo Road	
			Timer a blood be a cuale say, while ringo haud Thess are park. "U sup ruct out a valiet valiet in ring's hour homes. [Boat traites is the most clargerous traffic was ead bijly in the summer as residents]. Literaring Hugo Rd from the south end [Taylor Ave] is much better for residents than from the North end (park). Less impact on the neighborhood. Would prefer using the arilead track when abandoned.	
			It's a big enough road/space to support the effort to keep it two-way, in my opinion. Keep it a two-way and you will	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	still be safe for walkers/bikers AND you wont confuse the picnickers who come to the park via Buffalo/Hugo.	
		Two way Taylor Avenue/Hugo Roa	2 way north of recreation area, 1 way south of recreation area.	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	Also extend south on Hugo road if possible	
5/18/2022 5/18/2022	Community Survey 2 - May 2022 Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa Two way Taylor Avenue/Hugo Roa	The one-way option seems way better. Difficult to see cars	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	We strongly prefer the one-way option.	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	IT IS A RESIDENTAL NEIGHBORHOOD! NOT A GOOD IDEA!	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	No Regional Trail	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	Goofy Biden fans	
			We do not want to invite thousands of strangers into our quiet neighborhoods. This proposed trail should wait until the RR ROW is available through abandonment.	
		Two way Taylor Avenue/Hugo Roa	Disruption to personal property.	
			It would be sad to encourage the numbers to this area, it's heavily used by the neighborhood, it was a saving grace during covid. The trails as they are are good. Please consider not everyone loves bicyclists as they electric bikes are	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	faster and they aren't careful among walkers and dog walkers.	
5/19/2022	Community Survey 2 May 2022	Two way Taylor Avenue/Hugo Roa	Please find a different path that is not entering a highly residential area, that cannot support this volume of people and	
		Two way Taylor Avenue/Hugo Roa		
			l oppose any plan traversing residential neighborhoods. It is especially dangerous to have walking/biking paths on the

5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	alternative alignment that routes the trail through a residential neighborhood.	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	Those who live at the "Pinch Point" have driveways that barely accommodate a parked vehicle in front of their OWN HOME. How are they going to be assured of access to their property?	
		Two way Taylor Avenue/Hugo Roa		
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	Taking out the south- bound lane on Hugo road would require me and my neighbors to have to travel an additional 3 miles every time we need to go any where south of buffalo and highway 61 - that seems like an unreasonable hardship that would be unaceptable to anyone if they were in the same situation.	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Huso Roa	This road is already too narrow for the existing traffic. When you add in the fact that these are lake front properties and the activities on these properties involve the use of trailers & boats, how will the residents be able to mover around the streets with large loads when you have 200,000+ added pedestrians and fast moving traffic. I already have to block traffic anytime I bring a trailer to my property to load or unload. Also, anytime a contracton needs to come fix something at my property, their commercial trucks have to be parked on the street blocking traffic. If you make this a one-way, the pedestim a walkaway will become a street.	
		Two way Taylor Avenue/Hugo Roa	Get it out of the neighborhoods.	
			this is a terrible idea, take out green space to add a retaining wall, increase runoff to homes and the lake. Pinch point for a reason, this road has way too many obstacles to overcome just to have a better view for 30 secs while riding a	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	bike. Get real.	
5/18/2022	Community Survey 2 - May 2022	Two way Taylor Avenue/Hugo Roa	l prefer Hugo Rd be a culdesac Ending at the recreational area	
			Hi, I was not able to make it to the WBL City Hall meeting last night due to illness.	
			It would be nice to know what the percentage of the impacting cities residents completed the engagement surveys from full 2021 and other engagement activities. 135 + totils me only 136 people completed the survey. Why Is 135 + used as a marker? If only WBL residents participated (WBL has approx. 20,000 adults, not children) less than 1% of its adult populous engaged. More published logistical demographics of the survey participants would be appreciated. If there is please send me the link.	
5/18/2022	Community Survey 2 - May 2022	General Comment	Index this aspect with be published in regards to this solvey. This datapatency would have the teer hore comortable knowing that the local community (WB Twsp specifically, since it is NOT ward lead) is supporting the extension phase and not being pushed into it.	
0, 10, 10LL	.,, 2, 1012		The concept a regional trail into the area with the changes going on at north campus that will already cause	
5/18/2022	Community Survey 2 - May 2022	General Comment	overcrowding from junior and senior students cars is ill thought out. You should wait to see how that works before forcing a trail in.	
	Community Survey 2 - May 2022		Put the trail somewhere beyond residential neighborhoods. We are not public domain.	
			I highly support the trail extension and my life and well being would improve from it being built. I hate that WBL doesn't have much for safe recreation. I just walked this winter with my aging parents on the short little lake trail. They need an even, safe surface to walk on. I remember us taking about how nice it was, but it would be better to have something a little longer. That trail is so short. I also don't feel super safe taking my baby for a walk in the stroller in WBL bc there are so few sidewalks!	
	Community Survey 2 - May 2022		Pretty please build this trail fast!!!!	
5/18/2022	Community Survey 2 - May 2022	General Comment	I oppose this Regional trail, it should wait to follow the railroad corridor as previously intended.	
	Community Survey 2 - May 2022 Community Survey 2 - May 2022		It's about time this safe biking hiking trail is completed. A few loud residents along Bald Eagle should not be able to disrupt this project.	
			Is Is there an option for the trail to avoid the Bald Eagle Ave portion in central White Bear Lake, eg by the high school and central middle school? That seems like it is asking for trouble with the increased amount of people, vehicles and bikes	
5/18/2022	Community Survey 2 - May 2022	General Comment	being added to the area for the school expansion and trail extension. I've read where some opposing thoughts consistently write about how extending the Trail into "neighborhood areas"	
			will open them to "unsavoy individuals". I believe that the State of MM. has more designated Bike trails than any other state except Californial I'd like to see some data on how Thieves, etc. have used bike trails to gain access to neighborhoods and create problems with that access, any more than how they may currently access those same areas	
5/18/2022	Community Survey 2 - May 2022	General Comment	with Vehicle access. I would like to know more details about the fencing along Bald Eagle Blvd E. Where is it proposed and what type of	
5/18/2022	Community Survey 2 - May 2022	General Comment	fence will be used? Also, do you have projected bike/pedestrian usage volume? Thanks	
5/18/2022	Community Survey 2 - May 2022	General Comment	Understand there is controversy and concerns related to the proposal. I encourage the County Board to look beyond the vocal voices of opposition and do what is best for the greater community. The community needs safe space to walk, bile and run. Places to gather and see your neighbors and connect with new faces. We allow need to provide safe space for kids to waik and bike to and from school. Thank you.	
		-		

 				1
5/18/2022	Community Survey 2 - May 2022	General Comment	use the RR corridor. this is ridiculous to send it through these neighborhoods. I am very excited for the project over all. Seeing a regional trail come to this area is fantastic. Running the trail along	
 5/18/2022	Community Survey 2 - May 2022	General Comment	the lake will afford fantastic views and improve the property values.	
			As a longtime bicyclist I am in favor of safe bicycle trails that get people outside and exercising in a healthy way! I believe the addition to the community will have a positive effect and not bring excessive noise or congestion to the	
			area. We live 3 blocks from Bald Eagle Lake and current	
5/18/2022	Community Survey 2 - May 2022	General Comment	Lake and return on shoulder of Bald Eagle Ave. We look forward to more safe and fun trails in the future!	
	Community Survey 2 - May 2022		I am excited to see planning and work to safely connect some of the wonderful biking, walking and running options we enjoy in the NE metro.	
5/18/2022	Community Survey 2 - May 2022	General Comment	The proposed route is favored. The alternative alignment is a reduction in the end result.	
	Community Survey 2 - May 2022 Community Survey 2 - May 2022		Get it done sooner rather than later! Can't wait for this to actually happen!	
			Utilize railways. Avoid doing more construction on Bald Eagle Avenue. Too much happening in that area with the high	
5/18/2022	Community Survey 2 - May 2022	General Comment	school. I believe the residents being affected by this trail should have been given the opportunity to vote for No trail. This is an	
			expensive project benefiting bikers and walkers who primarily would use the trail in the warmer months of the year. Very few would bike along the lake in the winter and walkers tend to decrease as well. I believe the cost and disruption	
- / - /			to our neighborhood should be considered before reinventing the wheel for the use of a trail for 6 or so months out of	
 5/18/2022	Community Survey 2 - May 2022	General Comment	each year. Thank you for your recent interaction at WBL City Hall. I was in attendance. I think your presenters did a great job. I	
			think the audience did a great job listening but a poor job when it came to Q&A. You are probably prepared for that (not that it was egregious, just humans being "me oriented"). Keep up the good work, this is for the people of today	
			and tomorrow.	
			I would really like to know more about the One-way section(s). As state above, I think Southbound would be better, so	
5/18/2022	Community Survey 2 - May 2022	General Comment	would want to know why Northbound was recommended. Don't put the trail in a quiet residential neighborhood. Even if the railroad wants to keep the tracks, they ought to have	
			more flexibility with their rules (probably very outdated rules) and allow a quiet bike path alongside a track where	
5/18/2022	Community Survey 2 - May 2022	General Comment	trains operate slowly and very infrequently.	
			I was told at the community meeting that there are no other alternatives to Bald Eagle Ave and around Bald Eagle Lake. I do not believe this. I feel like you need to think outside of the box and MAKE another alternative. Why can't the trail	
-			run along highway 61, so that it is not running in the middle of an already fairly busy residential neighborhood? I	
	Community Survey 2 - May 2022 Community Survey 2 - May 2022		would love to have the trail nearby, but not along Bald Eagle Ave and the lake. Can't wait to see it done.	
			One way along the lake area makes everything more safe for pedestrians. White bear lake did one way, lake Harriet,	
5/18/2022	Community Survey 2 - May 2022	General Comment	the ability to reduce the cars and give both walkers, bikers, and runners adequate space and safety should be the number one concern.	
			I am a user of the trail systems in the twin cities a d I am really looking forward to being able to stay closer to home and	
 5/18/2022	Community Survey 2 - May 2022	General Comment	ride my bike on a safe designated trail. Sharing the road is scary these days. Thank you!!	
5/18/2022	Community Survey 2 - May 2022	General Comment	We're very excited to have the trail extended past our house on Whitaker St. heading north to the county line!	
5/18/2022	Community Survey 2 - May 2022	General Comment	This is a much needed trail connection especially with Washington County planning to extend their Hardwood Creek trail south from Hugo to County Rd J.	
			I'm really glad to see the trail design progressing. Lake Ave is heavily utilized (especially during the pandemic), and lots of people from the region enjoy being able to get outside and walk along the lake on a safe trail. Adding another trail	
5/18/2022	Community Survey 2 - May 2022	General Comment	option is great. I would also add that the people in the lake ave neighborhood can pretty painlessly manage a one-way street to accommodate a trail, and other neighborhoods will find they can manage it too.	
			How many other trails run through residential neighborhoods?	
5/18/2022	Community Survey 2 - May 2022	General Comment	No one I have talked to lies the idea. WE like our neighborhood. It is peaceful. The trail would change the dynamics of the area and not for the good.	
			There has been a lack of engagement for this route with the residents that are most impacted. The recent meeting in WB made it clear the community does not support a route that places a Regional Bike Teail in a residential	
			neighborhood. This position is also supported by the WB Township Board. A Regional Trail is a poor fit for a residential	
5/18/2022	Community Survey 2 - May 2022	General Comment	neighborhood. This is no different than why people on Lake Ave did not want this. End it at 96 and wait for the RR corridor to become available.	
			This area cannot support the size and scope of this project with adding the new school. A residential area is not the

This is uncereptable roung, especially as the North Campus is significantly expanding and will have increased traffic in the area. The BV trail should tillow the railroad corridor as originally intended. This project is invasive government over reach. If find it ironic Susan Vento MET COUNCLI represents this district. Wildlife will be disturbed polinators removed and last but not least 270.00 people annualy passing through and reso that can not support this ind or farfie. No other regional trail assex though a rediential areas such as our you how this is wrong when the township board does not support it. Last point you gut the barge up the creek and then hand the road back to the township a traid does not support residents until after the route was chosen. We do out want this in our neighborhood. Go somewhere else Behink this project. It's such apoor fit or a neighborhood. The tracks seem the better option. Population is down in <u>Barnay County</u> , this money could be put to better use in other neighborhoods with less options enjoyed in this area. <u>Prease</u> from a ficad standpoint building this trail is a waste of grast work	

		There has not been a true 3rd party feasibility study done on the projected route. The county did their own study which	
		we all know can then be biased, and continue to refer to this study as this is the best route. I implore the county to do a 3rd party feasibility study as there are alternative routes with less neighborhood disruption. At the last meeting of	
		impacted residence, not one person supported this. Of course you will have support from unaffected people, they have	
5/18/2022 Community Survey 2 - May 2022	General Comment	nothing to loose. It's not a fair survey to ask unaffected people. If you did a survey of just the affected people. I believe you'd have a 90%+ opposition to this project.	
5/18/2022 Community Survey 2 - May 2022		Invasive to residential area.	
5/18/2022 Community Survey 2 - May 2022	General Comment	Oppose going along this current proposed route, should allow for time to use RR ROW as originally intended	
5/18/2022 Community Survey 2 - May 2022	General Comment	I think a REGIONAL TRAIL through these neighborhoods is very wrong.	
5/18/2022 Community Survey 2 - May 2022	Ganaral Commont	No trail. We live on Whitaker St. near Lincoln. There will be too many people using this and parking will be horrendous. We love our nice quiet neighborhood. NO TRAIL! Leave White Bear Lake as it is, a lovely village like community.	
		This is another wasteful government project affecting the White Bear neighborhoods. This, like the proposed bus, is not	
5/18/2022 Community Survey 2 - May 2022	General Comment	wanted yet is being forced upon residents. Stop the project.	
		Use the railroad corridor, if it is not currently available then wait. What is the reason for the push? If it is available funding, then it is completely misguided to push it through when the timely is not there. I am sure there are many other	
		projects, especially those in more need, that can be worked on in the meantime. Those of us who have lived in the	
5/18/2022 Community Survey 2 - May 2022	General Comment	neighborhood for a long time, see projects come an go, this is one that needs to be tabled, first until the high school project from hell is done. Things change, maybe by then the train bed may be available.	
		I am an avid bike rider, and I would not likely use a trail that was shared with walkers, too dangerous. Bikes belong on the road, it has never been difficult to plan a ride in the area. It appears this trail would not be a good fit where this	
5/18/2022 Community Survey 2 - May 2022	General Comment	plan intends, and appears to be a lot of overspending tax payer dollars. Quit shoving this down our throat. Do what the people of this town want to you stupid ass designers taking people's

May-22	Wikimap Comments	Concern or Opportunities	to J to get to the boat launchthis would solve that problem as well.	
			This is a narrow road that many vehicles speed on right now, making it unsafe for walkers and bikers. How are they going to add a bike/walking trail to the already narrow road and still have parking available for residents if needed? I	
			would be open to making it a one way and taking one lane for the trail and the other lane for vehicle traffic. Better yet, make it a dead end with a spot for the trail to go through but not vehicular traffic. Boat traffic is supposed to go around

Appendix K - GARE Worksheet

# **Racial Equity Tool Worksheet**

# Step #1

### What is your proposal and the desired results and outcomes?

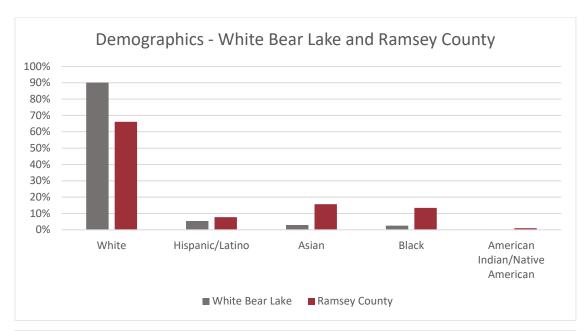

1. Describe the policy, program, practice, or budget decision (for the sake of brevity, we refer to this as a "proposal" in the remainder of these steps)

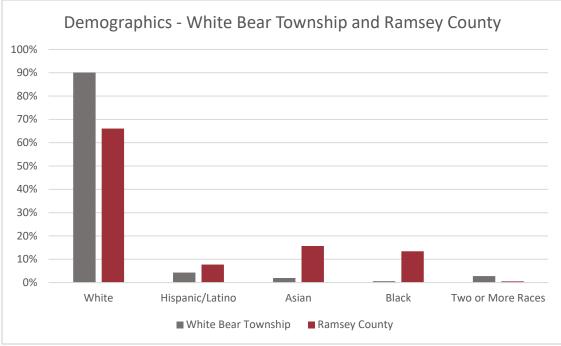

Ramsey County is seeking assistance to develop a critical link of the Bruce Vento Regional Trail to connect pedestrian and bicycle facilities in Ramsey County between Whitaker Street and County Road J. The Bruce Vento Regional Trail is envisioned to be a 13-mile trail from downtown St. Paul to the County boundary in White Bear Township.

2. What are the intended results (in the community) and outcomes (within your own organization)?

This project would complete a major gap in National US Bike Route 41 (USBR 41) by furthering the design process for the final 3.5 miles of the corridor. The approach to engagement builds on Ramsey County's goal established by the Board of Commissioners to cultivate economic prosperity through "inclusive initiatives that engage all communities in decisions about our future".

Engagement for the Bruce Vento Regional Trail preliminary design was conducted broadly to connect with a wide variety of stakeholders, including people of color, people with low incomes, other commonly underrepresented residents like youth and the elderly, as well as local business owners. About 10 percent of White Bear Lake residents are people of color, with 5.4 percent identifying as Hispanic or Latino, 2.6 percent identifying as Black/African American and nearly 3 percent identifying as Asian. In addition, 6.3 percent of households have incomes under the federal poverty line.

The project team provided accessible engagement opportunities for these groups to identify their existing needs and understand the potential benefits and impacts of the proposed trail alignments and future trail connections (I.e., in-person meetings, online meetings, pop-up events, online surveys, online comment map, project videos and meeting materials available online). **Given the diversity of residents and the underrepresented communities along the route, the project team provided information in ways that are approachable to multiple audiences.** 

Engaging community members was an important part of the planning process. The project ensured an accessible opportunity to participate at each phase of the County's

robust public engagement efforts and integrated the input from multiple agencies and community perspectives into the design. Through conversations with stakeholders and the public, we can better understand the needs of the community and respond with creative, constructible solutions that will help to ensure success for the Bruce Vento Regional Trail.

The project team is using the following engagement methods.

- Virtual Open House (Lunch and Evening)
- In-Person Open House Fall 2021
- In-Person Open House Spring 2022
- Surveys (2)
- Wikimap
- Project Video

These methods were developed in part to ensure people could have their voice heard even during COVID-19 restrictions, while also providing opportunities to meet people in the community, educate, receive comments, and talk about the project.

Successful engagement helped ensure that regional trail improvements provide high quality access to healthy recreation and transportation options for all people, all ages and all abilities.

A successful project will also deliver improved access and accessible design to the community. These improvements help ensure all residents have access to active recreation and transportation options both on the trail and on all the trails to which it connects.

#### 3. What does this proposal have an ability to impact? (bold all that apply)

Children and youth	Housing
Community engagement	Human services
Contracting equity	Jobs
Criminal justice	Parks and recreation
Economic development	Planning / development
Education	Transportation
Environment	Utilities
Food access and affordability	Workforce equity
Government practices	Other:
Health	

### Step #2

### What's the data? What does the data tell us?

1. Will the proposal have impacts in specific geographic areas (neighborhoods, areas, or regions)? What are the racial demographics of those living in the area?

The proposal is specific to White Bear Lake and White Bear Township, particularly the approximately 4 miles between Whitaker Street and County Road J. Residents in this area will experience increased access to healthy recreation and transportation opportunities with the addition of the trail. In addition, residents from other areas will be able to use the trail to connect to amenities and destinations in White Bear Lake and beyond. The <u>demographic</u> <u>composition</u> of White Bear Lake is 90.63% White/Caucasian, 2.73% Asian/Asian American /Pacific Islander, and 2.59% Black or African American. Additionally, 86.7% of the White Bear Lake population is White/Caucasian alone, and 5.5% [also/instead] identify as Hispanic or Latinx. In White Bear Lake, 20.2% of residents are under the age of 18, and 20.9 percent of residents are Seniors over the age of 65.

# 2. What does population level data, including quantitative and qualitative data, tell you about existing racial inequities? What does it tell you about root causes or factors influencing racial inequities?

Population data indicates that White Bear Lake and White Bear Township are mostly white communities. However, over time these communities are becoming increasingly diverse as more Asian, African American, and Latino households move to White Bear Lake and White Bear Township. Beyond the specific project extent within White Bear Lake, the broader communities that are served by this trail connection are diverse. To the south in Maplewood and East St Paul, there are large populations of Latino, African-American, Karen and Hmong residents. To the north in Hugo and Lino Lakes, approximately 5 percent of the population is made up of people of color.

Community	2010	2020	
White Bear Lake	93.25% -2010 Census	87.28% - 2020 Census	
White Bear Township	88.15% -2010 Census	81.12% - 2020 Census	

This stratification of demographics from one side of White Bear Lake to another is reflective of larger geographic stratifications trends across race and ethnicity in Ramsey County and the Twin Cities as a whole. It shows how communities can be disconnected and segregated on racial and economic lines. Creating more connections across these stratified communities is a small step that can help address those geographic inequities.

3. What performance level data do you have available for your proposal? This should include data associated with existing programs or policies.

According to Ramsey County's 2018 Walking and Biking use report, about 1.07% of White Bear Lake residents use walking as their mode of transportation, and less than .05% of residents use a bike as their primary mode of travel. The report also notes that White Bear Lake performs better than some of its other suburban peers in having an integrated pedestrian network: "White Bear Lake offers a model for smaller communities within Ramsey County, an integrated network of sidewalks in the downtown, supporting walking and short trips within a highly walkable defined area."

# 4. Are there data gaps? What additional data would be helpful in analyzing the proposal? If so, how can you obtain better data?

There are demographic/population data gaps for those who currently utilize the Bruce Vento Regional Trail in White Bear Lake and White Bear Township. It would be helpful to get an understanding of the types of pedestrians who use the trail and for what purposes (ex: families for recreation, commuters for work, students for school, etc.). It is important to understand how the public will interact with new/extended transportation facilities. The project attempted to address data gaps by collecting information from project participants by adding a question to the community survey asking what purpose(s) the respondent uses the trail.

# Step #3

# How have communities been engaged? Are there opportunities to expand engagement?

1. Who are the most affected community members who are concerned with or have experience related to this proposal? How have you involved these community members in the development of this proposal?

Neighborhood residents, White Bear Lake businesses, White Bear Township businesses, bicyclists, youth/parents, elected officials, school officials. These groups have been engaged through Open House meetings, project promotion, pop-up, mailers, community survey, interactive community comment map, virtual meeting, email outreach, website updates, project videos, as well as opportunities for translated materials.

2. What has your engagement process told you about the burdens or benefits for different groups?

Some of the burdens of the project include: Potential loss of trees/vegetation Railroad crossing and safety concerns Concern about project cost Potential loss of property Potential one-way conversion school commute concerns

Benefits include: Safety improvements for bicyclists/pedestrians Accessibility to schools and businesses via biking and walking More connected regional trail system

# 3. What has your engagement process told you about the factors that produce or perpetuate racial inequity related to this proposal?

Avoiding impacts to neighborhood comes as a cost of lack of access to trail users. While the demographics suggest a low percentage of racial minorities in the area, limited representation of these groups in the process could lead to results that reduce access to schools and businesses for low income and minority populations.

### Step #4

# What are your strategies for advancing racial equity?

1. Given what you have learned from research and stakeholder involvement, how will the proposal increase or decrease racial equity? Who would benefit from or be burdened by your proposal?

Racial equity improves with safe and accessible trail access, opportunities to travel from downtown St. Paul to County Line, connections to transit, and better pedestrian connections to education centers and community spaces. Most of the direct burdens heard from stakeholder engagement are impacts on adjacent property owners, resistance to change (i.e. loss of privacy) and changes in vehicle and pedestrian traffic patterns in the neighborhoods.

2. What are potential unintended consequences? What are the ways in which your proposal could be modified to enhance positive impacts or reduce negative impacts?

Potential unintended consequences identified in the process include possible changes in routing school commuter traffic, lack of connections to downtown White Bear Lake, environmental impacts to Bald Eagle Lake, a one-way conversion that has the potential to lead to a jurisdictional transfer of the roadway, loss of parking, and changes in school access and vehicle access to/from the school campus.

The addition of a trail has the potential to improve health and physical fitness of youth, seniors, and adults as well by improving safe and accessible trail access for all. Improved

pedestrian connections to regional amenities, including parks, transit stops and local businesses. Wayfinding and signage can help to bring more patronage to downtown White Bear Lake businesses. Significant improvements to bicycle and pedestrian safety by providing dedicated space outside of the roadway. Opportunity to improve pedestrian safety at school intersections.

3. Are there complementary strategies that you can implement? What are ways in which existing partnerships could be strengthened to maximize impact in the community? How will you partner with stakeholders for long-term positive change?

This phase of planning identified multiple ways to enhance positive impacts and reduce negative unintended consequences though additional stakeholder coordination, community, broader community education and further emphasis on vehicle and pedestrian safety. Specific opportunities identified during the process that can lead to long-term positive change include additional school planning, efforts to achieve municipal consent, outreach to build community buy-in, emphasis on neighborhood improvements (i.e. safety, wayfinding, traffic volumes, visualizations/renderings), address Bald Eagle Lake impacts and demonstrate potential improvements, partnership and connections to the Lakes Link Trail Project.

4. Are the impacts aligned with your community outcomes defined in Step #1?

Yes, through conversations with stakeholders and the public, we better understand concerns and opportunities identified by the community and worked to respond with creative, constructible solutions that will help to ensure success for the Bruce Vento Regional Trail.

This project would complete a major gap in National US Bike Route 41 (USBR 41) by furthering the design process for the final 3.5 miles of the corridor. A successful project will also deliver improved access and accessible design to the community. These improvements help ensure all residents have access to active recreation and transportation options both on the trail and on all the trails to which it connects.

# Step #5

# What is your plan for implementation?

#### 1. Describe your plan for implementation.

The project encompassed preliminary design of a Phase 2 trail extension. The preferred route for the regional trail corridor following Bald Eagle Avenue, Bald Eagle Boulevard, Taylor Avenue and Hugo Road to County Road J was determined by the feasibility study and master plan amendment that preceded this project. Additional design and public engagement will continue through the design development and final design phases of

the project. Further engagement with local agencies will also be needed to help secure funding for implementation and construction.

#### 2. Is your plan:

#### **Realistic?**

The plan for implementation is TBD but is several years away as funding has yet to be secured for construction. Community engagement will continue throughout design development and final design and community support is an important contributor to successful funding applications.

#### Adequately funded?

Funding was adequately provided for the initial phase 2 design phase. The County received the \$1.3 million federal grant to advance preliminary and final design, further engagement with stakeholders and WBL and WBT community. Funding for construction has not been secured.

#### Adequately resourced with personnel?

Yes, a Project Management Team lead by Ramsey County Parks & Recreation includes a variety of key local stakeholders. Continued collaboration amongst Ramsey County staff and agency partners (White Bear Lake, White Bear Township, Watersheds and the school district will be crucial to the continued advancement of the project.

# Adequately resources with mechanisms to ensure successful implementation and enforcement?

N/A

#### Adequately resourced to ensure on-going data collection, public reporting, and community engagement?

Yes, future trail design will include additional engagement with stakeholders and community members. All engagement materials used to facilitate preliminary are available for review on the County website.

If the answer to any of these questions is no, what resources or actions are needed?

# Step #6

# How will you ensure accountability, communicate, and evaluate results?

1. How will impacts be documented and evaluated? Are you achieving the anticipated outcomes? Are you having impact in the community?

The engagement process has been documented from start to finish with summaries and meeting materials available on the project website. Anticipated outcomes have been achieved through a transparent public input process, including surveys and summary of engagement, public notices, and promotional strategies such as mailers, meeting materials online, options for translation, presentations to City Council, Project Management Team, walking tours and one-on-one stakeholder conversations, timely response to public comments as well as a project video and pubic facing engagement summaries.

2. What are your messages and communication strategies that are will help advance racial equity?

The project worked to present project information in plain language and accessible formats to build community awareness and gather meaningful community input. This includes the use of simple language, iconography, visuals, and project videos to share information with community members in a variety of ways. As the project advances it will be important to continue using plain language messaging as well as to promote engagement events in a variety of ways to reach a broad audience. Additionally engagement and outreach efforts should work to meet people in the places they live, work and recreate in order to more effectively reach audiences who may not typically participate in traditional planning processes.

**3.** How will you continue to partner and deepen relationships with communities to make sure your work to advance racial equity is working and sustainable for the long-haul?

Ramsey County Parks & Recreation will continue to engage with residents, stakeholders, and elected officials as the project advances to more detailed design. All Phase 2 meeting materials, including project videos, will remain available on the project website.

Appendix L - Bruce Vento Regional Trail Planning Timeline

#### **Bruce Vento Regional Trail Corridor History**

Below is a high-level summary regarding the history and development.

#### Corridor Overview:

The Bruce Vento Regional Trail corridor is thirteen miles in length and extends from the east side of downtown Saint Paul to the north county line in White Bear Township. The southern seven-mile segment of the regional trail was completed in 2005 from downtown Saint Paul to Buerkle Road in White Bear Lake on the former Burlington Northern Santa Fe (BNSF) railway.

#### Original Master Plan:

- In 1992, the Ramsey County Regional Rail Authority purchased abandoned BNSF right-of-way from downtown St. Paul to Buerkle Road.
- The Bruce Vento Regional Trail was originally established in 1993 as a 13-mile regional trail corridor from downtown Saint Paul to County Road J.
  - St. Paul section: Kellogg Ave to Larpenteur
  - o Ramsey County section: Larpenteur to County Road J.
- The 1993 plan proposed the location of regional trail on railway right-of-way since the southern seven miles was abandoned and there were plans to abandon the remaining 6-miles in the future.
- The 1993 plan also identified a need for additional planning activities for the remaining regional trail corridor north of Buerkle Road.

#### Development from Kellogg Ave to Buerkle Road:

- Through the 1990's, portions of the regional trail were developed from Kellogg Avenue to Beam Avenue, except the Phalen Blvd section.
- By 2005, the Phalen Blvd segment and the section from Beam Ave to Buerkle Road was completed creating the contiguous southern 7-mile trail section.

#### North Six-mile section (Buerkle Road to County Road J):

- The remaining six-mile segment has remained undeveloped due to active railway use.
- For planning and development activities, Ramsey County split the remaining six miles up into two phases.
  - Phase 1 Section: Buerkle Road to Highway 96
  - Phase 2 Section: Highway 96 to County Road J.
- In 2013, Ramsey County received funding to complete a design study for the Phase 1 section to establish an alternate trail corridor from Buerkle Road to Highway 96.
- From 2014-2016, Ramsey County completed a preliminary design study to establish a corridor out of railway right-of way, develop schematic concept plans, review potential impacts, development cost estimates and engage the community.
- In 2018, Ramsey County refined the Phase 1 and Phase 2 sections based on constructability and alignment with the Rush Line BRT project (Purple Line).
  - Phase 1 section: Buerkle Road to intersection of Hoffman Road/U.S. Highway 61.
  - Phase 2 section: Whitaker Street to County Road J.

- The small section between Hoffman and Whitaker Street was incorporated with the Rush Line BRT project for proposed construction along Highway 61 with Rush Line improvements.
- In 2018, Ramsey County received additional funding to continue design and engagement with the community and launched three additional projects.
  - Complete preliminary and final design plans for the Phase 1 section.
  - o Initiate a feasibility study for the Phase 2 section between Whitaker and County Road J.
  - Initiate a master plan amendment for the Ramsey County section of the Bruce Vento Regional Trail between Larpenteur to County Road J.
- In 2021, Ramsey County initiated the Phase 2 Design Study project between Whitaker and County Road J to further study the preferred corridor, develop schematic concept plans, review potential impacts, development cost estimates and engage the community.

#### Feasibility Study (Whitaker to County Road J) (2018-2020):

- Ramsey County completed an exhaustive evaluation of potential routes between 2018 and 2020 through White Bear Lake (WBL) and White Bear Township (WBT). Agency staff included in the feasibility study analysis consisted of Ramsey County Parks and Recreation, RC Public Works, WBL and WBT.
- Purpose of the Feasibility Study was to evaluate an alternate corridor for Phase 2 (Whitaker Street to County Road J) including a public engagement process.
  - 2018 initiate feasibility study with agency partners for review of corridors through WBL and WBT.
  - 2018 Open House October 4th and 25th to solicit feedback regarding potential corridors.
  - 2019 Re-evaluate WBL downtown again including Long Avenue as an outcome from 2018 meetings including extensive engagement with railway and agency partners.
  - 2019 Open House Present 3 options for the preferred corridor alignment. Direct mailings was sent to individuals within the project corridor at ¼-mile buffer.
  - 2020: Preferred trail alignment for Phase 2 of the Bruce Vento Regional Trail determined early 2020 as a result of feedback received from previous engagements.
  - Preferred corridor from Whitaker to County Road J (Lincoln, Bald Eagle Ave, Bald Eagle Blvd, Taylor, Hugo Road)

#### Master Plan Amendment (2019 – 2021):

Ramsey County coordinated planning efforts for long-term Bruce Vento Regional Trail improvements through a public, stakeholder, and agency involvement process. There were three key elements for which Ramsey County and others sought public input to determine the future of Bruce Vento Trail:

- Phase 1 Section: Document outcomes for the preliminary design study, design features and realignment of trail from Buerkle Road to Hoffman Road/U.S. Highway 61.
- Phase 2 Section: Document outcomes for the feasibility study, design features and re-alignment of trail from Whitaker Street to County Road J.

- Purple Line (Rush Line BRT): Document outcomes for integration of the regional trail and Purple Line components between Larpenteur and Buerkle Road including design features and amenities, trail design, connections to BRT station stops, and visual quality.
- Master plan amendment for the Bruce Vento Regional Trail was initiated in mid-2019 and the feasibility study provided the basis for the master plan amendment.
  - 2020: Ramsey County prepares a Draft master Plan Amendment for long-term improvements to the Bruce Vento Regional Trail
    - August 2020 30-day Public Review
    - Letters of Support Gem Lake, White Bear Lake, White Bear Township
  - 2021 (January) Recommendation for approval by the Ramsey County Park & Rec Commission
  - o 2021 (May): Draft Amendment approved by Ramsey County Board of Commissioners

#### Feasibility Study - Route Analysis and Elimination:

An evaluation of potential routes through White Bear Lake and White Bear Township occurred between 2018 and 2020. Agency staff included in the feasibility study consisted of Ramsey County Parks & Recreation and Public Works, the City of White Bear Lake and White Bear Township.

Results of engagement activities completed in 2018 included a request by the public to reevaluate downtown White Bear Lake for the use of the original route identified in the 1993 plan. Re-evaluation included areas adjacent to or near the railway corridor, east and west sides of Highway 61 and Long Avenue. The study also evaluated additional routes east of Highway 61 through the east downtown section of White Bear Lake and the potential use of the Lake Avenue Trail (Lake Links Regional Trail), Clark Avenue, Stewart Avenue, Pacific Avenue, Buffalo Street, Northwest Avenue, Portland Avenue, and Highway 61 north of Highway 96. After significant evaluation, it was determined that these corridors were not viable options for the following reasons.

Downtown White Bear Lake (Near or adjacent to the railway, west and east side of Highway 61, Clark Avenue):

- Burlington Northern Santa Fe Railway would not support the route adjacent to the railway tracks due to spacing requirements from an active railway and impact to railway property.
- Lack of available right-of-way space throughout the downtown area. Significant redevelopment of existing buildings, parking lots, public roadways and other public facilities would be required to allow space for the trail.
- Greater impact on public infrastructure and adjacent private property.
- Impact on existing building infrastructure adjacent to the railway.
- Lack of connectivity to Long Avenue.
- High amount of turns north of Fourth Street to Long Avenue.
- Greater impact on existing buildings, public infrastructure and adjacent private property along Clark Avenue. Additional signal crossings would be required on Highway 61 at Seventh or Eighth Street.
- Lack of right-of-way space, harsh trail environment and ability to provide proper trail maintenance adjacent to Highway 61 (east and west side) and significant impact to adjacent properties, public infrastructure and building infrastructure.

Routes West of Highway 61:

- Routes 2 and 3 scored the lowest in the route survey at the November 19, 2019, community meeting.
- Lack of available right-of-way space along routes 2 and 3.
- Routes 2 and 3 do not provide high-quality trail use and atmosphere for a regional trail.
- Routes 2 and 3 do not fit into the overall regional trail context for planning alignment routes.
- Numerous turns for Route 2 and 3 through established urban areas.
- Greater impact with existing road-right-of-way and public infrastructure on Routes 2 and 3.

- Greater impact on existing mature canopy trees on Routes 2 and 3 do.
- Route 2 does not work with the proposed White Bear Lake High School development. It would create back turns to get to Long Avenue.

Routes East of Highway 61 (Lake Avenue, Stewart Avenue, Highway 96, Pacific Avenue, Northwest Avenue, Portland Avenue, Buffalo Street and Highway 61 north of Highway 96):

- Does not provide high-quality trail use and atmosphere for a regional trail and does not fit into the overall regional trail context for planning alignment routes.
- High amount of turns in urban areas.
- Greater impact with existing road right-of-way, public infrastructure, and adjacent private property.
- Greater impact on existing canopy trees.
- Additional acquisition or easements.
- Too many crossing points with Highway 61.
- Lake Avenue already has many trail users.
- Adding more to the Lake Avenue Trail (Lake Links Regional Trail) would create too much congestion.
- Utilizing the Lake Avenue Trail (Lakes Link Regional Trail) does not meet regional trail separation distance requirements.
- Due to significant wetlands, extensive boardwalk structures would be required north of Pacific Avenue.
- Lack of trail connectivity and available right-of-way on Highway 96.
- Creation of trail back turns for routing to crossing points on Highway 61.
- Harsh trail environment on Highway 61, north of Highway 61 to Buffalo Street and County Road J.
- Greater impact to existing right-of-way, wetlands, drainage ways, mature canopy trees and adjacent private property along Portland Avenue, Buffalo Street, and Northwest Avenue.

The evaluation analyzed design intent, usability and effectualness for both bikers and walkers, impacts, connections to downtown and trail user experience. Results of the feasibility study were incorporated into the master plan amendment and the county received letters of support/resolutions from White Bear Lake and White Bear Township in late 2020. The master plan amendment was approved by the Ramsey County Board of Commissioners in May 2021 and by the Metropolitan Council in August 2021.

#### **SEGMENT 4: FUTURE NORTHERN EXTENSION SEGMENT**

After the Rush Line BRT realignment at Whitaker Street, the Bruce Vento Trail will travel north through White Bear Lake and White Bear Township to the Ramsey County/Washington County line at County Road J. Because the original trail alignment considered sharing the right-of-way with active railroad service, two feasibility studies for the northern extension starting at Highway 96 were conducted by Ramsey County, the first in 2016 and the second in 2018. The goal of the studies were to determine an alternative trail alignment outside of railway right-of-way. Initially there were multiple alignments under consideration determined by the first feasibility study, which are shown in Figure 9.

Figure 9. Northern Extension Potential Alignments from the 2017 Study

Based on public engagement comments and coordination with other agencies, the multiple alignments shown in the figure above were narrowed down to three main options for the Bruce Vento Trail in the later feasibility study. They are shown in Figure 10, with justification for the selection of Route 1 as the preferred route below:

- Route 1: Route 1 was identified as the preferred route through the downtown area for connection to Hugo Road. The route would extend along Bald Eagle Avenue to Bald Eagle Boulevard to either Taylor Avenue or Buffalo Street and make connection to Hugo Road to reach County Road J. Buffalo Street could be considered as alternative trail corridors for connection onto Hugo Road depending one-way consideration of Bald Eagle Boulevard. In the event Bald Eagle Boulevard is not feasible, an alternate sub route utilizing White Bear Schools property, Division Avenue, and Park Avenue can be utilized to connect the trail from Bald Eagle Avenue to Hugo Road.
  - Scored the highest in the routes survey at the November 19, 2019 community meeting.
  - Provided the most appealing trail alignment and atmosphere for a regional trail.
  - Less turns.
  - Good connections to the High School.
  - High quality viewing to Bald Eagle Lake.
  - Potential partnership/coordination with the White Bear Lake and Ramsey County Public Works for railway crossing improvements.
  - White Bear Lake desire to incorporate trail connections from Bald Eagle Avenue to downtown area.
  - Sections of Bald Eagle Boulevard should be reviewed for possible 1-way road configuration east of Bald Eagle Avenue.

#### RAMSEY COUNTY Parks & Recreation

- Could provide long-term trail loops between Bruce Vento Trail and Lakes Link Regional Trail. This would require partnership for potential city connections to create this loop.
- Route 2 and 3: Both routes were not favored due to the amount of turns through the residential areas for connection into either Division Avenue or Long Avenue. It was anticipated this route may be confusing to users of the regional trail corridor.
  - Scored the lowest at the November 19, 2019 community meeting.
  - Does not provide high quality trail use and atmosphere for a regional trail.
  - Does not fit into overall regional trail context for planning alignment routes.
  - High amount of turns.
  - Get you closer to downtown area.
  - Potential impact with existing road right-of way and public infrastructure.

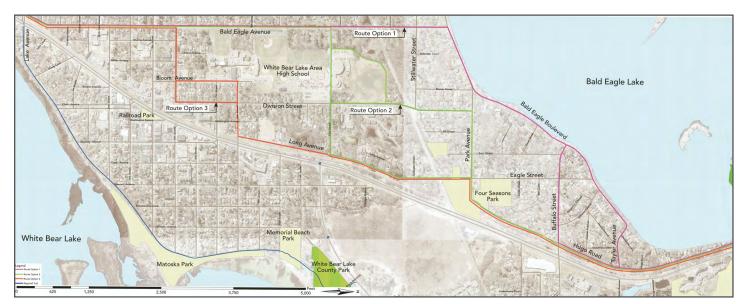

Figure 10. Three Route Options from the 2019 Community Meeting

Section 2.3 provides more detail on the specific plan for this segment, based on the findings of the feasibility study. Route 1 is the preferred route that is shown but may be altered in the future due to continued studies in downtown White Bear Lake for potential long-term development of the school, Rush Line BRT project, and surrounding business development on Long Avenue. Investigations are anticipated to be completed over the summer of 2020 which will determine the impact of these studies on the Bruce Vento Trail northern extension alignment and provide a basis for an alternative to the preferred route or a reevaluation of the proposed alignment.

A map showing existing conditions in the northern extension feasibility study area and the preferred alignment is shown in Figure 11, with existing conditions images following.

Figure 11. Segment 4, Whitaker Street to County Road J

Cul-de-sac at the southern end of Bald Eagle Avenue facing the intersection of Highway 61/County 96.

No shoulders or separated facilities exist along the narrow stretches of Bald Eagle Boulevard.

Existing conditions of Hugo Road.
