

Lake Owasso Public Meeting 4

- What impact studies have been done (or will be done) to assess impact of potential increase of boat traffic on Lake Wabasso? Changes to the boat launch/parking could entice more boaters, potentially fishing out a small lake. Environmental impact of heavier usage on both lakes.
- What about some kind of walking bridge or at least the flashing light to stop cars for pedestrians?
- Add 2 to 3 shelters.
- I don't understand going from 3 shelters down to 1. I often see smaller ones & 1 large one to me sounds restrictive and unfortunate for small groups.
- Nice Job!!! Only thing I would add would be a simple shelter overlooking Lake Wabasso in the "accessible picnic table" area. Different communities of people currently reserve 3 shelter most summer weekends.
- Please do not block the view & sunlight and airflow to 4 residents up the alley by lot C with trees and tall shrubs in lot C south end and around edge. Thank you
- Need an over road ADA bridge and ramp – curve – so on/off ramps do not invade the park side or beach side.
- Good job! Type of tree plantings? Bocce ball? Use picnic tables design from Turtle Lake. Border planting at perimeters to buffer noise for neighbors. Overall, well done.
- We need at least 2 permanent shelters because the shelters are currently full every weekend during 3 of the seasons. Please look at making the public launch onto Habasso more accessible for fishing boats to launch and persons with disabilities to use. We need to find a way to slow down traffic thru this area for public safety also.
- Why take away the "picnic in the park" feel by having only ONE reservable shelter? There isn't enough grassy areas to put down a blanket for a picnic – more shade trees are needed. If the one shelter for 40-60 people is reservable, what a waste for a reservation for a small group of 10 or 12 only.
- Perhaps another picnic shelter as ??? Invites use these and we are losing one.
- Add 1 or 2 small shelters @ Lake Owasso park.
- What about the bikers – (not in the trail) but they need a lane.
- Definitely more shelters needed- the other 2 could be smaller & simple but needed.
- Looks nice would like to see a fishing dock on Wabasso and or Owasso. I also hope Shoreview will redo the road at the same time. I also think it's smart to reduce the number of shelters. Too small of a park to have 3 large groups at the same time.
