

RACIAL DISPARITIES OF ASIAN YOUTH

in Ramsey County, Minnesota

Calculating RRI

A Relative Rate Index (RRI) is a method for measuring and quantifying racial disparities.

$$\frac{\text{Asian Youth Rate (occurrences/population)}}{\text{White Youth Rate (occurrences/population)}}$$

A RRI **higher than 1** indicates that asian youth are disproportionately over-represented at this decision point.

A RRI **below 1** shows they are under-represented.

A RRI **equal to 1** indicates no disproportional contact.

This RRI shows the rates of Asian youth compared with white youth across several juvenile justice system decision points.

Each decision point has an impact on the points that follow.

TOTAL POPULATION:
ASIAN YOUTH: 11,417
 White youth = 24,849

Juvenile Justice System Pathway:

ACTUAL NUMBERS

WHAT WOULD EQUITY LOOK LIKE?

Further exploration is needed to understand what factors are contributing to the disparities, let alone how to go about reducing them. We are committed to examining and changing our practices and policies to improve our juvenile justice system by keeping our community safe and helping all youth in Ramsey County thrive.

This publication was created by the Deep End Juvenile Justice Reform Data Workgroup which includes stakeholders from Ramsey County Community Corrections, St. Paul Police Department, Ramsey County Attorney, 2nd Judicial District Court Administration.
