

FALL 2022 COMMUNITY
ENGAGEMENT SUMMARY

Environmental Service Center

Ramsey County is building a new facility to provide more opportunities for residents to reduce, reuse, repair and recycle. Current plans include:

- Free drop-off site for recyclables, food scraps, electronic waste and household hazardous waste.
- Space for community education and resources.
- Permanent location for Fix-It Clinics where the community can get household items fixed for free and learn valuable repair skills.
- Free product reuse room where the community can find items like paints, automotive fluids and household cleaners.

Community Open Houses **October 2022**

Community open house engagements were conducted virtually and in person during October of 2022. Residents were invited to learn and share ideas about the Environmental Service Center.

Here's how residents were invited:

- Letter sent to households within one mile of proposed facility location.
- Social media, promotion on the Environmental Service Center webpage, and newsletters shared by the county, as well as by cities and district councils within the county.
- Focus was on residents living closest to the proposed site, but all Ramsey County residents were encouraged to attend.

Feedback received and summarized in this document will help shape the development of the Environmental Service Center.

Will having an Environmental Service Center encourage you to recycle more?

68% YES

54%

of residents are **very interested** in recycling and waste disposal services.
