

WHAT IS THE ALL-ABILITIES 2050 TRANSPORTATION PLAN?

The All-Abilities 2050 Transportation Plan is a **visioning document** that will guide the development of Ramsey County’s transportation system. It includes short- and long-term goals for the system, examines existing and future conditions, identifies where opportunities exist, and outlines a financially constrained list of projects to improve the safety, efficiency, and accessibility of the transportation network.

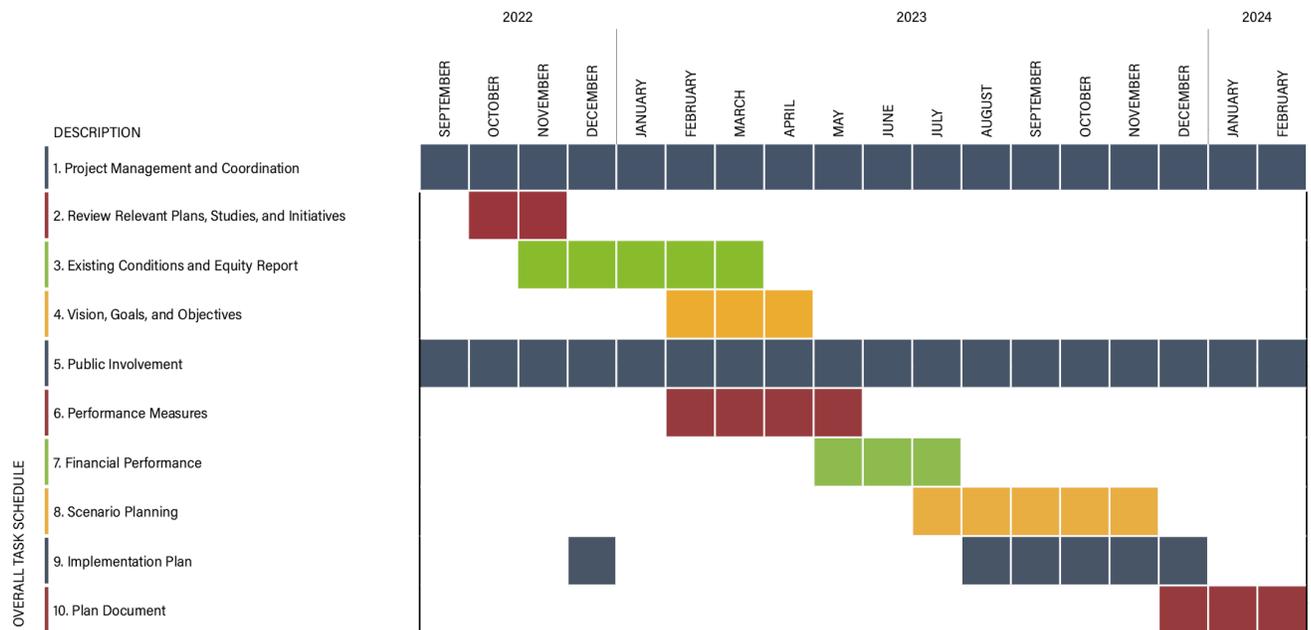

KEY DELIVERABLES

Eight key products will be created as part of this plan:

Understand Existing Conditions	Understand Current Social Equity	Transportation Goals and Objectives	Meaningful and Inclusive Engagement
How does the current system work?	Who does the current system work (and not work) for?	What should the system look like?	What does the community think? How can they stay engaged?
Updated Performance Measures	Financial Forecast	Financial Investment Scenarios	TIP Project Dashboard
How should our bridges, roadways, and transit be evaluated?	Does future funding match our goals?	How can we best invest in the system?	What projects should be prioritized?

SCHEDULE

The plan process began in September of 2022 and is scheduled for completion by February of 2024.
